BP AMOCO EXPLORATION (FAROES) LIMITED

(Registered No.00856444)

ANNUAL REPORT AND FINANCIAL STATEMENTS 2020

Board of Director: A D Flores

The directors present their report and the audited financial statements for the year ended 31 December 2020.

In accordance with section 414B (b) of the Companies Act 2006, the directors are taking advantage of the small companies exemption to not prepare a strategic report.

DIRECTORS' REPORT
BP AMOCO EXPLORATION (FAROES) LIMITED

THURSDAY
AAD4HR3M
A14 16/09/2021 #303
COMPANIES HOUSE

Directors

The present director is A.D. Flores.

There have been no director appointments or resignations since 1 January 2020.

Directors' indemnity

The company indemnifies the directors in its Articles of Association to the extent allowed under section 232 of the Companies Act 2006. Such qualifying third party indemnity provisions for the benefit of the company's directors remain in force at the date of this report.

Dividends

The company has not declared any dividends during the year (2019: $0). The directors do not propose the payment of a final dividend.

Post balance sheet events

On 16 April 2021 bp announced it suspended production from the Foinaven fields west of Shetland as it began preparations to remove the Petrojarl Foinaven floating production, storage and offloading (FPSO) vessel from operation. The FPSO, which has been in the Foinaven area since 1996, was approaching the end of its 25-year design life. Work had been under way to consider options to extend the life of the vessel, but due to its age and demanding environment, it was determined that the FPSO was not the right option to recover the fields' remaining resources. bp is now assessing other options to recover the remaining reserves of up to 200 million barrels of oil at the Foinaven fields in a more efficient and sustainable way. bp plans to take the FPSO unit off station and hand it back to vessel owner Teekay Corporation in 2022. Consequently, a fixed asset impairment of $105 million was recognized for the Foinaven fields CGU in the first half year of 2021 out of which $7.3 million is allocated for BP Amoco Exploration (Faroes) Limited. Since these circumstances only arose subsequent to 31 December 2020, this impairment will be reflected in the financial statements of BP Amoco Exploration (Faroes) Limited for the year ending 31 December 2021.

Going concern

The directors have assessed the prospects of the company over a period of at least 12 months. The directors have considered expectations of the position and performance of the company over this period, taking account of its short-term and longer-range plans. Taking into account the company's current position and its principal risks, the directors have a reasonable expectation that the company will be able to continue in operation and meet its liabilities as they fall due over at least the next 12 months.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

DIRECTORS' REPORT

Since 1 January 2020, there has been significant volatility in the oil and gas prices and refining margins, in large part due to the impact of the international spread of COVID-19 (Coronavirus) and geopolitical factors. The impact of COVID-19 and the current economic environment on the basis of preparation of these financial statements has been considered.

The company holds an interest in the producing Foinaven field, as a result the company's cash-flows are impacted by changes in the oil and gas price. The future plans connecting to the FPSO are under discussion as it is stated in the post balance sheet event. The company does not hold cash directly and funding requirements are met through the central Treasury organisation, as a result the company is reliant on the overall group funding to continue in operation and meet its liabilities as they fall due in the going concern period. The total debit balance of the internal finance accounts (IFA) in the company is $121,904,890 funded by BP International Limited. The company has only intercompany trading within the BP group and also has net assets of $89,052,000 and net current assets of $118,956,000.

Liquidity and financing are managed within bp under pooled group-wide arrangements which include the company. As part of assuring the going concern basis of preparation for the company, the ability and intent of the bp group to support the company has been taken into consideration. The bp group financial statements continue to be prepared on a going concern basis. Forecast liquidity extending at least twelve months from the date of approval of these financial statements has been assessed at a group level under a number of scenarios and a reverse stress test performed to support the group's going concern assertion. In addition, group management of bp have confirmed that the existing intra-group funding and liquidity arrangements as currently constituted are expected to continue for the foreseeable future, being no less than twelve months from the approval of these financial statements.

In assessing the prospects of BP Amoco Exploration (Faroes) Limited, the directors noted that such assessment is subject to a degree of uncertainty that can be expected to increase looking out over time and, accordingly, that future outcomes cannot be guaranteed or predicted with certainty.

Having a reasonable expectation that the company has adequate resources to continue in operational existence for at least the next 12 months from the date these financial statements were approved, the directors consider it appropriate to continue to adopt the going concern basis of accounting in preparing the financial statements.

Future developments

The directors consider that, despite the uncertainties deriving from the current economic environment, the loss reported for the year and the post balance sheet event, the company has adequate resources to continue in operational existence for at least the next 12 months from the date these financial statements were approved.

It is the intention of the directors that the business of the company will continue for the foreseeable future.

Research and development

Research and development costs relate to the company's share of group led research and development programmes and initiatives. The cost of these group projects is absorbed by the fields and locations and therefore the legal entities which are expected to benefit from those developments are in the future.

Financial risk management

The company is exposed to a number of different financial risks arising from natural business exposures as well as its use of financial instruments including market risks relating to commodity prices, foreign currency exchange rates and interest rates; credit risk; and liquidity risk. Further details on these financial risks are included within Note 29 of the bp group Annual Report and Form 20-F for the year ended 31 December 2020.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

DIRECTORS' REPORT

Prices and markets

The company's financial performance is subject to fluctuating prices of oil and gas, technological change, exchange rate fluctuations and the general macroeconomic outlook. Political developments, increased supply of oil and gas or low carbon energy sources, technological change, global economic conditions, public health situations and the influence of OPEC can impact supply and demand and prices for our products.

Liquidity, financial capacity and financial, including credit, exposure

Failure to work within the financial framework set by the bp group could impact the company's ability to operate and result in financial loss.

Auditors

Pursuant to section 487 of the Companies Act 2006, Deloitte LLP have expressed their willingness to continue in office as auditors and are therefore deemed reappointed as auditors.

Directors' statement as to the disclosure of information to the auditor

The director who was members of the board at the time of approving the directors' report are listed on page 1. Having made enquiries of director and of the company's auditor, the director confirms that:

- To the best of the director's knowledge and belief, there is no information relevant to the preparation of the auditor's report of which the company's auditor is unaware; and
- The director has taken all the steps a director might reasonably be expected to have taken to be aware of relevant audit information and to establish that the company's auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with section 418 of the Companies Act 2006.

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE FINANCIAL STATEMENTS

BP AMOCO EXPLORATION (FAROES) LIMITED

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable UK law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law) including Financial Reporting Standard 101 'Reduced Disclosure Framework'. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable United Kingdom accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors confirm that they have complied with these requirements. Details of the directors' assessment of going concern are provided in the directors' report.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF BP AMOCO EXPLORATION (FAROES) LIMITED

Opinion

In our opinion the financial statements of BP Amoco Exploration (Faroes) Limited (the company):

- give a true and fair view of the state of the company's affairs as at 31 December 2020 and of its loss for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 101 "Reduced Disclosure Framework"; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements which comprise:

- the profit and loss account;
- the statement of comprehensive income;
- the balance sheet;
- the statement of changes in equity; and
- the related notes 1 to 23.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 101 "Reduced Disclosure Framework" (United Kingdom Generally Accepted Accounting Practice).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the statement of directors' responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

We considered the nature of the company's industry and its control environment, and reviewed the company's documentation of their policies and procedures relating to fraud and compliance with laws and regulations. We also enquired of management about their own identification and assessment of the risks of irregularities.

We obtained an understanding of the legal and regulatory frameworks that the company operates in, and identified the key laws and regulations that:

- had a direct effect on the determination of material amounts and disclosures in the financial statements. These included the UK Companies Act and relevant tax legislation.
- do not have a direct effect on the financial statements but compliance with which may be fundamental to the company's ability to operate or to avoid a material penalty.

We discussed among the audit engagement team regarding the opportunities and incentives that may exist within the organisation for fraud and how and where fraud might occur in the financial statements.

In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override. In addressing the risk of fraud through management override of controls, we tested the appropriateness of journal entries and other adjustments; assessed whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluated the business rationale of any significant transactions that are unusual or outside the normal course of business.

In addition to the above, our procedures to respond to the risks identified included the following:

- reviewing financial statement disclosures by testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- enquiring of management and in-house legal counsel concerning actual and potential litigation and claims, and instances of non-compliance with laws and regulations; and
- reading minutes of meetings of those charged with governance.

Report on other legal and regulatory requirements

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report has been prepared in accordance with applicable legal requirements.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

INDEPENDENT AUDITOR'S REPORT

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified any material misstatements in the directors' report.

Matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report in respect of the following matters if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in respect of these matters.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

1. Authorisation of financial statements and statement of compliance with Financial Reporting Standard 101 Reduced Disclosure Framework (FRS 101)

The financial statements of BP Amoco Exploration (Faroes) Limited for the year ended 31 December 2020 were approved by the board of directors on 07/09/2021 and the balance sheet was signed on the board's behalf by A D Flores. BP Amoco Exploration (Faroes) Limited is a private company, limited by shares, incorporated, domiciled and registered in England and Wales (registered number 00856444). The company's registered office is at Chertsey Road, Sunbury on Thames, Middlesex, TW16 7BP, United Kingdom. These financial statements were prepared in accordance with Financial Reporting Standard 101 'Reduced Disclosure Framework' (FRS 101) and the provisions of the Companies Act 2006.

Principal activity

The company is engaged in the exploration for, and the production of oil and gas in the United Kingdom from its 5% interest in the Foinaven field.

2. Significant accounting policies, judgements, estimates and assumptions

The significant accounting policies and critical accounting judgements, estimates and assumptions of the company are set out below.

Basis of preparation

These financial statements have been prepared in accordance with FRS 101. The financial statements have been prepared under the historical cost convention. Historical cost is generally based on the fair value of the consideration given in exchange for the assets.

The accounting policies that follow have been consistently applied to all years presented, except where otherwise indicated.

As permitted by FRS 101, the company has taken advantage of the disclosure exemptions available under that standard in relation to:

(a) the requirements of IFRS 7 Financial Instruments: Disclosures;
(b) the requirements of paragraphs 91 – 99 of IFRS 13 Fair Value Measurement;
(c) the requirements of paragraphs 10(d), 10(f), 16, 38A, 38B, 38C, 38D, 40A, 40B, 40C, 40D, 111 and 134 to 136 of IAS 1 Presentation of Financial Statements;
(d) the requirement in paragraph 38 of IAS 1 Presentation of Financial Statements to present comparative information in respect of:
    (i) paragraph 79(a)(iv) of IAS 1;
    (ii) paragraph 73(e) of IAS 16 Property, Plant and Equipment;
    (iii) paragraph 118(e) of IAS 38 Intangible Assets;
(e) the requirements of IAS 7 Statement of Cash Flows;
(f) the requirements of paragraphs 30 and 31 of IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors in relation to standards not yet effective;
(g) the requirements of paragraph 17 and 18A of IAS 24 Related Party Disclosures;
(h) the requirements of IAS 24 Related Party Disclosures to disclose related party transactions entered into between two or more members of a group, provided that any subsidiary which is a party to the transaction is wholly owned by such a member;

DTT

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

(i) the requirements of paragraphs 130(f)(ii), 130(f)(iii), 134(d) to 134(f) and 135(c)-135(e) of IAS 36, Impairment of Assets;
(j) the requirement of the second sentence of paragraph 110 and paragraphs 113(a), 114, 115, 118, 119(a) to (c), 120 to 127 and 129 of IFRS 15 Revenue from Contracts with Customers;
(k) the requirements of paragraph 52, the second sentence of paragraph 89, and paragraphs 90, 91 and 93 of IFRS 16 Leases; and
(l) the requirements of paragraph 58 of IFRS 16 Leases, provided that the disclosure of details of indebtedness required by paragraph 61(1) of Schedule 1 to the Regulations is presented separately for lease liabilities and other liabilities, and in total.

Where required, equivalent disclosures are given in the group financial statements of BP p.l.c. The group financial statements of BP p.l.c. are available to the public and can be obtained as set out in Note 23.

The financial statements are presented in US dollars and all values are rounded to the nearest thousand dollars ($000), except where otherwise indicated.

Significant accounting policies: use of judgements, estimates and assumptions

Inherent in the application of many of the accounting policies used in preparing the financial statements is the need for management to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual outcomes could differ from the estimates and assumptions used. The accounting judgements and estimates that have a significant impact on the results of the company are set out within the boxed text below, and should be read in conjunction with the information provided in the Notes to the financial statements.

The areas requiring the most significant judgement and estimation in the preparation of the financial statements are: the recoverability of asset carrying values, including the estimation of reserves and provisions and contingencies.

Judgements and estimates, not all of which are significant, made in assessing the impact of the COVID-19 pandemic, and climate change and the energy transition on the financial statements are also set out in boxed text below. Where an estimate has a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year this is specifically noted within the boxed text.

Judgements and estimates made in assessing the impact of climate change and the energy transition
Climate change, the energy transition, bp's strategy to 2030 and ambition to become a net-zero company by 2050 or sooner were considered in preparing the financial statements. These issues may also have significant impacts on the currently reported amounts of the company's assets and liabilities discussed below as well as similar assets and liabilities that may be recognized in the future.

Impairment of property, plant and equipment
The energy transition is likely to impact the future prices of commodities such as oil and natural gas which in turn may affect the recoverable amount of property, plant and equipment in the oil and gas industry. bp's best estimate oil and natural gas price assumptions for value-in-use impairment testing were revised downwards during 2020 and are broadly in line with a range of transition paths consistent with the Paris climate change agreement or other low oil price scenarios. See significant judgements and estimates: recoverability of asset carrying values for further information including sensitivity analysis in relation to reasonably possible changes in the price assumptions.

Impairments were recognized during 2020 on certain oil and gas properties as a result of the lower price assumptions. See note 11 for further information.

Management will continue to review price assumptions as the energy transition progresses and this may result in impairment charges or reversals in the future.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Exploration and appraisal intangible assets
The energy transition may affect the future development or viability of exploration prospects. The lower price assumptions and bp's long-term net-zero strategy resulted in a review of the recoverability of exploration and appraisal intangible assets during 2020. Certain intangible assets were subsequently written-off. See significant judgement: exploration and appraisal intangible assets and note 10 for further information. The revised assumptions for investment appraisal (see page 16) seek to ensure that future capital expenditure on property plant and equipment, and exploration and appraisal intangibles, is aligned with bp's net-zero strategy.

Property, plant and equipment – depreciation and expected useful lives
The energy transition may curtail the expected useful lives of oil and gas industry assets thereby accelerating depreciation charges. The majority of the company's property, plant and equipment is likely to be fully depreciated within the next 10 years and oil and natural gas will remain part of bp's net-zero ambition to 2050 or sooner. Therefore, management does not expect the useful lives of the company's reported property, plant and equipment to change and do not consider this to be a significant accounting judgement or estimate. The useful lives of future capital expenditure may, however, be different. See significant accounting policy: property, plant and equipment for more information.

Provisions: decommissioning
The energy transition may bring forward the decommissioning of oil and gas industry assets thereby increasing the present value of associated decommissioning provisions. The majority of the company's oil and gas properties are expected to start decommissioning within the next 5 years and management does not expect a reasonable change in the expected timeframe to have a material effect on the decommissioning provisions, assuming cash flows remain unchanged. Decommissioning cost estimates are based on the known regulatory and external environment. These may change in the future as a result of the energy transition. See significant judgements and estimates: provisions for further information.

Judgements and estimates made in assessing the impact of the COVID-19 pandemic and the economic environment
In preparing the financial statements, the following areas involving judgement and estimates were identified as most relevant with regards to the impact of the COVID-19 pandemic and current economic environment.

Going concern
Forecast liquidity for the bp group has been assessed under a number of stressed scenarios and a reverse stress test was performed to support the going concern assertion. No material uncertainties over going concern or significant judgements or estimates in the assessment were identified.

Discount rate assumptions
The discount rates used for impairment testing and provisions were reviewed during the year. The post-tax impairment discount rate and nominal provisions discount rate were unchanged from 2019. Premiums for certain higher-risk countries were changed but this did not have a material impact. See significant judgements and estimates: recoverability of asset carrying values and provisions for further information.

Oil and natural gas price assumptions
The price assumptions used in value-in-use impairment testing were significantly lowered during the year. Material impairment charges and exploration write-offs were recognized as a consequence of these price assumption changes. See significant judgements and estimates: recoverability of asset carrying values and exploration and appraisal intangible assets for further information.

Significant accounting policies

Going concern

The directors have a reasonable expectation that the company has adequate resources to continue in operational existence for at least the next 12 months from the date these financial statements were approved and the financial statements have therefore been prepared under the going concern basis.

For further detail on the directors' going concern assessment, please refer to the directors' report.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Foreign currency

The functional and presentation currency of the financial statements is US dollars. The functional currency is the currency of the primary economic environment in which an entity operates and is normally the currency in which the entity primarily generates and expends cash.

