1 Accounting policies

Basis of accounting

The financial statements have been prepared under the historical cost convention, and in accordance with applicable accounting standards

Going concern

During the previous year the directors took the decision to cease trading once existing jobs have been completed and, as a result, the financial statements have been prepared on a break up basis, as opposed to the going concern basis

Cash flow statement

The directors have taken advantage of the exemption in Financial Reporting Standard 1 (Revised 1996) from including a cash flow statement in the financial statements on the grounds that the company is wholly owned and its parent publishes a consolidated cash flow statement

Operating leases

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged against profits on a straight line basis over the period of the lease

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date, where transactions or events that result in an obligation to pay more or a right to pay less tax in the future have occurred by the balance sheet date with certain limited exceptions

Deferred tax is calculated on an undiscounted basis at the tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities

Contract work in progress

In accordance with SSAP9, amounts recoverable on contracts, which are included in debtors, are stated at cost less progress payments receivable plus an appropriate amount of profit in the case of long term contracts

Provisions are made for contingencies and losses incurred or anticipated in bringing contracts to completion

For contracts where progress payments exceed the book value of work done, the excess is included in creditors as payments on account
