NOTES TO THE ABBREVIATED FINANCIAL STATEMENTS
FOR THE ENDED 31ST OCTOBER 2005

1. ACCOUNTING POLICIES

(a) *Accounting basis and standards*

The financial statements have been prepared under the historical cost convention, modified to include the revaluation of freehold property.

(b) *Depreciation*

Depreciation on fixed assets is provided at rates estimated to write off the cost or revalued amounts, less estimated residual value, of each asset over its expected useful life as follows:-

Equipment	25% reducing balance
Fixtures and fittings	15% reducing balance
Motor vehicles	25% reducing balance

(c) *Stocks*

Stocks are stated at the lower of cost and net realisable value. Cost includes all direct costs incurred in bringing the stocks to their present location and condition, including where appropriate, a proportion of manufacturing overheads.

(d) *Turnover*

Turnover represents the invoiced value of services provided net of value added tax.

(e) *Deferred taxation*

Deferred taxation is accounted for under the liability method in respect of the taxation effects of all timing differences which are expected to reverse in the future, calculated at the rate at which it is estimated that tax will be payable.

(f) *Foreign currencies*

Transactions denominated in foreign currencies are translated into Sterling at the rate of exchange ruling at the date of the transaction. Assets and liabilities in foreign currencies are translated into Sterling at rates of exchange ruling at the end of the financial year. All exchange differences are dealt with in the profit and loss account.

(g) *Research and development*

Research and development expenditure is written off in the year in which it is incurred.

(h) *Leasing and hire purchase commitments*

Assets held under finance leases and hire purchase contracts are capitalised in the balance sheet and are depreciated over their useful lives.

The interest element of the rental obligations is charged to profit and loss account over the period of the lease (and represents a constant proportion of the balance of capital repayments outstanding).

(i) *Pension scheme arrangements*

The pension scheme of the company is funded by contributions partly from the employees and partly from the company at rates determined by independent actuaries in the light of regular valuations. Such contributions are held in trustee-administered funds completely independently of the company's finances. The contributions made by the company are charged against profits on an accruals basis.