Transactions in foreign currencies are initially recorded in the functional currency by applying the rate of exchange ruling at the date of the transaction. Where this is not practical and exchange rates do not fluctuate materially the average rate has been used. Monetary assets and liabilities denominated in foreign currencies are retranslated into the functional currency at the spot exchange on the balance sheet date. Any resulting exchange differences are included in the profit and loss account, unless hedge accounting is applied. Non-monetary assets and liabilities, other than those measured at fair value, are not retranslated subsequent to initial recognition.

Investments

Interests in joint arrangements
A joint arrangement is an arrangement in which two or more parties have joint control. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. The company recognizes, on a line-by-line basis, its share of the assets, liabilities and expenses of these joint operations incurred jointly with the other partners, along with the company's income from the sale of its share of the output and any liabilities and expenses that the company has incurred in relation to the joint operation.

Intangible assets

Intangible assets, other than goodwill, are stated at the amount initially recognized, less accumulated amortization and accumulated impairment losses.

For information on accounting for expenditures on the exploration for and evaluation of oil and natural gas resources, see the accounting policy for oil and natural gas exploration, appraisal and development expenditure below.

Intangible assets are carried initially at cost unless acquired as part of a business combination. Any such asset is measured at fair value at the date of the business combination and is recognized separately from goodwill if the asset is separable or arises from contractual or other legal rights.

Intangible assets with a finite life are amortized on a straight-line basis over their expected useful lives. For patents, licences and trademarks, expected useful life is the shorter of the duration of the legal agreement and economic useful life, and can range from three to fifteen years. Computer software costs generally have a useful life of three to five years.

The expected useful lives of assets and the amortization method are reviewed on an annual basis and, if necessary, changes in useful lives or the amortization method are accounted for prospectively.

The carrying value of intangible assets is reviewed for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Oil and natural gas exploration, appraisal and development expenditure

Oil and natural gas exploration, appraisal and development expenditure is accounted for using the principles of the successful efforts method of accounting as described below.

Licence and property acquisition costs

Exploration licence and leasehold property acquisition costs are initially capitalized within intangible assets and are reviewed at each reporting date to confirm that there is no indication that the carrying amount exceeds the recoverable amount. This review includes confirming that exploration drilling is still under way or firmly planned or that it has been determined, or work is under way to determine, that the discovery is economically viable based on a range of technical and commercial considerations and sufficient progress is being made on establishing development plans and timing. If no future activity is planned, the remaining balance of the licence and property acquisition costs is written off. Lower value licences are pooled and amortized on a straight-line basis over the estimated period of exploration. Upon internal approval for development and recognition of proved reserves of oil and natural gas, the relevant expenditure is transferred to tangible assets.

Exploration and appraisal expenditure

Geological and geophysical exploration costs are charged to the profit and loss account as incurred. Costs directly associated with an exploration well are capitalized as an intangible asset until the drilling of the well is complete and the results have been evaluated. These costs include employee remuneration, materials and fuel used, rig costs and payments made to contractors. If potentially commercial quantities of hydrocarbons are not found, the exploration well costs are written off. If hydrocarbons are found and, subject to further appraisal activity, are likely to be capable of commercial development, the costs continue to be carried as an asset. If it is determined that development will not occur then the costs are expensed.

Costs directly associated with appraisal activity undertaken to determine the size, characteristics and commercial potential of a reservoir following the initial discovery of hydrocarbons, including the costs of appraisal wells where hydrocarbons were not found, are initially capitalized as an intangible asset. Upon internal approval for development and recognition of proved reserves, the relevant expenditure is transferred to tangible assets.

The determination of whether potentially economic oil and natural gas reserves have been discovered by an exploration well is usually made within one year of well completion, but can take longer, depending on the complexity of the geological structure. Exploration wells that discover potentially economic quantities of oil and natural gas and are in areas where major capital expenditure (e.g. an offshore platform or a pipeline) would be required before production could begin, and where the economic viability of that major capital expenditure depends on the successful completion of further exploration or appraisal work in the area, remain capitalized on the balance sheet as long as such work is under way or firmly planned.

Development expenditure

Expenditure on the construction, installation or completion of infrastructure facilities such as platforms, pipelines and the drilling of development wells, including service and unsuccessful development or delineation wells, is capitalized within tangible assets and is depreciated from the commencement of production as described below in the accounting policy for tangible assets.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Significant judgement: exploration and appraisal intangible assets

Judgement is required to determine whether it is appropriate to continue to carry costs associated with exploration wells and exploratory type stratigraphic test wells on the balance sheet. This includes costs relating to exploration licences or leasehold property acquisitions. It is not unusual to have such costs remaining suspended on the balance sheet for several years while additional appraisal drilling and seismic work on the potential oil and natural gas field is performed or while the optimum development plans and timing are established.The costs are carried based on the current regulatory and political environment or any known changes to that environment. All such carried costs are subject to regular technical, commercial and management review on at least an annual basis to confirm the continued intent to develop, or otherwise extract value from, the discovery. Where this is no longer the case, the costs are immediately expensed.

As a result of the revised price assumptions detailed in Significant judgements and estimates: recoverability of asset carrying values below and a review of bp's long-term strategic plan, management reviewed the company's exploration prospects and the carrying value of the associated intangible assets. The outcome of the review resulted in revised judgements over management's expectations to extract value from certain prospects, thereby leading to material write-offs of the associated exploration and appraisal intangible assets in 2020.

The carrying amount of capitalized costs and further information on the write-offs are included in Note 10.

Tangible assets

Tangible assets owned by the company are stated at cost, less accumulated depreciation and accumulated impairment losses. The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into the location and condition necessary for it to be capable of operating in the manner intended by management, the initial estimate of any decommissioning obligation, if applicable, and, for assets that necessarily take a substantial period of time to get ready for their intended use, directly-attributable finance costs. The purchase price or construction cost is the aggregate amount paid and the fair value of any other consideration given to acquire the asset.

Exchanges of assets are measured at fair value unless the exchange transaction lacks commercial substance or the fair value of neither the asset received nor the asset given up is reliably measurable. The cost of the acquired asset is measured at the fair value of the asset given up, unless the fair value of the asset received is more clearly evident. Where fair value is not used, the cost of the acquired asset is measured at the carrying amount of the asset given up. The gain or loss on derecognition of the asset given up is recognized in profit or loss.

Expenditure on major maintenance refits or repairs comprises the cost of replacement assets or parts of assets, inspection costs and overhaul costs. Where an asset or part of an asset that was separately depreciated is replaced and it is probable that future economic benefits associated with the item will flow to the company, the expenditure is capitalized and the carrying amount of the replaced asset is derecognized. Inspection costs associated with major maintenance programmes are capitalized and amortized over the period to the next inspection. Overhaul costs for major maintenance programmes, and all other maintenance costs are expensed as incurred.

Oil and natural gas properties, including related pipelines, are depreciated using a unit-of-production method. The cost of producing wells is amortized over proved developed reserves. Licence acquisition, common facilities and future decommissioning costs are amortized over total proved reserves. The unit-of-production rate for the depreciation of common facilities takes into account expenditures incurred to date, together with estimated future capital expenditure expected to be incurred relating to as yet undeveloped reserves expected to be processed through these common facilities.

The expected useful lives and depreciation method of tangible assets are reviewed on an annual basis and, if necessary, changes in useful lives or the depreciation method are accounted for prospectively.

The carrying amounts of tangible assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

An item of tangible assets is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the profit and loss account in the period in which the item is derecognized.

Impairment of intangible and tangible assets

The company assesses assets or groups of assets, called cash-generating units (CGUs) for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable, for example, changes in the company's business plans, plans to dispose rather than retain assets, changes in commodity prices, low plant utilization, evidence of physical damage or, for oil and gas assets, significant downward revisions of estimated reserves or increases in estimated future development expenditure or decommissioning costs. If any such indication of impairment exists, the company makes an estimate of the asset's recoverable amount. Individual assets are grouped for impairment assessment purposes at the lowest level at which there are identifiable cash flows that are largely independent of the cash flows of other groups of assets. An asset group's recoverable amount is the higher of its fair value less costs to sell and its value in use. If it is probable that the value of the CGU will primarily be recovered through a disposal transaction, the expected disposal proceeds are considered in determining the recoverable amount. Where the carrying amount of an asset group exceeds its recoverable amount, the asset group is considered impaired and is written down to its recoverable amount.

