Cooper Consultancy Ltd
Notes to the Abbreviated Accounts
for the year ended 30 June 2011

1 Accounting policies

Basis of preparation

The accounts have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

Turnover

Turnover represents amounts chargeable to clients for the provision of professional services that have been provided during the year. These amounts include direct recoverable expenses incurred but exclude VAT. The company recognises income at the point where it obtains the right to consideration. Amounts unbilled at the year end are included within trade debtors.

The excess of the right to consideration over invoiced amounts is shown within other creditors.

Depreciation

Depreciation has been provided at the following rates in order to write off the assets over their estimated useful lives:

Plant and machinery	25% reducing balance
---------------------	----------------------

Deferred taxation

Full provision is made for deferred taxation resulting from timing differences between the recognition of gains and losses in the accounts and their recognition for tax purposes. Deferred taxation is calculated on an un-discounted basis at the tax rates which are expected to apply in the periods when the timing differences will reverse.
