NOTES TO THE ABBREVIATED ACCOUNTS

YEAR ENDED 31ST MAY 2000

1. PRINCIPAL ACCOUNTING POLICIES

A summary of the more important accounting policies, which have been applied consistently, are set out below:

a) ACCOUNTING CONVENTION

The accounts are prepared in accordance with the historical cost convention.

b) FOREIGN CURRENCIES

Income and expenditure and assets and liabilities arising from transactions expressed in foreign currencies are translated into sterling at the exchange rates in operation on the dates on which the transactions occurred. At the end of the financial year monetary assets and liabilities expressed in foreign currencies are translated either by using the closing rate, or by the rates of exchange fixed under the terms of the relevant transactions. All differences are taken to the Profit and Loss Account.

c) TURNOVER

Turnover, which excludes value added tax and trade discount, represents the invoiced value of goods and services supplied.

d) TAXATION

The charge for taxation is based on the results for the year as adjusted for disallowable items. Tax deferred or accelerated is accounted for in respect of all material timing differences to the extent that it is probable that a liability or asset will crystallise. Timing differences arise from the inclusion of items of income and expenditure in tax computations in periods different from those in which they are included in the accounts. Provision is made at the rate which is expected to be applied when the liability or asset is expected to crystallise. Where this is not known the latest estimate of the long term tax rate applicable has been adopted. The amount of unprovided deferred tax is calculated at the best estimate of corporation tax rates in the longer term and is analysed into its major components.