The business segment plans, which are approved on an annual basis by senior management, are the primary source of information for the determination of value in use. They contain forecasts for oil and natural gas production, revenues, costs and capital expenditure. Carbon taxes and costs of emissions allowances are also included in estimates of future cash flows, based on the regulatory environment in each jurisdiction in which the group operates. As an initial step in the preparation of these plans, various assumptions regarding market conditions, such as oil prices, natural gas prices, refining margins, refined product margins and cost inflation rates are set by senior management. These assumptions take account of existing prices, global supply-demand equilibrium for oil and natural gas, other macroeconomic factors and historical trends and variability. In assessing value in use, the estimated future cash flows are adjusted for the risks specific to the asset group that are not reflected in the discount rate and are discounted to their present value typically using a pre-tax discount rate that reflects current market assessments of the time value of money.

Fair value less costs to sell is identified as the price that would be received to sell the asset in an orderly transaction between market participants and does not reflect the effects of factors that may be specific to the entity and not applicable to entities in general. In limited circumstances where recent market transactions are not available for reference, discounted cash flow techniques are applied. Where discounted cash flow analyses are used to calculate fair value less costs of disposal, estimates are made about the assumptions market participants would use when pricing the asset, CGU or group of CGUs containing goodwill and the test is performed on a post-tax basis.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit or loss. After such a reversal, the depreciation charge is adjusted in future years to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Significant judgements and estimates: recoverability of asset carrying values

Determination as to whether, and how much, an asset, CGU, or group of CGUs containing goodwill is impaired involves management estimates on highly uncertain matters such as the effects of inflation and deflation on operating expenses, discount rates, capital expenditure, production profiles, reserves and resources, and future commodity prices, including the outlook for global or regional market supply-and-demand conditions for crude oil, natural gas and refined products. Judgement is required when determining the appropriate grouping of assets into a CGU or the appropriate grouping of CGUs for impairment testing purposes. For example, individual oil and gas properties may form separate CGUs whilst certain oil and gas properties with shared infrastructure may be grouped together to form a single CGU. Alternative groupings of assets or CGUs may result in a different outcome from impairment testing.

The recoverable amount of an asset is the higher of its value in use and its fair value less costs of disposal. Fair value less costs of disposal may be determined based on expected sales proceeds or similar recent market transaction data.

Details of impairment charges and reversals recognized in the profit and loss account are provided in Note 4 and details of the carrying amounts of assets are shown in Note 11.

The estimates for assumptions made in impairment tests in 2020 relating to discount rates and oil and gas properties are discussed below. Changes in the economic environment or other facts and circumstances may necessitate revisions to these assumptions and could result in a material change to the carrying values of the company's assets within the next financial year.

Discount rates

For discounted cash flow calculations, future cash flows are adjusted for risks specific to the CGU. Value-in-use calculations are typically discounted using a pre-tax discount rate based upon the cost of funding the bp group derived from an established model, adjusted to a pre-tax basis and incorporating a market participant capital structure and country risk premiums. Fair value less costs of disposal calculations use the post-tax discount rate.

The discount rates applied in impairment tests are reassessed each year and in 2020 the post-tax discount rate used was 6% (2019 6%). Where the CGU is located in a country that was judged to be higher risk an additional premium of 1% to 3% was reflected in the discount rate (2019 1% to 4%). The judgement of classifying a country as higher risk and the applicable premium takes into account various economic and geopolitical factors. The pre-tax discount rate typically ranged from 7% to 15% (2019 7% to 13%) depending on the applicable tax rate in the geographic location of the CGU.

Oil and natural gas properties

For oil and natural gas properties, expected future cash flows are estimated using management's best estimate of future oil and natural gas prices, and production and reserves volumes. The estimated future level of production is based on assumptions about future commodity prices, production and development costs, field decline rates, current fiscal regimes and other factors.

In 2020, the company identified oil and gas properties with carrying amounts totalling $5.1 million (2019 $36.3 million) where the headroom, as at the dates of the last impairment test performed on those assets, was less than or equal to 20% of the carrying value. A change in the discount rate, reserves, resources or the oil and gas price assumptions in the next financial year may result in a recoverable amount of one or more of these assets above or below the current carrying amount and therefore there is a significant risk of impairment reversals or charges in that period.

The recoverability of intangible exploration and appraisal expenditure is covered under Oil and natural gas exploration, appraisal and development expenditure above.

Information on the carrying amounts of the company's oil and natural gas properties, together with the amounts recognized as depreciation, depletion and amortization is contained in Note 11.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Oil and natural gas prices

The price assumptions used for value in use impairment testing are based on those used for investment appraisal. The investment appraisal price assumptions are recommended by the bp group senior vice president economic & energy insights after considering a range of external price, and supply and demand forecasts under various energy transition scenarios. They are reviewed and approved by management. As a result of the current uncertainty over the pace of transition to lower-carbon supply and demand and the social, political and environmental actions that will be taken to meet the goals of the Paris climate change agreement, the forecasts and scenarios considered include those where those goals are met as well as those where they are not met.

bp sees the prospect of an enduring impact on the global economy as a result of the COVID-19 pandemic, with the potential for weaker demand for energy for a sustained period. bp's management also expects that the aftermath of the pandemic will accelerate the pace of transition to a lower carbon economy and energy system as countries seek to 'build back better' so that their economies will be more resilient in the future. As a result of all the above, bp revised its price assumptions for value-in-use impairment testing, lowering them compared to those used in 2019 and extending the period covered to 2050. These price assumptions are derived from bp's central case investment appraisal assumptions. A summary of the company's revised price assumptions, in real 2020 terms, is provided below. The assumptions represent management's best estimate of future prices, which sit within the range of external forecasts considered as appropriate for the purpose. They are considered by bp to be broadly in line with a range of transition paths consistent with the Paris climate goals. However, they do not correspond to any specific Paris-consistent scenario. An inflation rate of 2% (2019 2%) is applied to determine the price assumptions in nominal terms:

	2021	2025	2030	2040	2050
Brent oil ($/bbl)	50	50	60	60	50
Henry Hub gas ($/mmBtu)	3.00	3.00	3.00	3.00	2.75

Material impairment charges were recognized in 2020 following the downward revision of the price assumptions. See Note 4 for further information.

The long-term price assumptions used to determine recoverable amount based on value-in-use impairments tests in 2019 were $70 per barrel for Brent and $4 per mmBtu for Henry Hub gas, both in 2015 prices. These long-term prices were applied from 2025 and 2032 respectively inflated for the remaining life of the asset.

The price assumptions used in 2019 over the periods to 2025 and 2032 were set such that there was a linear progression from bp's best estimate of 2020 prices to the long-term assumptions.

The majority of bp's reserves and resources that support the carrying value of the group's existing oil and gas properties are expected to be produced over the next 10 years.

Oil prices fell 35% in 2020 from 2019 due to trade tensions, a macroeconomic downturn, and a slight slowdown in oil demand. OPEC+ production restraint, unplanned outages, and sanctions on Venezuela and Iran kept prices from falling further. bp's long-term assumption for oil prices is higher than the 2020 price average, based on the judgement that current price levels would not encourage sufficient investment to meet global oil demand sustainably in the longer term, especially given the financial requirements of key low-cost oil producing economies.

US gas prices dropped by around 20% in 2020 compared to 2019. Henry Hub gas prices were already low in early 2020 due to mild weather. The drop in demand from the second quarter onward as well as significant US LNG shut-ins contributed to prices remaining below $2/mmBtu during the second and third quarters, despite a record consumption in the power sector and the drop in natural gas production. Prices recovered in the fourth quarter due to the seasonal gas demand increase and the strong recovery in US LNG exports. bp's long-term price assumption for US gas reflects the fact that over the coming decades US gas production increases with an increasing proportion of production being used as feedstock to supply expanding LNG exports, while in the longer-term falling gas consumption and declining demand for global LNG exports leads to increasing competitive pressure on US gas production.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Oil and natural gas reserves

In addition to oil and natural gas prices, significant technical and commercial assessments are required to determine the group's estimated oil and natural gas reserves. Reserves estimates are regularly reviewed and updated. Factors such as the availability of geological and engineering data, reservoir performance data, acquisition and divestment activity and drilling of new wells all impact on the determination of the company's estimates of its oil and natural gas reserves. bp bases its reserves estimates on the requirement of reasonable certainty with rigorous technical and commercial assessments based on conventional industry practice and regulatory requirements.

Reserves assumptions for value-in-use tests reflect the reserves and resources that management currently intend to develop. The recoverable amount of oil and gas properties is determined using a combination of inputs including reserves, resources and production volumes. Risk factors may be applied to reserves and resources which do not meet the criteria to be treated as proved.

