NOTES TO THE ACCOUNTS

for the year ended 31 December 1994

1 ACCOUNTING POLICIES

The financial statements have been prepared under the historical cost convention, adopting the following principal accounting policies.

Turnover

Turnover represents the amounts, excluding value added tax, receivable during the year for goods and services supplied.

Depreciation

Depreciation is calculated to write off the cost less estimated residual value of tangible assets over their estimated useful lives at the following rates per annum:

Freehold land	Nil
Freehold buildings	Nil
Fixtures, fittings, tools and equipment	10-20% of written down value
Motor vehicles	25% of written down value

Stocks

Stock and work in progress are valued at the lower of cost and net realisable value. Cost is represented by direct materials and labour together with attributable amounts of fixed and variable overheads incurred in bringing each product to its present location and condition. Net realisable value is estimated selling price less further costs expected to be incurred to completion and disposal.

Foreign Currencies

Monetary assets and liabilities denominated in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date, or if appropriate at the forward contract date. Non-monetary assets denominated in foreign currencies are translated into sterling at the rate of exchange ruling at the date of acquisition of the asset. Transactions denominated in foreign currencies are translated into sterling at the rate of exchange ruling at the date of the transaction, or at the contracted rate if the transaction is covered by a forward exchange contract. All revaluation differences and realised foreign exchange differences are taken to the profit and loss account.

Deferred Taxation

Provision is made for deferred taxation using the liability method (calculated at the rate at which it is estimated that tax will be payable) in respect of timing differences between profits as computed for tax purposes and profits as stated in the financial statements, to the extent that those differences will give rise to tax liabilities in the foreseeable future.
