DIRECTORS' REPORT

For the year ended 30 November 2005

The directors present their annual report on the affairs of the company, together with the accounts and auditors' report, for the year ended 30 November 2005

BOARD OF DIRECTORS

The directors who served throughout the year and since the year end, except as noted, were as follows

T Freyman
L Iglesias-Fernandez (Resigned 13/12/2005)
D Mark (Resigned 13/12/2004)
A Forrest (Appointed 13/12/2004)
S Brown (Appointed 13/12/2005, Resigned 02/02/06)
J Coulter (Appointed 02/02/06)

None of the above have any interests in the shares or debentures of group companies required to be disclosed under Schedule 7 of the Companies Act 1985

PRINCIPAL ACTIVITIES AND BUSINESS REVIEW

In November 2005 Abbott Laboratories commenced reorganising its subsidiary companies. As part of this process Abbott Equity Holdings Unlimited transferred its shareholding in Abbott India Limited to the company in exchange for 1 share. The company's principal activity is that of a holding company. The broad direction of the company's business will continue for 2006.

RESULTS

The audited accounts for the year ended 30 November 2005 are set out on pages 3 to 7.
The profit after tax for the year was £2,376,000 (2004 £3,422,000).
Interim dividends of £nil (2004 £nil) were paid during the year.
The directors recommend that no dividend be paid and that the retained profit of £2,376,000 at 30 November 2005 be transferred to reserves.

DIRECTORS' RESPONSIBILITIES

United Kingdom company law requires the directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the company as at the end of the financial year and of the profit or loss of the company for that period. In preparing those financial statements, the directors are required to

- select suitable accounting policies and then apply them consistently,
- make judgements and estimates that are reasonable and prudent,
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the accounts, and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the company and to enable them to ensure that the accounts comply with the Companies Act 1985. They are also responsible for the system of internal control, for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud or other irregularities.

AUDITORS

Deloitte & Touche LLP have expressed their willingness to continue in office as auditors and a resolution to re-appoint them will be proposed at the forthcoming Annual General Meeting.

BY ORDER OF THE BOARD,
S BROWN
Company Secretary

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF
ABBOTT CAPITAL INDIA LIMITED

2

We have audited the financial statements of Abbott Capital India Limited for the year ended 30 November 2005 which comprise of the profit and loss account, the balance sheet and the related notes 1 to 12. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the company's members, as a body, in accordance with section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company's members as a body, for our audit work, for this report, or for the opinions that we have formed.

Respective responsibilities of directors and auditors

As described in the statement of directors' responsibilities, the company's directors are responsible for the preparation of the financial statements in accordance with applicable United Kingdom law and accounting standards. Our responsibility is to audit the financial statements in accordance with relevant United Kingdom legal and regulatory requirements and auditing standards.

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report if, in our opinion, the directors' report is not consistent with the financial statements, if the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and transactions with the company is not disclosed.

We read the directors' report for the above year and consider the implications for our report if we become aware of any apparent misstatements.

Basis of audit opinion

We conducted our audit in accordance with United Kingdom auditing standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the financial statements and of whether the accounting policies are appropriate to the circumstances of the company, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

Opinion

In our opinion the financial statements give a true and fair view of the state of affairs of the company as at 30 November 2005 and of the profit of the company for the year then ended and have been properly prepared in accordance with the Companies Act 1985.

NOTES TO THE ACCOUNTS
For the year ended 30 November 2005

1 ACCOUNTING POLICIES

A summary of the principal accounting policies, all of which have been applied consistently throughout the year and the preceding year, is set out below

a) Basis of accounting

The accounts have been prepared on the historical cost basis and have been prepared in accordance with applicable United Kingdom law and accounting standards

The company has taken advantage of the exemption from the requirement of FRS 1 (revised) "Cash Flow Statements" to present a cash flow statement because it is a wholly owned subsidiary of the ultimate parent company, Abbott Laboratories incorporated in the state of Illinois, USA, which prepares consolidated accounts that are publicly available (see note 12)

b) Taxation

UK corporation tax is provided at amounts expected to be paid, or recovered, using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the accounts that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the accounts. A net deferred tax asset is recognised as recoverable only when, on the basis of available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted. Deferred tax is not discounted

c) Foreign currency

Foreign currency transactions are translated into sterling at the rates ruling at the transaction date. Amounts payable or receivable in foreign currency are translated into sterling at the rate ruling at the balance sheet date, or where appropriate, at the rate of exchange in a related forward exchange contract. Any gains or losses are reported as exchange differences in the profit and loss account

d) Fixed asset investments

Fixed asset investments are shown at cost less provision for impairment

2 SEGMENTAL ANALYSIS

All of the profit on ordinary activities before taxation and all of the net assets of the company are from the company's principal activity based in the UK, except for income from shares in group undertakings, which are from the subsidiary incorporated in India

3 OTHER (INCOME) / EXPENSES

	<u>2005</u>	<u>2004</u>
	<u>£000's</u>	<u>£000's</u>
(Gain) / Loss on foreign exchange	<u>(90)</u>	<u>51</u>

All the audit fees are paid by other companies within the Abbott Laboratories group of companies in both the current and prior year

4 INTEREST RECEIVABLE AND SIMILAR INCOME

	<u>2005</u>	<u>2004</u>
	<u>£000's</u>	<u>£000's</u>
Bank interest	1	1
Loans to other affiliated undertakings	338	148
	<u>339</u>	<u>149</u>

NOTES TO THE ACCOUNTS (Continued)
For the year ended 30 November 2005

5 STAFF COSTS AND DIRECTORS EMOLUMENTS

During the year, and the preceding year, all the directors were paid by other affiliates within the Abbott Laboratories group of companies. The company had no other employees in either year.