Sensitivity analyses

A change in revenue from Upstream oil and gas properties can arise either due to changes in oil and natural gas prices, changes in oil and natural gas production, or a combination of the two.

Management tested the impact of a change in revenue cash flows in value-in-use impairment testing arising from changes in price assumptions and/or production volumes up to a combined effect on revenue of 10%.

Revenue reductions of this magnitude in isolation could indicatively lead to a reduction in the carrying amount of the company's Upstream oil and gas properties in the range of $4-5 million, which is approximately 79-99% of the net book value of tangible assets as at 31 December 2020.

Revenue increases of this magnitude in isolation could indicatively lead to an increase in the carrying amount of the company's Upstream oil and gas properties in the range of $4-5 million, which is approximately 79-99% of the net book value of tangible assets as at 31 December 2020. This potential increase in the carrying amount would arise due to reversals of previously recognized impairments.

These sensitivity analyses do not, however, represent management's best estimate of any impairment charges or reversals that might be recognized as they do not fully incorporate consequential changes that may arise, such as changes in costs and business plans and phasing of development. For example, costs across the industry are more likely to decrease as oil and natural gas prices fall. The above sensitivity analyses therefore also do not reflect a linear relationship between revenue and value that can be extrapolated. The interdependency of these inputs and risk factors plus the diverse characteristics of our Upstream oil and gas properties limits the practicability of estimating the probability or extent to which the overall recoverable amount is impacted by changes to the price assumptions or production volumes.

Management also tested the impact of a one percentage point change in the discount rate used for value-in-use impairment testing of Upstream oil and gas properties. If the discount rate was one percentage point higher across the tests performed, the impairment charge recognized in 2020 would have been approximately $0.2 million higher. If the discount rate was one percentage point lower, the impairment charge recognized would have been approximately $0.3 million lower.

Stock

Stocks, other than stocks held for trading purposes, are stated at the lower of cost and net realizable value. Cost is determined by the first-in first-out method and comprises direct purchase costs, cost of production, transportation and manufacturing expenses. Net realizable value is based on estimated selling price less any further costs expected to be incurred to completion and disposal. Net realizable value is determined by reference to prices existing at the balance sheet date, adjusted where the sale of inventories after the reporting period gives evidence about their net realizable value at the end of the period.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Stocks held for short-term trading purposes are stated at fair value less costs to sell and any changes in fair value are recognized in the profit and loss account.

Supplies are valued at the lower of cost on a weighted average basis and net realizable value.

Leases

Agreements that convey the right to control the use of an identified asset for a period of time in exchange for consideration are accounted for as leases. The right to control is conveyed if bp has both the right to obtain substantially all of the economic benefits from, and the right to direct the use of, the identified asset throughout the period of use. An asset is identified if it is explicitly or implicitly specified by the agreement and any substitution rights held by the lessor over the asset are not considered substantive.

Agreements that convey the right to control the use of an intangible asset including rights to explore for or use hydrocarbons are not accounted for as leases. See significant accounting policy: intangible assets.

A lease liability is recognized on the balance sheet on the lease commencement date at the present value of future lease payments over the lease term. The discount rate applied is the rate implicit in the lease if readily determinable, otherwise an incremental borrowing rate is used. The incremental borrowing rate is determined based on factors such as the group's cost of borrowing, lessee legal entity credit risk, currency and lease term. The lease term is the non-cancellable period of a lease together with any periods covered by an extension option that bp is reasonably certain to exercise, or periods covered by a termination option that bp is reasonably certain not to exercise. The future lease payments included in the present value calculation are any fixed payments, payments that vary depending on an index or rate, payments due for the reasonably certain exercise of options and expected residual value guarantee payments.

Payments that vary based on factors other than an index or a rate such as usage, sales volumes or revenues are not included in the present value calculation and are recognized in the income statement. The lease liability is recognized on an amortized cost basis with interest expense recognized in the income statement over the lease term, except where capitalized as exploration, appraisal or development expenditure.

The right-of-use asset is recognized on the balance sheet as property, plant and equipment at a value equivalent to the initial measurement of the lease liability adjusted for lease prepayments, lease incentives, initial direct costs and any restoration obligations. The right-of-use asset is depreciated typically on a straight-line basis, over the lease term. The depreciation charge is recognized in the income statement, except where capitalized as exploration, appraisal or development expenditure. Right-of-use assets are assessed for impairment in line with the accounting policy for impairment of property, plant and equipment, intangible assets, and goodwill.

Agreements may include both lease and non-lease components. Payments for lease and non-lease components are allocated on a relative stand-alone selling price basis.

If the lease term at commencement of the agreement is less than 12 months, a lease liability and right-of-use asset are not recognized, and a lease expense is recognized in the income statement on a straight-line basis.

If a significant event or change in circumstances, within the control of bp, arises that affects the reasonably certain lease term or there are changes to the lease payments, the present value of the lease liability is remeasured using the revised term and payments, with the right-of use asset adjusted by an equivalent amount.

Modifications to a lease agreement beyond the original terms and conditions are accounted for as a re-measurement of the lease liability with a corresponding adjustment to the right-of-use asset. Any gain or loss on modification is recognized in the income statement. Modifications that increase the scope of the lease at a price commensurate with the stand-alone selling price are accounted for as a separate new lease.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

The company recognizes the full lease liability, rather than its working interest share, for leases entered into on behalf of a joint operation if the company has the primary responsibility for making the lease payments. In such cases, the company's working interest share of the right-of-use asset is recognized if it is jointly controlled by the company and the other joint operators, and a receivable is recognized for the share of the asset transferred to the other joint operators. If the company is a non-operator, a payable to the operator is recognized if they have the primary responsibility for making the lease payments and the company has joint control over the right-of-use asset, otherwise no balances are recognized.

Financial assets

Financial assets are recognized initially at fair value, normally being the transaction price. In the case of financial assets not at fair value through profit or loss, directly attributable transaction costs are also included. The subsequent measurement of financial assets depends on their classification, as set out below. The company derecognizes financial assets when the contractual rights to the cash flows expire or the rights to receive cash flows have been transferred to a third party along with either substantially all of the risks and rewards or control of the asset. This includes the derecognition of receivables for which discounting arrangements are entered into.

The company classifies its financial assets as measured at amortized cost or fair value through profit or loss. The classification depends on the business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

Financial assets measured at amortized cost
Financial assets are classified as measured at amortized cost when they are held in a business model the objective of which is to collect contractual cash flows and the contractual cash flows represent solely payments of principal and interest. Such assets are carried at amortised cost using the effective interest method if the time value of money is significant. Gains and losses are recognised in the profit and loss account when the loans and receivables are derecognised or impaired, as well as through the amortisation process. This category of financial assets includes trade and other receivables.

Financial assets measured at fair value through profit or loss
Financial assets are classified as measured at fair value through profit or loss when the asset does not meet the criteria to be measured at amortized cost. Such assets are carried on the balance sheet at fair value with gains or losses recognized in the profit and loss account. Derivatives, other than those designated as effective hedging instruments, are included in this category.

Impairment of financial assets measured at amortized cost
The company assesses on a forward-looking basis the expected credit losses associated with financial assets classified as measured at amortized cost at each balance sheet date. Expected credit losses are measured based on the maximum contractual period over which the company is exposed to credit risk. As lifetime expected credit losses are recognized for trade receivables and the tenor of substantially all other in-scope financial assets is less than 12 months there is no significant difference between the measurement of 12-month and lifetime expected credit losses for the company. The measurement of expected credit losses is a function of the probability of default, loss given default and exposure at default. The expected credit loss is estimated as the difference between the asset's carrying amount and the present value of the future cash flows the company expects to receive, discounted at the financial asset's original effective interest rate. The carrying amount of the asset is adjusted, with the amount of the impairment gain or loss recognized in the profit and loss account.

A financial asset or group of financial assets classified as measured at amortized cost is considered to be credit-impaired if there is reasonable and supportable evidence that one or more events that have a detrimental impact on the estimated future cash flows of the financial asset (or group of financial assets) have occurred. Financial assets are written off where the company has no reasonable expectation of recovering amounts due.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Financial liabilities

The measurement of financial liabilities is as follows:

Financial liabilities measured at fair value through profit or loss
Financial liabilities that meet the definition of held for trading are classified as measured at fair value through profit or loss. Such liabilities are carried on the balance sheet at fair value with gains or losses recognized in the profit and loss account. Derivatives, other than those designated as effective hedging instruments, are included in this category.

