Notes forming part of the financial statements for the year ended 30 June 2003

1 Accounting policies

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of land and buildings, and are in accordance with applicable accounting standards. The following principal accounting policies have been applied:

Investment properties

Investment properties are valued at open market value. Any surplus or deficit arising from such revaluation is transferred to the revaluation reserve except where a deficit is deemed to represent a permanent diminution in value, in which case it is charged to the profit and loss account.

No provision has been made for depreciation on these properties. The directors consider that this accounting policy, which represents a departure from the Companies Act 1985, is necessary to provide a true and fair view.

Net rental income

Net rental income represents gross rental income net of property expenses. Net rental income is wholly attributable to the principal activity of the company and arises solely in the United Kingdom.

Deferred taxation

Deferred tax balances are recognised in respect of all timing differences that have originated but not reversed by the balance sheet date except that:

- deferred tax is not recognised on timing differences arising on revalued properties unless the company has entered into a binding sale agreement and is not proposing to take advantage of rollover relief; and
- the recognition of deferred tax assets is limited to the extent that the company anticipates to make sufficient taxable profits in the future to absorb the reversal of the underlying timing differences.

Deferred tax balances arising from underlying timing differences in respect of tax allowances on industrial buildings are reversed if and when all conditions for retaining those allowances have been met.

Deferred tax balances are not discounted.