6 TAX CHARGE ON PROFIT ON ORDINARY ACTIVITIES

	<u>2005</u> <u>£000's</u>	<u>2004</u> <u>£000's</u>
The tax charge is based on the profit for the year and comprises		
UK Corporation tax at 30% (2004 30%)	102	45
Adjustments in respect of prior periods	31	29
Current tax charge for the year	<u>133</u>	<u>74</u>

The difference between the current tax amount shown above and the amount calculated by applying the standard rate of UK corporation tax to the profit before tax is as follows:

	<u>2005</u> <u>£000's</u>	<u>2004</u> <u>£000's</u>
Profit on ordinary activities before tax	<u>2,509</u>	<u>3,496</u>
Tax on profit on ordinary activities at standard UK corporation tax rate of 30% (2004 30%)	753	1,049
Relief for foreign tax	(651)	(1,004)
Adjustments in respect of prior periods	31	29
	<u>133</u>	<u>74</u>

7 FIXED ASSET INVESTMENTS

The following are included in the company net book value of fixed asset investments:

	<u>2005</u> <u>£000's</u>	<u>2004</u> <u>£000's</u>
Subsidiary undertakings		
Cost and net book value at the beginning of the year	40,145	40,145
Addition	9,971	-
Cost and net book value at the end of the year	<u>50,116</u>	<u>40,145</u>

The company has investments in the following subsidiary:

	<u>Country of</u> <u>Incorporation</u>	<u>Principal</u> <u>Activity</u>	<u>2005</u> <u>Holding</u>	<u>2004</u> <u>Holding</u>
Abbott India Limited	India	Healthcare	61.7%	54.1%

In November 2005 the 7.6% shareholding of Abbott India Limited held by Abbott Equity Holdings Unlimited was transferred to the company in exchange for the issue of 1 share of the ordinary share capital of Abbott Capital India Limited.

8 DEBTORS

	<u>2005</u> <u>£000's</u>	<u>2004</u> <u>£000's</u>
Due from other group undertakings falling due within one year	10,773	8,373
Corporation tax recoverable	38	80
	<u>10,811</u>	<u>8,453</u>

9 RECONCILIATION OF MOVEMENTS IN EQUITY SHAREHOLDERS' FUNDS

	<u>2005</u> <u>£000's</u>	<u>2004</u> <u>£000's</u>
Profit for the financial year	2,376	3,422
Share premium on share issue in the year	9,971	-
Net addition to shareholders' funds	12,347	3,422
Opening shareholders' funds	48,625	45,203
Closing shareholders' funds	<u>60,972</u>	<u>48,625</u>

12 ULTIMATE HOLDING COMPANY AND GROUP STRUCTURE

a) The company is exempt under the Companies Act 1985 from the obligation to prepare and deliver group accounts. The smallest and largest group into which the results of Abbott Capital India Limited are consolidated is the ultimate parent company Abbott Laboratories, incorporated in the State of Illinois, USA. The consolidated accounts are available to the public and may be obtained from Abbott Laboratories, 100 Abbott Park Road, Abbott Park, IL60064-6400, USA.

b) A material element of the company's transactions are transacted with companies in the Abbott Laboratories Group. As permitted by Financial Reporting Standard 8, details of such transactions are not provided in these accounts as the company is a wholly-owned subsidiary undertaking and the consolidated accounts of the group are available to the public (see (a) above).

The accompanying notes to consolidated financial statements are an integral part of this statement.

Notes to Consolidated Financial Statements

Note 1 — Summary of Significant Accounting Policies

Nature of Business — Abbott's principal business is the discovery, development, manufacture and sale of a broad line of health care products

Concentration of Risk and Guarantees — Due to the nature of its operations, Abbott is not subject to significant concentration risks relating to customers, products or geographic locations, except that three U.S. wholesalers accounted for 24 percent of trade receivables as of December 31, 2005 and 20 percent of trade receivables as of December 31, 2004 and 2003. Product warranties are not significant.

Abbott has no material exposures to off-balance sheet arrangements, no special purpose entities, nor activities that include non-exchange-traded contracts accounted for at fair value. Abbott has periodically entered into agreements in the ordinary course of business, such as assignment of product rights, with other companies which has resulted in Abbott becoming secondarily liable for obligations that Abbott was previously primarily liable. Since Abbott no longer maintains a business relationship with the other parties, Abbott is unable to develop an estimate of the maximum potential amount of future payments, if any, under these obligations. Based upon past experience, the likelihood of payments under these agreements is remote. Abbott periodically acquires small companies in which Abbott agrees to pay contingent consideration based on attaining certain thresholds. In connection with the spin-off of Hospira, Abbott has retained liabilities for taxes on income prior to the spin-off and certain potential liabilities, if any, related to alleged improper pricing practices in connection with federal, state and private reimbursement for certain drugs.

Basis of Consolidation — The consolidated financial statements include the accounts of the parent company and subsidiaries, after elimination of intercompany transactions. The accounts of foreign subsidiaries are consolidated as of November 30, due to the time needed to consolidate these subsidiaries. In December 2005, certain foreign subsidiaries borrowed approximately \$1.4 billion. These borrowings and related interest expense have been reflected on the December 31, 2005 Consolidated Balance Sheet and 2005 Consolidated Statement of Earnings. No other events occurred related to these foreign subsidiaries in December 2005, 2004 and 2003 that materially affected the financial position, results of operations or cash flows.

Use of Estimates — The financial statements have been prepared in accordance with generally accepted accounting principles in the United States and necessarily include amounts based on estimates and assumptions by management. Actual results could differ from those amounts. Significant estimates include amounts for sales rebates, income taxes, pension and other post-employment benefits, valuation of intangibles, litigation, stock compensation, and inventory and accounts receivable exposures.

Revenue Recognition — Revenue from product sales is recognized upon passage of title and risk of loss to customers (when product is delivered to common carrier for shipment to domestic customers). Provisions for discounts, rebates and sales incentives to customers, and returns and other adjustments are provided for in the period the related sales are recorded. Sales incentives to customers are not material. Historical data is readily available and reliable, and is used for estimating the amount of the reduction in gross sales. Revenue from the launch of a new product, from an improved version of an existing product, or for shipments in excess of a customer's normal requirements are recorded when the conditions noted above are met.

In those situations, management records a returns reserve for such revenue, if necessary. Sales of product rights for marketable products are recorded as revenue upon disposition of the rights. Revenue from license of product rights, or for performance of research or selling activities, is recorded over the periods earned.

Income Taxes — Deferred income taxes are provided for the tax effect of differences between the tax bases of assets and liabilities and their reported amounts in the financial statements at the enacted statutory rate to be in effect when the taxes are paid. U.S. income taxes are provided on those earnings of foreign subsidiaries which are intended to be remitted to the parent company. Except for taxes on dividends that were remitted under the American Jobs Creation Act of 2004, deferred income taxes are not provided on undistributed earnings reinvested indefinitely in foreign subsidiaries as working capital and plant and equipment. Loss contingency provisions are recorded for the estimated amount of audit settlements under the provisions of Statement of Financial Accounting Standards (SFAS) No. 5, "Accounting for Contingencies."

