Liftspot Limited

Notes to the Abbreviated Accounts for the Year Ended 31 March 2011

1 Accounting policies

Basis of preparation

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

Turnover

Turnover represents amounts chargeable, net of value added tax, in respect of the sale of goods and services to customers

Depreciation

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation, less any estimated residual value, over their expected useful economic life as follows

Asset class	Depreciation method and rate
Plant and machinery	25% reducing balance
Land and buildings	2% straight line

Hire purchase and leasing

Assets held under finance leases, which are leases where substantially all the risks and rewards of ownership of the asset have passed to the company, are capitalised in the balance sheet as tangible fixed assets and are depreciated over the shorter of the lease term and their useful lives. The capital elements of future obligations under the leases are included as liabilities in the balance sheet. The interest element of the rental obligation is charged to the profit and loss account over the period of the lease and represents a constant proportion of the balance of capital repayments outstanding. Assets held under hire purchase agreements are capitalised as tangible fixed assets and are depreciated over the shorter of the lease term and their useful lives. The capital element of future finance payments is included within creditors. Finance charges are allocated to accounting periods over the length of the contract and represent a constant proportion of the balance of capital repayments outstanding.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities. Where shares are issued, any component that creates a financial liability of the company is presented as a liability in the balance sheet. The corresponding dividends relating to the liability component are charged as interest expense in the profit and loss account.
