NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31ST JANUARY, 1995

1. Accounting Policies

The accounts of the company are prepared under the historical cost convention. The principle accounting policies adopted are set out below:

Depreciation of tangible fixed assets

Depreciation is provided at the following annual rates on a reducing balance basis to write off the cost less the estimated residual value of the assets over their expected useful economic lives:

Warehouse equipment	25%
---------------------	-----

Deferred taxation

Provision is made for deferred taxation to take account of timing differences between the treatment of items for accounts purposes and for tax purposes to the extent that it is probable that a liability for tax will crystallise.

The provision is computed under the liability method and is stated at the rate of corporation tax expected to apply when the tax becomes payable.

Turnover

Turnover represents net invoiced sales of goods, excluding value added tax and relates to customers all of whom are in the United Kingdom.

Leasing and Hire Purchase Commitments.

Assets held under hire purchase contracts are capitalised in the balance sheet and are depreciated over their useful lives. The interest element of the rental obligations is charged to the Profit and Loss Account over the period of the lease and represents a constant proportion of the balance of capital repayments outstanding.

Rentals paid under operating leases are charged to income on a straight line basis over the term of the lease.