Financial liabilities measured at amortized cost
Financial liabilities are initially recognized at fair value, net of directly attributable transaction costs. For interest-bearing loans and borrowings this is typically equivalent to the fair value of the proceeds received net of issue costs associated with the borrowing.

After initial recognition, these financial liabilities are subsequently measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any issue costs, and any discount or premium on settlement. Gains and losses arising on the repurchase, settlement or cancellation of liabilities are recognized in interest receivable and similar income and interest payable and similar expenses respectively. This category of financial liabilities includes trade and other payables and finance debt.

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The company categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement. Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Level 2 inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability. Level 3 inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or bp's assumptions about pricing by market participants.

Offsetting of financial assets and liabilities

Financial assets and liabilities are presented gross in the balance sheet unless both of the following criteria are met: the company currently has a legally enforceable right to set off the recognized amounts; and the company intends to either settle on a net basis or realize the asset and settle the liability simultaneously. If both of the criteria are met, the amounts are set off and presented net. A right of set off is the company's legal right to settle an amount payable to a creditor by applying against it an amount receivable from the same counterparty. The relevant legal jurisdiction and laws applicable to the relationships between the parties are considered when assessing whether a current legally enforceable right to set off exists.

Provisions and contingent liabilities

Provisions are recognized when the company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where appropriate, the future cash flow estimates are adjusted to reflect the risks specific to the liability.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax risk-free rate that reflects current market assessments of the time value of money. Where discounting is used, the increase in the provision due to the passage of time is recognized in the profit and loss account. Provisions are discounted using a nominal discount rate of 2.5% (2019 2.5%).

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Contingent liabilities are possible obligations whose existence will only be confirmed by future events not wholly within the control of the company, or present obligations where it is not probable that an outflow of resources will be required, or the amount of the obligation cannot be measured with sufficient reliability. Contingent liabilities are not recognized in the financial statements but are disclosed unless the possibility of an outflow of economic resources is considered remote.

Decommissioning

Liabilities for decommissioning costs are recognized when the company has an obligation to plug and abandon a well, dismantle and remove a facility or an item of plant and to restore the site on which it is located, and when a reliable estimate of that liability can be made. Where an obligation exists for a new facility or item of plant, such as oil and natural gas production or transportation facilities, this liability will be recognized on construction or installation. Similarly, where obligation exists for a well, this liability is recognized when it is drilled. An obligation for decommissioning may also crystallise during the period of operation of a well, facility or item of plant through a change in legislation or through a decision to terminate operations; an obligation may also arise in cases where an asset has been sold but the subsequent owner is no longer able to fulfil its decommissioning obligations, for example due to bankruptcy. The amount recognized is the present value of the estimated future expenditure determined in accordance with the local conditions and requirements. The provision for the costs of decommissioning wells, production facilities and pipelines at the end of their economic lives is estimated using existing technology, at future prices, depending on the expected timing of the activity, and discounted using the nominal discount rate.

An amount equivalent to the decommissioning provision is recognized as part of the corresponding intangible asset (in the case of an exploration or appraisal well) or property, plant and equipment. The decommissioning portion of the property, plant and equipment is subsequently depreciated at the same rate as the rest of the asset.

Other than the unwinding of discount on or utilisation of the provision, any change in the present value of the estimated expenditure is reflected as an adjustment to the provision and the corresponding asset where that asset is generating or is expected to generate future economic benefits.

Significant judgements and estimates: provisions

The company holds provisions for the future decommissioning of oil and natural gas production facilities and pipelines at the end of their economic lives. The largest decommissioning obligations facing the company relate to the plugging and abandonment of wells and the removal and disposal of oil and natural gas platforms and pipelines. Most of these decommissioning events are many years in the future and the precise requirements that will have to be met when the removal event occurs are uncertain. Decommissioning technologies and costs are constantly changing, as well as political, environmental, safety and public expectations. The timing and amounts of future cash flows are subject to significant uncertainty and estimation if required in determining the amounts of provisions to be recognized. Any changes in the expected future costs are reflected in both the provision and the asset.

If oil and natural gas production facilities and pipelines are sold to third parties, judgement is required to assess whether the new owner will be unable to meet their decommissioning obligations, whether the company would then be responsible for decommissioning, and if so the extent of that responsibility. The company has assessed that no material decommissioning provisions should be recognized as at 31 December 2020 (2019 no material provisions) for assets sold to third parties where the sale transferred the decommissioning obligation to the new owner.

Further information about the company's provisions is provided in Note 17. Changes in assumptions in relation to the company's provisions could result in a material change in their carrying amounts within the next financial year. A 0.5 percentage point change in the nominal discount rate could have an impact of approximately $1.3 million (2019 $1.8 million) on the value of the company's provisions.

The discounting impact on the company's Upstream decommissioning provisions of a two-year change in the timing of expected future decommissioning expenditures would not be material. Management currently does not consider a change of greater than two years to be reasonably possible in the next financial year.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

If all expected future decommissioning expenditures were 10% higher, the company's Upstream decommissioning provisions would increase by approximately $3.3 million and a pre-tax charge of approximately $0.1 million would be recognized.

The bp group is subject to claims and actions for which no provisions have been recognized. The facts and circumstances relating to particular cases are evaluated regularly in determining whether a provision relating to a specific litigation should be recognized or revised. Accordingly, significant management judgement relating to provisions and contingent liabilities is required, since the outcome of litigation is difficult to predict.

Taxation

Income tax expense represents the sum of current tax and deferred tax.

Income tax is recognized in the profit and loss account, except to the extent that it relates to items recognized in other comprehensive income or directly in equity, in which case the related tax is recognized in other comprehensive income or directly in equity.

Current tax is based on the taxable profit for the period. Taxable profit differs from net profit as reported in the profit and loss account because it is determined in accordance with the rules established by the applicable taxation authorities. It therefore excludes items of income or expense that are taxable or deductible in other periods as well as items that are never taxable or deductible. The company's liability for current tax is calculated using tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is provided, using the balance sheet method, on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax liabilities are recognized for all taxable temporary differences except:

- Where the deferred tax liability arises on the initial recognition of goodwill;
- Where the deferred tax liability arises on the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither accounting profit nor taxable profit or loss; or
- In respect of taxable temporary differences associated with investments in subsidiaries and associates and interests in joint arrangements, where the company is able to control the timing of the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for deductible temporary differences, carry-forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilized. An exception is where the deferred tax asset relates to the deductible temporary difference arising from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither accounting profit nor taxable profit or loss.

In respect of deductible temporary differences associated with investments in subsidiaries and associates and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable or increased to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date. Deferred tax assets and liabilities are not discounted.

Deferred tax assets and liabilities are offset only when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the current tax assets and liabilities on a net basis or to realize the assets and settle the liabilities simultaneously.

Where tax treatments are uncertain, if it is considered probable that a taxation authority will accept the company's proposed tax treatment, income taxes are recognized consistent with the company's income tax filings. If it is not considered probable, the uncertainty is reflected within the carrying amount of the applicable tax asset or liability using either the most likely amount or an expected value, depending on which method better predicts the resolution of the uncertainty.

Judgement is required when determining whether a particular tax is an income tax or another type of tax (for example a production tax). Accounting for deferred tax is applied to income taxes as described above, but is not applied to other types of taxes; rather such taxes are recognized in the profit and loss account in accordance with the applicable accounting policy such as Provisions and contingent liabilities.

Customs duties and sales taxes

Customs duties and sales taxes that are passed on or charged to customers are excluded from turnover and expenses. Assets and liabilities are recognized net of the amount of customs duties or sales tax except:

- Customs duties or sales taxes incurred on the purchase of goods and services which are not recoverable from the taxation authority are recognized as part of the cost of acquisition of the asset.
- Receivables and payables are stated with the amount of customs duty or sales tax included.

The net amount of sales tax recoverable from, or payable to, the taxation authority is included within receivables or payables in the balance sheet.

Turnover

Revenue from contracts with customers is recognized when or as the company satisfies a performance obligation by transferring control of a promised good or service to a customer. The transfer of control of oil and natural gas usually coincides with title passing to the customer and the customer taking physical possession. The company principally satisfies its performance obligations at a point in time; the amounts of revenue recognized relating to performance obligations satisfied over time are not significant.

When, or as, a performance obligation is satisfied, the company recognizes as revenue the amount of the transaction price that is allocated to that performance obligation. The transaction price is the amount of consideration to which the company expects to be entitled. The transaction price is allocated to the performance obligations in the contract based on standalone selling prices of the goods or services promised.

