NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31ST JANUARY, 1995

1. Accounting policies

The principal accounting policies have remained unchanged from the previous year and are set out below.

a) Basis of preparation of financial statements

The financial statements have been prepared under the historical cost convention.

b) Turnover

Turnover is the amount receivable by the company in the ordinary course of business for goods supplied as a principal and for services provided.

c) Depreciation

Depreciation is calculated to write down the cost or valuation of fixed assets by equal annual instalments over their expected useful lives.

The rates generally applicable are:

Fixtures and fittings	10%
Motor vehicles	25%

d) Stock

Stock is stated at the lower of cost and net realisable value.

e) Deferred taxation

Deferred taxation is the taxation attributable to timing differences between profits computed for taxation purposes and profits as stated in these accounts.

The provision is made for deferred taxation calculated on the liability method at the appropriate rates of corporation tax at which the differences are expected to reverse.

f) Finance leases and hire purchase contracts.

Assets acquired under finance leases and hire purchase contracts are treated as fixed assets. The amount capitalised is the present value of the minimum lease payments payable during the lease term. Depreciation is charged to the profit and loss account in accordance with the normal depreciation policy over the shorter of the lease term and the useful life of the assets.

The corresponding lease commitments are shown as liabilities. The interest element of rental obligation is charged to the profit and loss account over the period of the lease on a straight line basis.

Rentals payable under operating leases are charged to the profit and loss account over the period of the lease on a straight line basis.
