Celab Power Management Limited

Directors' report for the year ended 31 March 2010

The directors present their report and the audited financial statements of the company for the year ended 31 March 2010

Principal activity

The principal activity is that of a holding company of Murata Power Solutions (Celab) Limited, a company which designs, manufactures and markets electronic power supply equipment

Review of business and future developments

The profit and loss account for the year is set out on page 7

The company's subsidiary company, Murata Power Solutions (Celab) Limited starts the new financial year with a strong order book with significant further orders anticipated over the next 12 month period. The Cable TV market is anticipated to reflect the level of business seen in the previous financial period with a possible 'upside' swing in orders later in the year following recent investment in the product line.

The significant order book relates mainly to future airborne, naval and land defence system contracts. These multi-period contracts are underpinned by firm future orders. In a number of cases, customers both request and fund stocking policies to protect against future component obsolescence.

This year we anticipate the placement of sizeable repeat orders for defence systems further extending the order backlog into later years. In addition we anticipate further new engineering contracts from the defence sector whilst continuing to invest in new and upgraded Cable TV products.

Key performance indicators ("KPIs")

Given the fact that the company is non-trading, the company directors do not use KPIs to manage the business and do not consider them necessary for an understanding of the development, performance or position of the business.

Principal risks and uncertainties

As a supplier to the defence industry the future business of Murata Power Solutions (Celab) Limited can be positively or negatively affected by future political decisions. The company is however a key supplier to most of the major defence subcontractors and feels well placed to compete on future contracts.

Dividends

No dividend was paid during the year ended 31 March 2010 (2009 – £nil)

Financial Risk Management

Since the company is a non-trading intermediate holding company the following statements refer to its subsidiary, Murata Power Solutions (Celab) Limited

The company is exposed to potential component price risk, however since for many of our projects we receive payments in advance from customers to procure certain materials in order to safeguard against future obsolescence or unavailability, we feel that our exposure is minimised

With regard to credit risk, since our customers are almost exclusively large defence contractors the board are satisfied that our level of exposure is well within acceptable limits

The company has no debt and therefore has no exposure in this area