Pension and Post-Employment Benefits — Abbott accrues for the actuarially determined cost of pension and post-employment benefits over the service attribution periods of the employees. With the assistance of outside actuaries, Abbott must develop long-term assumptions, the most significant of which are the health care costs trend rate, discount rate and the expected return on plan assets. Differences between the expected long-term return on plan assets and the actual annual return are amortized over a five-year period. Unrecognized actuarial losses and gains are amortized over the remaining service attribution periods of the employees under the corridor method.

Valuation of Intangible Assets — Purchased intangible assets are recorded at fair value. The fair value of significant purchased intangible assets is based on independent appraisals. Abbott uses a discounted cash flow model to value intangible assets. The discounted cash flow model requires assumptions about the timing and amount of future net cash inflows, risk, the cost of capital and terminal values. Intangible assets and goodwill are reviewed for impairment at least on a quarterly and annual basis, respectively.

Stock-Based Compensation — Through December 31, 2005, Abbott measured compensation cost using the intrinsic value-based method of accounting for stock options and replacement stock options granted to employees. Restricted stock awards and units have been amortized over their vesting period with a charge to compensation expense. In 2006, Abbott will adopt SFAS No. 123 (revised 2004), "Share-Based Payment," which requires that the fair value of stock options be recorded in the results of operations.

Litigation — Abbott accounts for litigation losses in accordance with SFAS No. 5. Under SFAS No. 5, loss contingency provisions are recorded for probable losses at management's best estimate of a loss, or when a best estimate cannot be made, a minimum loss contingency amount is recorded.

Cash, Cash Equivalents and Investment Securities — Cash equivalents consist of time deposits and certificates of deposit with original maturities of three months or less. Investments in marketable equity securities are classified as available-for-sale and are recorded at fair value with any unrealized holding gains or losses, net of tax, included

Notes to Consolidated Financial Statements

in Accumulated other comprehensive income (loss). Investments in equity securities that are not traded on public stock exchanges are recorded at cost. Abbott monitors equity investments for other than temporary declines in fair value and charges impairment losses to income when an other than temporary decline in estimated value occurs. Investments in debt securities are classified as held-to-maturity, as management has both the intent and ability to hold these securities to maturity, and are reported at cost, net of any unamortized premium or discount. Income relating to these securities is reported as a component of interest income.

Abbott reviews the carrying value of investments in equity securities each quarter to determine whether an other than temporary decline in market value exists. Abbott considers factors affecting the investee, factors affecting the industry the investee operates in, and general equity market trends. Abbott considers the length of time an investment's market value has been below carrying value and the near-term prospects for recovery to carrying value. When Abbott determines that an other than temporary decline has occurred, the investment is written down with a charge to Other (income) expense, net.

Inventories — Inventories are stated at the lower of cost (first-in, first-out basis) or market. Cost includes material and conversion costs.

Property and Equipment — Depreciation and amortization are provided on a straight-line basis over the estimated useful lives of the assets. The following table shows estimated useful lives of property and equipment.

Classification	Estimated Useful Lives
Buildings	10 to 50 years (average 27 years)
Equipment	3 to 20 years (average 11 years)

Product Liability — Abbott accrues for product liability claims, on an undiscounted basis, when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated based on existing information. The liabilities are adjusted quarterly as additional information becomes available. Recoveries for insurance recoveries for product liability claims are recorded as assets, on an undiscounted basis, when it is probable that a recovery will be realized. Abbott carries third-party insurance coverage in amounts that reflect historical loss experience, which does not include coverage for catastrophic losses.

Translation Adjustments — For foreign operations in highly inflationary economies, translation gains and losses are included in Net foreign exchange (gain) loss. For remaining foreign operations, translation adjustments are included in Accumulated other comprehensive income (loss).

Research and Development Costs — Internal research and development costs are expensed as incurred. Clinical trial costs incurred by third parties are expensed as the contracted work is performed. Where contingent milestone payments are due to third parties under research and development arrangements, the milestone payment obligations are expensed when the milestone results are achieved.

Reclassification — Operating cash flows and investing cash flows of discontinued operations have been reclassified separately for 2004 and 2003 in the Consolidated Statement of Cash Flows.

Note 2 — Supplemental Financial Information
(dollars in thousands)

Other Accrued Liabilities	2005	2004	2003
Accrued rebates payable to government agencies	\$ 620,300	\$ 519,653	\$ 381,898
Accrued other rebates (a)	206,514	202,363	212,459
All other	1,895,871	1,769,940	1,585,741
Total	\$2,722,685	\$2,491,956	\$2,180,098

(a) Accrued wholesaler chargeback rebates of \$83,551, \$72,634 and \$81,292 at December 31, 2005, 2004 and 2003, respectively, are netted in trade receivables. Accrued wholesaler chargeback rebates are netted in trade receivables because Abbott's customers are invoiced at a higher catalog price but only remit to Abbott their contract price for the products.

Post-employment Obligations and Other Long-term Liabilities	2005	2004	2003
Accrued post-employment medical and dental costs	\$ 638,823	\$ 747,406	\$ 797,127

Interest paid	213,067	197,554	207,045

Notes to Consolidated Financial Statements

Note 3 — Financial Instruments and Derivatives

Certain Abbott foreign subsidiaries enter into foreign currency forward exchange contracts to manage exposures to changes in foreign exchange rates for anticipated intercompany purchases by those subsidiaries whose functional currencies are not the U.S. dollar. These contracts, totaling \$222 million, \$984 million and \$602 million at December 31, 2005, 2004 and 2003, respectively, are designated as cash flow hedges of the variability of the cash flows due to changes in foreign exchange rates. Abbott records the contracts at fair value, resulting in credits of \$38.6 million and \$3.6 million to Accumulated other comprehensive income (loss) in 2005 and 2003, respectively, and a \$40.0 million charge to Accumulated other comprehensive income (loss) in 2004. No hedge ineffectiveness was recorded in income in 2005, 2004 or 2003. Accumulated gains and losses as of December 31, 2005 will be included in Cost of products sold at the time the products are sold, generally through the end of 2006.