Contracts for the sale of commodities are typically priced by reference to quoted prices. Revenue from term commodity contracts is recognized based on the contractual pricing provisions for each delivery. Certain of these contracts have pricing terms based on prices at a point in time after delivery has been made. Revenue from such contracts is initially recognized based on relevant prices at the time of delivery and subsequently adjusted as appropriate. All revenue from these contracts, both that recognized at the time of delivery and that from post-delivery price adjustments, is disclosed as revenue from contracts with customers.

Where the company acts as agent on behalf of a third party to procure or market energy commodities, any associated fee income is recognized but no purchase or sale is recorded.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Revenue associated with the sale of oil and natural gas is included on a net basis in turnover.

Interest income

Interest income is recognized as the interest accrues using the effective interest rate – that is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

Research costs

Research costs are expensed as incurred.

Finance costs

Finance costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the cost of those assets until such time as the assets are substantially ready for their intended use. All other finance costs are recognized in the profit and loss account in the period in which they are incurred.

Updates to significant accounting policies

Impact of new International Financial Reporting Standards
The adoption of 'Interest Rate Benchmark Reform – Phase I – Amendments to IFRS 9 'Financial instruments' and IFRS 7 'Financial instruments: Disclosures' has had no material impact on the company's financial statements.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

3. Turnover

Revenue from contracts with customers, which is stated net of value added tax, represents amounts where the performance obligation of a contract has been met with third parties and group companies.

An analysis of the company's turnover is as follows:

	2020	2019
	$000	$000
Revenue from contracts with customers	9,030	12,794
	9,030	12,794
Other operating income	—	867
Interest receivable and similar income (Note 6)	475	2,588
	9,505	16,249

The country of origin is the UK geographic area and destination is the UK and North-West Europe geographic areas.

Turnover is attributable to one continuing activity, the production and sale of hydrocarbon products. Turnover is recognised at the performance obligation of delivery to the end buyer, being the point risk and reward has transferred in accordance with the sales contract.

The reduction in turnover was mainly due to lower average oil price. Oil and gas production increased to 220 mboe during 2020 from 182 mboe in 2019. The average realised price for oil was $41.82/bbl in 2020, while in 2019 it was $71.89/bbl.

4. Operating (loss) / profit

This is stated after (crediting) / charging:

	2020	2019
	$000	$000
Net foreign exchange losses	181	46
Research and development costs expensed	36	14
Depreciation of tangible assets	5,146	3,498
Depreciation of right-of-use assets	840	842
Impairment of tangible assets[a]	14,003	—
Impairment of right-of-use assets[a]	3,052	—

[a] Please refer Note 11 for further details.

5. Auditor's remuneration

	2020	2019
	$000	$000
Fees for the audit of the company	15	6

Fees paid to the company's auditor, Deloitte LLP and its associates for services other than the statutory audit of the company are not disclosed in these financial statements since the consolidated financial statements of BP Amoco Exploration (Faroes) Limited's ultimate parent, BP p.l.c., are required to disclose non-audit fees on a consolidated basis.

The fees were borne by another group company.

6. Interest receivable and similar income

	2020	2019
	$000	$000
Interest income from amounts owed by group undertakings	474	2,588
Other interest income	1	—
Total interest receivable and similar income	475	2,588

Decrease of $2.1 million was due to interest received on the Company's Internal Finance Account (IFA). It has decreased due to lower average interest rates (2020: 0.4%, 2019: 2.1%) during 2020.

7. Interest payable and similar expenses

	2020	2019
	$000	$000
Interest expense on:		
Lease liabilities	52	224
Total interest expense	52	224
Unwinding of discount on provisions - Note 17	977	1,032
Total interest payable and similar charges	1,029	1,256

8. Taxation

The company is a member of a group for the purposes of relief within Part 5, Corporation Tax Act 2010.

The taxation credit in the profit and loss account is made up as follows:

	2020	2019
Current tax	$000	$000
UK corporation tax on (expense) / income for the year	(1,918)	
UK tax underprovided / (overprovided) in prior years	1,964	(860)
Total current tax credited	46	(860)
Deferred tax		
Origination and reversal of temporary differences	(8,150)	(2,883)
Adjustments in prior year temporary differences	403	(103)
Total deferred tax credited	(7,747)	(2,986)
Tax credited on (loss) / profit	(7,701)	(3,846)

(a) Reconciliation of the effective tax rate

The tax assessed on the loss for the year is higher (2019: lower) than the standard rate of corporation tax in the UK of 19% for the year ended 31 December 2020 (2019: 19%). The differences are reconciled below:

	2020	2019
	$000	$000
(Loss) / profit before taxation	(27,316)	3,724
Tax credit	(7,701)	(3,846)
Effective tax rate	28 %	(103)%

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

	2020	2019
	%	%
UK statutory corporation tax rate:	19	19
Increase / (decrease) resulting from:		
Non-taxable income	1	—
Free group relief	(2)	(40)
Amounts provided for settlement of HRCP liabilities	—	(34)
UK Supplementary tax at 10% on North Sea profits	9	(11)
Ring Fence Tax rate differences	10	(12)
Adjustments to tax charge in respect of previous years	(9)	(25)
Effective tax rate	28	(103)

Change in corporation tax rate

A UK corporation rate of 19% (effective 1 April 2020) was substantively enacted on 17 March 2020, reversing the previously enacted reduction in the rate from 19% to 17%. Deferred tax assets at 31 December 2020 have been calculated at 19% (2019: 17%).

In the 3 March 2021 Budget it was announced that the UK tax rate will increase to 25% from 1 April 2023. This will have a consequential effect on the company's future tax charge.

The above changes to the rate of UK corporation tax do not apply to profits arising from the company's oil and gas exploration and extraction operations in the UK and the UK Continental shelf (the Ring Fence trade), where the rate of UK corporation tax remains 30%, and the supplementary tax charge remains 10%. Deferred tax on assets arising in the Ring Fence trade continue to be provided for at the combined rate of 40%.

(b) Provision for deferred tax

The deferred tax included in the profit and loss account and balance sheet is as follows:

	Profit and loss account		Balance sheet	
Deferred tax asset	2020	2019	2020	2019
	$000	$000	$000	$000
Decommissioning and other provisions	2,692	(1,246)	13,540	16,232
Tax losses carried forward	142	(110)	—	142
Other deductible temporary differences	262	(262)	—	262
Net charge / (credit) for deferred tax assets	3,096	(1,618)	13,540	16,636

	Profit and loss account		Balance sheet	
Deferred tax liability	2020	2019	2020	2019
	$000	$000	$000	$000
Accelerated capital allowances	(10,843)	(368)	(1,679)	(12,522)
Other taxable temporary differences	—	(1,000)	—	—
Net credit for deferred tax liabilities	(10,843)	(1,368)	(1,679)	(12,522)
Net deferred tax charge / (credit) and net deferred tax asset	(7,747)	(2,986)	11,861	4,114

DTT

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Analysis of movements during the year:

	2020
	$000
At 1 January 2020	4,114
Deferred tax credit in the profit and loss account	7,747
At 31 December 2020	11,861

9. Directors and employees

(a) Remuneration of directors

None of the directors received any fees or remuneration for qualifying services as a director of the company during the financial year (2019: $Nil).

(b) Employee costs

The company had no employees during the year (2019: None).

10. Intangible assets

	Exploration expenditure
Cost	$000
At 1 January 2020	1,471
At 31 December 2020	1,471

Changes in decommissioning provision (Note 17)	(9,132)
At 31 December 2020	213,928
Depreciation - owned tangible assets	
At 1 January 2020	(190,611)
Charge for the year	(5,146)
Impairment	(14,003)
At 31 December 2020	(209,760)
Owned tangible assets - net book value	
31 December 2020	4,168
Right-of-use assets - net book value	
31 December 2020	908
Total tangible assets net book value	
At 31 December 2020	5,076
Total net book value	
At 31 December 2019	36,348

Depreciation charge for the year on right-of-use assets	
2020	(840)
2019	(842)

Capitalized interest included above is as follows:

	Net book value
Capitalized interest	$000
At 31 December 2020	6
At 31 December 2019	32

During the year the company has recognized impairment charges of $17.1m ($14m connected to owned assets and $3.1m connected to right-of-use assets) relating to producing oil & gas assets. This arose as a result of changes to the group's oil and gas price assumptions and from management's re-assessment of expectations to extract value from certain properties as a result of a review of the group's long-term strategic plan.

