1 ACCOUNTING POLICIES

Basis of preparing the financial statements - going concern

The financial statements have been prepared on a going concern basis. The company has an excess of current liabilities over current assets and is reliant on the support of its bankers. The support is dependent on achieving projections and repayments. The directors are confident that these are maintainable and realistic and have reorganised the company together with effecting cost saving measures which has resulted in the company returning to profitability.

Accounting convention

The financial statements have been prepared under the historical cost convention as modified by the revaluation of certain assets and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Preparation of consolidated financial statements

The financial statements contain information about W G Davies (Landore) Limited as an individual company and do not contain consolidated financial information as the parent of a group. The company has taken the option under Section 398 of the Companies Act 2006 not to prepare consolidated financial statements.

Turnover

Turnover represents net invoiced sales of goods, excluding value added tax.

Goodwill

Goodwill, being the amount paid in connection with the acquisition of a business in 2011, is being amortised evenly over its estimated useful life of four years.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life or, if held under a finance lease, over the lease term, whichever is the shorter.

Land and buildings	- 5% on cost
Plant and machinery etc	- 33% on cost, 25% on cost, 20% on cost and 10% on cost

Stocks

Stocks and work in progress are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

Cost includes all direct expenditure and an appropriate proportion of fixed and variable overheads.

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

The interest element of these obligations is charged to the profit and loss account over the relevant period. The capital element of the future payments is treated as a liability.

Rentals paid under operating leases are charged to the profit and loss account on a straight line basis over the period of the lease.