Abbott enters into foreign currency forward exchange contracts to manage currency exposures for foreign currency denominated third-party trade payables and receivables, and for intercompany loans and trade accounts payable where the receivable or payable is denominated in a currency other than the functional currency of the entity. For intercompany loans, the contracts require Abbott to sell or buy foreign currencies, primarily European currencies and Japanese yen, in exchange for primarily U.S. dollars and other European currencies. For intercompany and trade payables and receivables, the currency exposures are primarily the U.S. dollar, European currencies and Japanese yen. These contracts are recorded at fair value, with the resulting gains or losses reflected in income as Net foreign exchange (gain) loss. At December 31, 2005, 2004 and 2003, Abbott held \$3.9 billion, \$3.3 billion and \$3.0 billion, respectively, of such foreign currency forward exchange contracts.

Abbott is a party to interest rate hedge contracts totaling \$3.1 billion to manage its exposure to changes in the fair value of \$3.1 billion of fixed-rate debt due July 2006 through March 2014. These contracts are designated as fair value hedges of the variability of the fair value of fixed-rate debt due to changes in the long-term benchmark interest rates. The effect of the hedge is to change a fixed-rate interest obligation to a variable rate for that portion of the debt. Abbott records the contracts at fair value and adjusts the carrying amount of the fixed-rate debt by an offsetting amount. No hedge ineffectiveness was recorded in income in 2005, 2004 and 2003.

Gross unrealized holding gains (losses) (in thousands) on current and long-term held-to-maturity investment securities totaled \$300 and \$(400), respectively, at December 31, 2005, \$1,200 and \$(900), respectively, at December 31, 2004, and \$1,400 and \$(2,200), respectively, at December 31, 2003. Gross unrealized holding gains (losses) on available-for-sale equity securities totaled \$17,700 and \$(3,500), respectively, at December 31, 2005, \$30,800 and \$(1,100), respectively, at December 31, 2004, and \$162,700 and \$(4,000), respectively, at December 31, 2003.

The carrying values and fair values of certain financial instruments as of December 31 are shown in the table below. The carrying values of all other financial instruments approximate their estimated fair values. Fair value is the quoted market price of the instrument held or the quoted market price of a similar instrument. The counter parties to financial instruments consist of select major international financial institutions. Abbott does not expect any losses from nonperformance by these counter parties.

(dollars in millions)	2005		2004		2003

Total cost	170,503	175,910	157,644	106,103	104,332	119,870
Discontinued operations	—	(9,781)	(20,404)	—	(14,349)	(33,630)
Net cost of continuing operations	\$ 170,503	\$ 166,129	\$ 137,240	\$ 106,103	\$ 89,983	\$ 86,240

The projected benefit obligations for non-U.S. defined benefit plans was \$1,148,000, \$1,132,000 and \$950,000 at December 31, 2005, 2004 and 2003, respectively. The accumulated benefit obligations for all defined benefit plans was \$4,158,000, \$3,954,000 and \$3,762,000 at December 31, 2005, 2004 and 2003, respectively. In 2005, Abbott reversed previously recorded minimum pension liability adjustments of \$562,429 because the assets of certain defined benefit plans were

now in excess of the accumulated benefit obligations due primarily to plan contributions in 2005. This resulted in a credit to Accumulated other comprehensive income (loss) of \$346,172, net of taxes. In 2004 and 2003, Abbott recorded minimum pension liability adjustments of \$120,475 and \$155,134, respectively, because the accumulated benefit obligations for certain defined benefit plans exceeded the market value of the plans' assets. This resulted in charges to Accumulated

Notes to Consolidated Financial Statements

other comprehensive income (loss) of \$75,947 and \$99,155 in 2004 and 2003, respectively, net of taxes. For plans where the accumulated benefit obligations exceeded plan assets at December 31, 2005, 2004 and 2003, the aggregate accumulated benefit obligations were \$465,000, \$3,053,000 and \$3,033,000, respectively, the projected benefit obligations were \$508,000, \$3,738,000 and \$3,824,000, respectively, and the aggregate plan assets were \$5,000, \$2,909,000 and \$2,567,000, respectively.

The weighted average assumptions used to determine benefit obligations for defined benefit plans and medical and dental plans as of December 31, the measurement date of the plans, are as follows:

	2005	2004	2003
Discount rate	5.5%	5.6%	5.8%
Expected aggregate average long-term change in compensation	4.2%	4.2%	4.2%

The weighted average assumptions used to determine the net cost for defined benefit plans and medical and dental plans are as follows:

	2005	2004	2003
Discount rate	5.6%	6.0%	6.5%
Expected return on plan assets	8.4%	8.4%	8.6%
Expected aggregate average long-term change in compensation	4.2%	4.2%	4.1%

The assumed health care cost trend rates for medical and dental plans at December 31 were as follows:

	2005	2004	2003
Health care cost trend rate assumed for the next year	7%	7%	8%
Rate that the cost trend rate gradually declines to	5%	5%	5%
Year that rate reaches the assumed ultimate rate	2012	2007	2007

The discount rate used to measure liabilities as of December 31, 2005 was determined based on high-quality fixed income investments that match the duration of the expected retiree benefits. Prior to December 31, 2005, the discount rate was determined by reference to a composite corporate AA bond index. The health care cost trend rate represents Abbott's expected annual rates of change in the cost of health care benefits and is a forward projection of health care costs as of the measurement date. A one-percentage point increase/(decrease) in the assumed health care cost trend rate would increase/(decrease) the accumulated post-employment benefit obligations as of December 31, 2005, by \$201,320/\$(161,383), and the total of the service and interest cost components of net post-employment health care cost for the year then ended by approximately \$19,207/\$(15,025).

In 2004, Abbott reflected the requirements of Financial Accounting Standards Board Staff Position No. 106-2, "Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003." As a result, the projected benefit obligations related to benefits attributed to past service were reduced by approximately \$210,000 and the net cost recognized in 2004 was reduced by approximately \$33,000.

The weighted average asset allocation for Abbott's U.S. defined benefit plans by asset category is shown in the table below. Abbott's international defined benefit plans have similar equity content.

Asset Category	2005	2004	2003
Equity securities	74%	73%	68%
Fixed income securities	26	27	32
Total	100%	100%	100%

The investment mix between equity securities and fixed income securities is based upon achieving a desired return, balancing higher return, more volatile equity securities, and lower return, less volatile fixed income securities. Abbott's domestic defined benefit plans are invested in diversified portfolios of public-market equity and fixed income securities. Investment allocations are made across a range of markets, industry sectors, capitalization sizes, and, in the case of fixed income securities, maturities and credit quality. The plans hold no securities of Abbott. Abbott's international defined benefit plans are invested in a corresponding manner, with some variance in portfolio structure around local practices.

