1 Principal accounting policies

Accounting convention

The financial statements have been prepared in accordance with applicable Accounting Standards under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective March 2002).

Research and development

Research and development expenditure is charged to profits in the period in which it is incurred.

Cash flow statement

In the opinion of the directors the company qualifies as a small company and accordingly a cash flow statement is not prepared.

Turnover

Turnover represents the total amount receivable by the company for goods supplied and services provided, together with relevant subsidies, exclusive of value added tax.

Arable area payment scheme

Monies received and receivable from the Department for Environment, Food and Rural Affairs in respect of the above scheme have been treated as a subsidy on sales. Where the whole of the relevant crop has been sold the whole of the related subsidy has been included in sales. Where only part or none of the crop has been sold the subsidy has been appropriately apportioned.

Depreciation

Depreciation is calculated to write down the cost, less estimated residual value, of all tangible fixed assets over their expected useful lives. The rates generally applicable are:

Plant and machinery	20% reducing balance
Motor vehicles	25% reducing balance

Stocks

Stocks are estimated by the directors and are valued at the lower of cost, determined on a first in, first out basis, and net realisable value. Cost, in the case of products manufactured by the company, comprises direct materials and labour costs together with appropriate factory overheads.

The valuation of farming stocks and tenantry has been prepared and certified by a qualified valuer at the lower of actual cost of production and net realisable value.

Deferred taxation

Deferred taxation is recognised in respect of all timing differences that have originated, but not reversed by the balance sheet date. Deferred taxation is provided at average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse.
