Notes to the Abbreviated Accounts
for the Year Ended 30 June 2012

1. **ACCOUNTING POLICIES**

Accounting convention

The financial statements have been prepared under the historical cost convention as modified by the revaluation of certain assets and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover represents rents received from holiday lets.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Office equipment	- 15% on reducing balance
Fixtures and fittings	- 15% on reducing balance
Computer equipment	- 33% on cost

Investment property

In accordance with the FRSSE, investment properties are stated at open market values. No depreciation is provided, which is a departure from the Companies Act 2006, but is required to provide a true and fair view. The directors undertake an annual review of valuations and seek independent professional valuations once every 5 years. No provision is made for potential tax arising from revaluation of investment properties as they represent unrealised gains.

Deferred tax

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. Deferred tax is recognised in respect of all timing differences that have originated but not reversed by the balance sheet date. Deferred tax assets are only recognised where it is considered more likely than not that future profits will be available for offset. Deferred tax is measured on a non-discounted basis at the average tax rates that would apply in the periods in which the timing differences are expected to reverse, based on the tax rates and laws that have been enacted by the balance sheet date.

Foreign currencies

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of transaction. Exchange differences are taken into account in arriving at the operating result.