The plans' expected return on assets, as shown above, is based on management's expectations of long-term average rates of return to be achieved by the underlying investment portfolios. In establishing this assumption, management considers historical and expected returns for the asset classes in which the plans are invested, as well as current economic and capital market conditions.

Abbott funds its domestic pension plans according to IRS funding limitations. In 2005, 2004 and 2003, \$641,000, \$482,000 and \$200,000, respectively, was funded to the main domestic pension plan. International pension plans are funded according to similar regulations.

Total benefit payments expected to be paid to participants, which includes payments funded from company assets for medical and dental benefits as well as paid from the plans, are as follows:

	Defined Benefit Plans	Medical and Dental Plans
2006	\$ 191,780	\$ 70,060
2007	195,164	72,093
2008	202,949	76,740
2009	203,924	77,614
2010	212,239	83,805
2011 to 2015	1,253,092	490,219

The Abbott Stock Retirement Plan is the principal defined contribution plan. Abbott's contributions to this plan were \$100,000 in 2005, \$97,000 in 2004 and \$90,000 in 2003.

Abbott provides certain other post-employment benefits, primarily salary continuation plans, to qualifying domestic employees, and accrues for the related cost over the service lives of the employees.

Note 5 — Taxes on Earnings (dollars in thousands)

Deferred income taxes reflect the tax consequences on future years of differences between the tax bases of assets and liabilities and their financial reporting amounts. U.S. income taxes are provided on those earnings of foreign subsidiaries, which are intended to be remitted to the parent company. Except for taxes on dividends that were remitted

Notes to Consolidated Financial Statements

under the American Jobs Creation Act of 2004, Abbott does not record deferred income taxes on earnings reinvested indefinitely in foreign subsidiaries. Undistributed earnings reinvested indefinitely in foreign subsidiaries as working capital and plant and equipment aggregated \$5,797,000 at December 31, 2005. It is not practicable to determine the amount of deferred income taxes not provided on these earnings. Abbott has recorded reserves for income tax loss contingencies in accordance with SFAS No. 5. The maximum possible loss in excess of the recorded reserves is not material. In the U.S., Abbott's federal income tax returns through 2000 are settled, and the income tax returns for years after 2000 are open.

Earnings from continuing operations before taxes, and the related provisions for taxes on earnings from continuing operations, were as follows:

Earnings From Continuing Operations Before Taxes	2005	2004	2003
Domestic	\$2,068,232	\$2,278,180	\$1,657,298
Foreign	2,551,688	1,847,420	1,729,853
Total	\$4,619,920	\$4,125,600	\$3,387,151

Taxes on Earnings From Continuing Operations	2005	2004	2003
Current:			
U.S. Federal and Possessions	\$ 526,213	\$ 172,322	\$ 536,305
State	89,483	43,456	20,873
Foreign	616,118	461,740	403,895
Total current	1,231,814	677,518	961,073
Deferred:			
Domestic	4,709	295,030	(15,780)
Foreign	17,035	(24,272)	(62,519)
Enacted tax rate changes	(5,703)	1,488	(348)
Total deferred	16,041	272,246	(78,647)
Total	\$1,247,855	\$ 949,764	\$ 882,426

Differences between the effective income tax rate and the U.S. statutory tax rate were as follows:

	2005	2004	2003
Statutory tax rate on earnings from continuing operations	35.0%	35.0%	35.0%
Benefit of lower tax rates and tax exemptions in Puerto Rico, the Netherlands and Ireland	(6.4)	(7.8)	(9.1)
Effect of nondeductible portion of a legal settlement	—	—	4.0
Effect of taxes on remittances of foreign earnings in connection with the American Jobs Creation Act of 2004	5.3	—	—
Effect of nondeductible acquired in-process research and development	—	2.0	1.0
State taxes, net of federal benefit	1.2	1.1	0.4
Adjustments primarily related to resolution of prior years' accrual requirements	(1.8)	(3.6)	—
Domestic dividend exclusion	(2.7)	(2.6)	(4.8)
All other, net	(3.6)	(1.1)	(0.4)
Effective tax rate on earnings from continuing operations	27.0%	23.0%	26.1%

As of December 31, 2005, 2004 and 2003, total deferred tax assets were \$2,040,906, \$2,171,782 and \$2,505,502, respectively, and total deferred tax liabilities were \$1,355,181, \$1,349,972 and \$1,075,209, respectively. Valuation allowances for deferred tax assets were not significant. The tax effect of the differences that give rise to deferred tax assets and liabilities were as follows:

	2005	2004	2003
Compensation and employee benefits	\$ 37,578	\$ 247,885	\$ 539,668
Trade receivable reserves	227,251	223,507	252,559
Inventory reserves	161,934	129,052	163,492
Deferred intercompany profit	319,402	379,560	380,854
State income taxes	49,153	(7,336)	68,489
Depreciation	(157,272)	(193,224)	(203,019)
Acquired in-process research and development and other accruals and reserves not currently deductible	1,132,954	1,111,611	1,005,602
Other, primarily the excess of book basis over tax basis of intangible assets	(1,095,182)	(1,079,388)	(779,402)
Total	\$ 675,818	\$ 811,667	\$ 1,428,243

Among the provisions of the American Jobs Creation Act of 2004 was a provision that allows for the exclusion from income of a portion of the remittances of earnings of foreign subsidiaries to U.S. shareholders through December 31, 2005. In 2005, Abbott remitted in accordance with the provisions of the Act approximately \$4,300,000 of foreign earnings previously reinvested indefinitely. The additional income tax expense recorded for the remittance was approximately \$245,000.

Note 6 — Segment and Geographic Area Information
(dollars in millions)

Revenue Segments — Abbott's principal business is the discovery, development, manufacture and sale of a broad line of health care products. Abbott's products are generally sold directly to retailers, wholesalers, hospitals, health care facilities, laboratories, physicians' offices and government agencies throughout the world. On April 30, 2004, Abbott spun off its core hospital products business which included all of the Hospital Products segment, after its reorganization on January 1, 2004, and a portion of the International segment. For segment reporting purposes, four diagnostic testing divisions are aggregated and reported as the Diagnostic Products segment. Abbott's reportable segments are as follows:

Pharmaceutical Products — U.S. sales of a broad line of pharmaceuticals.

