ARBORTRACK SYSTEMS LIMITED

NOTES TO THE ABBREVIATED ACCOUNTS

FOR THE YEAR ENDED 30TH JUNE 2006

1 ACCOUNTING POLICIES

The Company's accounting policies are as follows -

(a) BASIS OF ACCOUNTING

The accounts are prepared under the historical cost convention and include the results of the Company's operations which are described in the Directors' Report and all of which are continuing

The Company has taken advantage of the exemption in Financial Reporting Standard No 1 from the requirement to produce a cash flow statement on the grounds that it is a small company

(b) TURNOVER

Turnover is the total amount (excluding VAT) receivable by the Company in the ordinary course of business for goods supplied and services rendered

(c) DEPRECIATION

Depreciation is calculated on a straight line basis and is intended to write down the cost of fixed assets to their estimated residual values over their expected useful lives

(d) STOCKS

Stocks are stated at the lower of cost and net realisable value. Cost means purchase price and is calculated on a first in first out basis

(e) DEFERRED TAXATION

The charge for taxation takes into account taxation deferred as a result of timing difference between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted. In accordance with FRS19, deferred tax is not recognised on revaluation gains. Deferred tax is measured on a non-discounted basis at the tax rates that are expected to apply in the periods in which the timing differences will reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.