Management's best estimate oil and natural gas price assumptions for value-in-use impairment testing were revised downwards during 2020 and the period covered extended to 2050. Management also undertook a re-assessment of expectations to extract value from certain exploration prospects as a result of a review of the bp group's long-term strategic plan. As a result, management performed a review of the carrying value of the company's oil and gas properties to identify potential impairment triggers, in line with the requirements of IAS 36 Impairment of Assets. Potential indicators of impairment were identified, requiring further tests to be

DTT

performed. The cash generating units assessed were considered to be the smallest identifiable group of assets from the company's perspective that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.

A recoverable amount for each CGU was calculated based on the value in use cash flows. The value in use tests used the present value of pre-tax cash flows discounted using a pre-tax rate which varies depending on the country of operation of the underlying assets. The value in use is based on the cash flows expected to be generated by the projected oil or natural gas production profiles up to the expected dates of cessation of production of each producing field, based on current estimates of reserves and resources, appropriately risked.

As the production profile and related cash flows can be estimated from bp's past experience, management believes that the cash flows generated over the estimated life of field is the appropriate basis upon which to assess assets for impairment. The estimated date of cessation of production depends on the interaction of a number of variables, such as the recoverable quantities of hydrocarbons, the production profile of the hydrocarbons, the cost of the development of the infrastructure necessary to recover the hydrocarbons, production costs, the contractual duration of the production concession and the selling price of the hydrocarbons produced. As each producing field has specific reservoir characteristics and economic circumstances, the cash flows of each field are computed using appropriate individual economic models and key assumptions agreed by bp management. Estimated production volumes and cash flows up to the date of cessation of production on a field-by-field basis, including operating and capital expenditure, are derived from the business segment plan. The production profiles used are consistent with the reserve and resource volumes approved as part of bp's centrally controlled process for the estimation of proved and probable reserves and total resources.

The key assumptions used in the value-in-use calculation are oil and natural gas prices, production volumes and the discount rate. Oil and gas price assumptions and discount rate assumptions used were as disclosed in Note 2. Due to economic developments, regulatory change and emissions reduction activity arising from climate concern and other factors, future commodity prices and other assumptions may differ from the forecasts used in the calculations.

These revenue sensitivity analyses do not, however, represent management's best estimate of any impairment charges or reversals that might be recognized as they do not fully incorporate consequential changes that may arise, such as changes in costs and business plans and phasing of development. For example, costs across the industry are more likely to decrease as oil and natural gas prices fall. The above sensitivity analyses therefore do not reflect a linear relationship between revenue and value that can be extrapolated. The interdependency of these inputs and risk factors plus the diverse characteristics of oil and gas properties limits the practicability of estimating the probability or extent to which the overall recoverable amount is impacted by changes to the price assumptions or production volumes.

As a result of this review, the company has recognized total impairment charges of $17.1 million (2019 $nil). Impairments were calculated on a value in use basis, applying a discount rate of 10%. The residual value of the CGU's which have recognized impairment charges during the year was $73 million.

12. Stocks

	2020	2019
	$000	$000
Raw materials and consumables	126	138
Crude oil	578	1,454
	704	1,592

The difference between the carrying value of stocks and their replacement cost is not material.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

13. Debtors

Amounts falling due within one year:

	2020	2019
	$000	$000
Amounts owed from parent undertakings	121,905	123,377
Other debtors	2	135
Prepayments	251	—
	122,158	123,512

Amounts falling due after one year:

	2020	2019
	$000	$000
Joint venture lease receivable	40	—
	40	—
Total debtors	122,198	123,512

The amounts owed from fellow subsidiaries / parent undertakings comprise an Internal Financing Account (IFA) of $121.9m (2019 $123.4m). Interest is accrued on a monthly basis based on LIBOR. The interest rate at year end was 0.004% (2019 1.65%). Whilst IFA balances are legally repayable on demand, in practice they have no termination date.

14. Creditors

Amounts falling due within one year:

	2020	2019
	$000	$000
Trade creditors	145	18
Amounts owed to parent undertakings	3,058	2,644
Amounts owed to fellow subsidiaries	9,609	4,497
Other creditors	238	267
Taxation	2,738	2,692
	15,788	10,118

Amounts owed to parent undertakings and fellow subsidiaries

Increase of $5.5 million against North Sea group companies mainly relates to Britoil Limited on the JV cutback accounts for the Foinaven field, where Britoil is the operator. Additionally, amounts are owed to BP Exploration Operating Company (BPEOC) on North Sea cost allocations accounts as BPEOC is the main operating entity of the region.

Materially all of the company's trade payables have payment terms in the range of 30 to 60 days and give rise to operating cash flows.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

Amounts falling due after one year:

	2020	2019
	$000	$000
Other creditors	564	—
Total creditors	16,352	10,118

15. Lease liabilities

Lease liabilities are analysed as follows:

Within 5 years

	2020	2019
	$000	$000
Not wholly repayable	136	5,749
	136	5,749

The amount of Lease liabilities of $136,240 consists of balance within one year $19,040 and balance more than one year $117,200

16. Leases

The company leases a number of assets as part of its activities. This primarily includes FPSO (floating, production, storage, offtake) and transportation services. The weighted average remaining lease term for the total lease portfolio is less than 5 years. Some leases will have payments that vary with market interest or inflation rates.

	2020	2019
	$000	$000
Expense for variable payments not included in the lease liability	—	708
Additions to right-of-use assets in the period	(208)	—
Total cash outflow for amounts included in lease liabilities[b]	4,835	1,115

[b] The cash outflows for amounts not included in lease liabilities approximate the income statement expense disclosed above.

An analysis of right-of-use assets and depreciation is provided in Note 11. An analysis of lease interest expense is provided in Note 7.

At 31 December 2020	33,849	33,849
At 31 December 2020		
Current	708	708
Non-current	33,141	33,141
	33,849	33,849
At 31 December 2019		
Current	406	406
Non-current	40,176	40,176
	40,582	40,582

For information on significant judgements and estimates made in relation to provisions, see Provisions within Note 2.

[a] The total balance contains the $9,132,150 decrease in decommissioning movement connected to owned assets and the $1,449,642 increase in decommissioning movement relates to right-of-use assets.

18. Called up share capital

	2020	2019
	$000	$000
Issued and fully paid:		
37,346,259 Ordinary shares of £1 each for a total nominal value of £37,346,259	60,192	60,192

19. Reserves

Called up share capital
The balance on the called up share capital account represents the aggregate nominal value of all ordinary shares in issue.

Profit and loss account
The balance held on this reserve is the retained profits of the company.

DocuSign Envelope ID: 8E3932CE-6679-4573-8B26-CA99F37CEB87

20. Capital commitments

Authorized and contracted future capital expenditure (excluding right-of-use assets) by the company for which contracts had been placed but not provided in the financial statements at 31 December 2020 is estimated at $1,580,733 (2019: $326,389).

21. Related party transactions

The company has taken advantage of the exemption contained within paragraphs 8(k) and (j) of FRS 101, and has not disclosed transactions entered into with wholly-owned group companies or key management personnel. There were no other related party transactions in the year.

22. Post balance sheet events

On 16 April 2021 bp announced it suspended production from the Foinaven fields west of Shetland as it began preparations to remove the Petrojarl Foinaven floating production, storage and offloading (FPSO) vessel from operation. The FPSO, which has been in the Foinaven area since 1996, was approaching the end of its 25-year design life. Work had been under way to consider options to extend the life of the vessel, but due to its age and demanding environment, it was determined that the FPSO was not the right option to recover the fields' remaining resources. bp is now assessing other options to recover the remaining reserves of up to 200 million barrels of oil at the Foinaven fields in a more efficient and sustainable way. bp plans to take the FPSO unit off station and hand it back to vessel owner Teekay Corporation in 2022. Consequently, a fixed asset impairment of $105 million was recognized in the group accounts for the Foinaven fields CGU in the first half year of 2021 out of which $7.3 million is allocated for BP Amoco Exploration (Faroes) Limited. Since these circumstances only arose subsequent to 31 December 2020, this impairment will be reflected in the financial statements of BP Amoco Exploration (Faroes) Limited for the year ending 31 December 2021.

23. Immediate and ultimate controlling parent undertaking

The immediate parent undertaking is BP Exploration Operating Company Limited, a company registered in England and Wales. The ultimate controlling parent undertaking is BP p.l.c., a company registered in England and Wales, which is the parent undertaking of the smallest and largest group to consolidate these financial statements. Copies of the consolidated financial statements of BP p.l.c. can be obtained from its registered address: 1 St James's Square, London, SW1Y 4PD.