Diagnostic Products — Worldwide sales of diagnostic systems and tests for blood banks, hospitals, consumers, commercial laboratories and alternate-care testing sites.

Ross Products — Primarily U.S. sales of a broad line of adult and pediatric nutritional products, pediatric pharmaceuticals and consumer products.

International — Non-U.S. sales of Abbott's pharmaceutical and nutritional products.

Notes to Consolidated Financial Statements

Abbott's underlying accounting records are maintained on a legal entity basis for government and public reporting requirements. Segment disclosures are on a performance basis consistent with internal management reporting. Intersegment transfers of inventory are recorded at standard cost and are not a measure of segment operating earnings. The cost of some corporate functions and the cost of certain employee benefits are sold to segments at predetermined rates

that approximate cost. Remaining costs, if any, are not allocated to segments. Substantially all intangible assets and related amortization from business acquisitions are not allocated to segments. The following segment information has been prepared in accordance with the internal accounting policies of Abbott, as described above, and are not presented in accordance with generally accepted accounting principles applied to the consolidated financial statements.

	Net Sales to External Customers			Operating Earnings			Depreciation and Amortization			Additions to Long-Term Assets			Total Assets		
	2005	2004	2003	2005	2004	2003	2005	2004	2003	2005	2004	2003	2005	2004	2003

(d) Sales by country are based on the country that sold the product.

Notes to Consolidated Financial Statements

Note 7 — Litigation and Environmental Matters

As of December 31, 2004, there were several lawsuits pending in connection with the sales of *Hytrin*. These suits alleged that Abbott violated state or federal antitrust laws and, in some cases, unfair competition laws by signing patent settlement agreements with Geneva Pharmaceuticals, Inc. and Zenith Laboratories, Inc. in 1998. Those agreements related to pending patent infringement lawsuits between Abbott and the two companies. In 2005, the court approved settlements with the majority of the plaintiffs in the aggregate amount of \$90 million, which was previously reserved. The claims of the remaining plaintiffs are not material and are reserved for by Abbott.

Abbott has been identified as a potentially responsible party for investigation and cleanup costs at a number of locations in the United States and Puerto Rico under federal and state remediation laws and is investigating potential contamination at a number of company-owned locations. Abbott has recorded an estimated cleanup cost for each site for which management believes Abbott has a probable loss exposure. No individual site cleanup exposure is expected to exceed \$3 million, and the aggregate cleanup exposure is not expected to exceed \$20 million.

Within the next year, legal proceedings may occur that may result in a change in the estimated reserves recorded by Abbott. For its legal proceedings and environmental exposures, including those discussed in this note and in Note 8, Abbott estimates the range of possible loss to be from approximately \$15 million to \$60 million. Reserves of approximately \$35 million have been recorded at December 31, 2005 for these proceedings and exposures. These reserves represent management's best estimate of probable loss, as defined by Statement of Financial Accounting Standards No. 5, "Accounting for Contingencies."

While it is not feasible to predict the outcome of all such proceedings and exposures with certainty, management believes that their ultimate disposition should not have a material adverse effect on Abbott's financial position, cash flows, or results of operations.

Note 8 — TAP Pharmaceutical Products Inc.

As of December 31, 2004, TAP Pharmaceutical Products Inc. (TAP) and Abbott were named as defendants in several lawsuits alleging violations of various state or federal laws in connection with TAP's marketing and pricing of *Lupron*. In 2005, settlements, including a court-approved class settlement, were reached with the majority of the plaintiffs in the aggregate amount of approximately \$160 million, which was previously reserved. The claims of the remaining plaintiffs are not material and are reserved for by TAP. Abbott's portion of TAP's remaining reserve is included in the reserve amounts and range in Note 7 above.

Within the next year, legal proceedings may occur that may result in a change in the estimated reserves recorded by TAP. While it is not feasible to predict the outcome of such pending claims, proceedings, and investigations with certainty, management is of the opinion that their ultimate disposition should not have a material adverse effect on Abbott's financial position, cash flows, or results of operations.

Note 9 — Spin-off of Hospira

On April 12, 2004, Abbott's Board of Directors declared a special dividend distribution of all of the outstanding shares of common stock of Hospira, Inc., payable on April 30, 2004. Hospira included the operations relating to the manufacture and sale of hospital products including specialty injectable pharmaceuticals, medication delivery systems and critical care devices and injectable pharmaceutical contract manufacturing. Hospira included Abbott's Hospital Products segment, after that segment's reorganization on January 1, 2004, and portions of Abbott's International segment. The income and cash flows of Hospira and the direct transaction costs of the spin-off have been presented as discontinued operations in the Consolidated Statement of Earnings and Statement of Cash Flows. Prior years' balance sheets have not been adjusted to reflect the effect of the spin-off.

The legal transfer of certain remaining operations and assets (net of liabilities) outside the United States is expected to occur in the first half of 2006. These operations and assets are used in the conduct of Hospira's international business and Hospira is subject to the risks and entitled to the benefits generated by these operations and assets. These assets and liabilities have been presented as held for sale in the Consolidated Balance Sheets as of December 31, 2005 and 2004. The assets and liabilities held for sale consist primarily of inventories, trade accounts receivable, equipment and trade accounts payable, salaries and other accruals.

Abbott has retained liabilities for taxes on income prior to the spin-off, defined benefit, post-employment medical and dental plan obligations and assets, as of the spin-off, for most of Hospira's U.S. retired employees and U.S. retirement eligible employees and certain potential liabilities, if any, related to alleged improper pricing practices prior to the spin-off in connection with federal, state and private reimbursement for certain drugs.

Summarized financial information for discontinued operations is as follows (dollars in thousands):

	2004	2003
Net sales	\$793,129	\$2,400,228
Earnings before taxes	90,444	347,266
Taxes on earnings	30,429	98,758
Net earnings	60,015	248,508

The financial information above includes the operations of Hospira through April 30, 2004, the date of the spin-off. As a consequence, the results for the full year 2004 include only four months of the operations of Hospira. The results of the discontinued operations also include direct transaction costs of approximately \$36 million and \$12 million in 2004 and 2003, respectively.

