The notes on pages 3 to 4 form an integral part of these financial statements.

1 Accounting policies

Basis of preparation

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (Effective April 2008).

Going concern

The financial statements have been prepared on a going concern basis.

Turnover

Turnover represents amounts chargeable in respect of the sale of goods and services to customers.

Depreciation

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation less any residual value over the expected useful life as follows:

Asset class	Depreciation method and rate
Investment Properties	Depreciation is not provided

Investment properties

Certain of the company's properties are held for long-term investment. Investment properties are accounted for in accordance with the FRSSE, as follows: No depreciation is provided in respect of investment properties and they are revalued annually. The surplus or deficit on revaluation is transferred to the revaluation reserve unless a deficit below original cost, or its reversal, on an individual investment property is expected to be permanent, in which case it is recognised in the profit and loss account for the year. This treatment as regards the company's investment properties may be a departure from the requirements of the Companies Act concerning the depreciation of fixed assets. However, these properties are not held for consumption but for investment and the directors consider that systematic annual depreciation would be inappropriate. The accounting policy adopted is therefore necessary for the financial statements to give a true and fair view. Depreciation or amortisation is only one of many factors reflected in the annual valuation and the amount which might otherwise have been shown cannot be separately identified or quantified.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities. Where shares are issued, any component that creates a financial liability of the company is presented as a liability in the balance sheet. The corresponding dividends relating to the liability component are charged as interest expense in the profit and loss account.
