PRINCIPAL ACCOUNTING POLICIES

Basis of Preparation

The financial statements have been prepared under the historical cost convention.

The principal accounting policies have remained unchanged from the previous year and are set out below.

Turnover

Turnover is the total amount receivable for goods supplied and services provided excluding VAT and trade discounts.

Depreciation

Depreciation is calculated to write down the cost of all tangible fixed assets by the reducing balance method over their expected useful lives. The rates generally applicable are:

Fixtures and fittings	-	15%
Motor vehicles	-	25%

Deferred Taxation

Deferred tax is provided for using the tax rates estimated to arise when the timing differences reverse and is accounted for to the extent that it is probable that a liability or asset will crystallise. Unprovided deferred tax is disclosed as a contingent liability.

Leased Assets

Assets held under finance leases and hire purchase contracts are capitalised in the balance sheet and depreciated over their expected useful lives. The interest element of leasing payments represents a constant proportion of the capital balance outstanding and is charged to the profit and loss account over the period of the lease.

All other leases are regarded as operating leases and the payments made under them are charged to the profit and loss account on a straight line basis over the lease term.