Notes to Consolidated Financial Statements

The following is a summary of the assets and liabilities transferred to Hospira on April 30, 2004 (dollars in millions)

Trade receivables, net	\$ 235
Inventories	481
Prepaid expenses, deferred income taxes, and other receivables	269
Net property and equipment	841
Goodwill	61
Deferred income taxes and other assets	91
Total Assets	\$1,998
Short-term borrowings	\$ 700
Trade accounts payable, salaries and other accruals	346
Post-employment obligations and other long-term liabilities	185
Total Liabilities	\$1,231
Net Assets Transferred to Hospira	\$ 767

Note 10 — Incentive Stock Program

The 1996 Incentive Stock Program authorizes the granting of stock options, replacement stock options, stock appreciation rights, limited stock appreciation rights, restricted stock awards, restricted stock units, performance units and foreign qualified benefits. Stock options, replacement stock options and restricted stock awards comprise the majority of benefits that have been granted and are currently outstanding under this program and prior programs. In 2005, Abbott granted 21,499,002 stock options, 4,190,704 replacement stock options, 588,821 restricted stock awards and 42,379 restricted stock units under the program. The purchase price of shares under option must be at least equal to the fair market value of the common stock on the date of grant, and the maximum term of an option is 10 years. Options granted in 2005, 2004 and 2003 vest equally over three years except for replacement options, which vest in six months. When an employee tenders mature shares to Abbott upon exercise of a stock option, a replacement stock option is granted equal to the amount of shares tendered. Replacement options are granted at the then current market price for a term that expires on the date of the underlying option grant. Except for replacement options, options granted after December 31, 2004 do not have a replacement option feature. Upon a change in control of Abbott, all outstanding stock options become fully exercisable, and all terms and conditions of all restricted stock awards are deemed satisfied. Hospira optionees who were eligible to retire as of the spin-off date are retired from Abbott for purposes of their outstanding options. Pro forma compensation expense for 2004 reflects the cancellation of

the remaining options. Abbott options were adjusted for the effects of the spin-off on the intrinsic value of the options and resulted in the issuance of an additional 8.2 million Abbott options.

At January 1, 2006, approximately 47 million shares were reserved for future grants under the 1996 Program. Subsequent to year-end, the Board of Directors granted approximately 25 million stock options and restricted stock awards and units from this reserve.

	Options Outstanding		Exercisable Options	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
January 1, 2003	99,680,756	\$43.58

Granted	25,689,706	46.46		
Exercised (total intrinsic value was \$188,754,000)	(13,030,288)	32.63		
Lapsed	(3,025,105)	45.24		
December 31, 2005	141,122,811	\$42.69	98,328,158	\$42.77

The number of restricted stock awards and units outstanding and their weighted-average grant-date fair value at January 1, 2005 and December 31, 2005 was 2,093,100 (\$50.92) and 2,381,800 (\$50.09), respectively. The number of restricted stock awards and units, and their weighted-average grant-date fair value, granted, vested and lapsed during 2005 were 610,200 (\$46.14), 262,501 (\$49.01) and 58,999 (\$43.50), respectively. The fair value of restricted stock awards and units vested in 2005, 2004, and 2003 was \$12,949,000, \$16,469,000 and \$12,712,000, respectively.

Range of Exercise Prices	Options Outstanding at December 31, 2005			Exercisable Options at December 31, 2005	
	Shares	Weighted Average Remaining Life (Years)	Weighted Average Exercise Price	Shares	Weighted Average Remaining Life (Years)
\$20 to \$39	34,617,055	4.9	\$32.46	27,217,030	4.3
40 to 46	58,166,583	6.1	42.89	44,213,471	5.4
47 to 55	48,339,173	7.6	49.76	26,897,657	6.3
\$20 to \$55	141,122,811	6.3	\$42.69	98,328,158	5.4

Notes to Consolidated Financial Statements

The aggregate intrinsic value of options outstanding and exercisable at December 31, 2005 was \$241,000,000 and \$197,000,000, respectively. The total unrecognized compensation cost related to all stock-based compensation plans at December 31, 2005 amounted to \$201,000,000 and is expected to be recognized over the next three years.

Through December 31, 2005, Abbott measured compensation cost using the intrinsic value-based method of accounting for stock options and replacement options granted to employees. Had compensation cost been determined using the fair value-based accounting method, pro forma net income (in billions) and earnings per share (EPS) amounts would have been as follows.

	2005	2004	2003
Net income, as reported	\$ 3.4	\$ 3.2	\$ 2.8
Compensation cost under fair value-based accounting method, net of taxes of \$0.07 in 2005 and 2004 and \$0.08 in 2003	(0.2)	(0.2)	(0.3)
Net income, pro forma	\$ 3.2	\$ 3.0	\$ 2.5
Diluted EPS from Continuing Operations, as reported	\$2.16	\$2.02	\$1.59
Diluted EPS from Continuing Operations, pro forma	2.02	1.90	1.47
Basic EPS, as reported	2.17	2.07	1.76
Basic EPS, pro forma	2.04	1.94	1.62
Diluted EPS, as reported	2.16	2.06	1.75
Diluted EPS, pro forma	2.02	1.94	1.62

The weighted average fair value of an option granted in 2005, 2004 and 2003 was \$12.17, \$11.79 and \$8.73, respectively. For purposes of fair value disclosures, the fair value of an option grant was estimated using the Black-Scholes option-pricing model with the following assumptions:

	2005	2004	2003
Risk-free interest rate	3.8%	2.9%	2.7%
Average life of options (years)	5.4	5.4	5.4
Volatility	29.0%	32.0%	32.0%
Dividend yield	2.2%	2.2%	2.8%

In 2006, Abbott will adopt Statement of Financial Accounting Standards No. 123 (revised 2004), "Share-Based Payment," which requires that fair value be recorded in the results of operations. Stock compensation expense under the prior rules would have reduced reported diluted earnings per share by \$0.14 in 2005. Upon adoption of the revised standard, prior awards are charged to expense under

the prior rules, and awards after adoption are charged to expense under the revised rules. Based upon the valuation of stock options granted in the 2006 annual grant, which comprise the majority of the grant activity for the year, Abbott estimates the impact of the 2006 change in stock compensation expense on diluted earnings per share of approximately \$0.15, which includes \$0.14 per diluted share for the impact of expensing the fair value of stock options. The effect of adopting the new rules on reported diluted earnings per share is dependent on the number of options granted in the future, the terms of those awards and their fair values, and therefore, the effect on diluted earnings per share could change.

Note 11 — Debt and Lines of Credit

(dollars in thousands)

The following is a summary of long-term debt at December 31:

	2005	2004	2003
6.8% debentures, due 2005	\$ —	\$ —	\$ 150,000
5.625% debentures, due 2006	—	1,600,000	1,600,000
6.4% debentures, due 2006	—	250,000	250,000
0.77% Yen notes, due 2007	83,654	97,343	91,324
Notes, variable interest above LIBOR, due 2008	770,000	—	—
Euro notes, variable interest above LIBOR, due 2008	638,766	—	—
British Pound notes, variable interest above LIBOR, due 2008	344,000	—	—
6.0% debentures, due 2008	200,000	200,000	200,000
5.4% debentures, due 2008	200,000	200,000	200,000
1.05% Yen notes, due 2008	418,270	486,713	456,621
3.5% debentures, due 2009	500,000	500,000	—
1.51% Yen notes, due 2010	125,481	146,014	136,986
3.75% debentures, due 2011	500,000	500,000	—
1.95% Yen notes, due 2013	209,135	243,356	228,311
4.35% debentures, due 2014	500,000	500,000	—
Other, including fair market value adjustments relating to interest rate hedge contracts designated as fair value hedges	82,198	64,508	139,087
Total, net of current maturities	4,571,504	4,787,934	3,452,329
Current maturities of long-term debt	1,849,563	156,034	1,709,265
Total carrying amount	\$6,421,067	\$4,943,968	\$5,161,594

Principal payments required on long-term debt outstanding at December 31, 2005, are \$1,855,323 in 2006, \$88,986 in 2007, \$2,667,698 in 2008, \$501,199 in 2009, \$126,530 in 2010 and \$1,263,710 thereafter.

At December 31, 2005, Abbott had \$3,000,000 of unused lines of credit, which support commercial paper borrowing arrangements. Related compensating balances, which are subject to withdrawal by Abbott at its option, and commitment fees are not material. Abbott's weighted average interest rate on short-term borrowings, primarily Japanese borrowings at December 31, 2005, was 1.3% at December 31, 2005, 2.2% at December 31, 2004 and 1.1% at December 31, 2003.

Notes to Consolidated Financial Statements

Note 12 — Business Combinations and Technology Acquisitions

In 2005, Abbott acquired the remaining interest in a small medical products company that was previously accounted for under the equity method of accounting and a less than 50 percent equity interest in a small medical products company. The aggregate cash purchase price was approximately \$25 million. Acquisition accounting resulted in the recording of non-tax deductible goodwill of approximately \$69 million, intangible assets of approximately \$22 million and a charge of approximately \$17 million for acquired in-process research and development. In 2005, Abbott acquired additional rights related to HUMIRA for approximately \$270 million, which will be amortized over 13 years.

In 2004, Abbott paid approximately \$2.3 billion for strategic business and technology acquisitions, as follows: Abbott acquired TheraSense, Inc., a leader in the development, manufacturing and marketing of blood glucose self-monitoring systems, for approximately \$1.2 billion in cash, i-STAT Corporation, a manufacturer of point-of-care diagnostic products for blood analysis, for approximately \$394 million in cash, EAS, a nutritional company with a portfolio of nationally recognized brands, for approximately \$320 million in cash, and Spine Next, a manufacturer of orthopedic spinal implant devices, for approximately \$58 million in cash plus additional milestone payments of up to \$23 million upon achievement of future targets. Abbott also acquired certain other product technologies for approximately \$352 million. These acquisitions resulted in a charge of \$271 million for acquired in-process research and development, intangible assets of approximately \$1.3 billion, non-tax deductible goodwill of approximately \$923 million and deferred income taxes of approximately \$406 million. Acquired intangible assets, primarily trade names, are amortized over 5 to 20 years (average of approximately 14 years).

In 2003, Abbott paid approximately \$459 million for strategic business and technology acquisitions, as follows: Abbott acquired ZonePerfect Nutrition Company, a marketer of healthy and nutritious products for active people, for approximately \$160 million in cash, Integrated Vascular Systems, Inc., a developer of a novel vessel closure technology, for approximately \$65 million in cash, and Spinal Concepts Inc., a marketer of spinal fixation products used in the treatment of spinal disorders, diseases and injuries, for approximately \$166 million in cash plus additional milestone payments of up to \$40 million if agreed upon targets are met. Abbott also acquired the assets of JOMED N.V.'s coronary and peripheral interventional business for approximately \$68 million in cash. These acquisitions resulted in a charge of approximately \$100 million for acquired in-process research and development, intangible assets of approximately \$222 million and non-tax deductible goodwill of approximately \$182 million. Acquired intangible assets, primarily product technology, are amortized over 9 to 25 years (average of approximately 16 years).

Had the above acquisitions taken place on January 1 of the previous year, consolidated sales and income would not have been significantly different from reported amounts.

In early 2006, Abbott agreed to acquire Guidant's vascular intervention and endovascular solutions businesses for \$4.1 billion in connection with Boston Scientific's acquisition of Guidant. Abbott would also pay \$250 million each upon government approvals to market Guidant's drug-eluting stent in the U.S. and in Japan. In addition, Abbott agreed to provide Boston Scientific a \$900 million 4 percent loan and to acquire \$1.4 billion of Boston Scientific common stock directly from Boston Scientific contingent upon the closing of the Guidant acquisition. The acquisition is expected to be completed in the first half of 2006.

Note 13 — Goodwill and Intangible Assets

(dollars in millions)

Abbott recorded goodwill of \$69, \$923 and \$182 in 2005, 2004 and 2003, respectively, related to acquisitions. Foreign currency translation and other adjustments (decreased) increased goodwill in 2005, 2004 and 2003 by \$(535), \$394 and \$522, respectively. In connection with the spin-off of Hospira in 2004, Abbott transferred \$81 of goodwill to Hospira. There were no other reductions of goodwill relating to impairments or disposal of all or a portion of a business.

The gross amount of amortizable intangible assets, primarily product rights and technology, was \$6,776, \$6,622 and \$4,841 as of December 31, 2005, 2004 and 2003, respectively, and accumulated amortization was \$2,053, \$1,468 and \$899 as of December 31, 2005, 2004 and 2003, respectively. Intangible assets with indefinite lives are not significant. The estimated annual amortization expense for intangible assets is \$486 in 2006, \$475 in 2007, \$460 in 2008, \$459 in 2009 and \$461 in 2010. Intangible assets are amortized primarily on a straight-line basis over 4 to 25 years (average 13 years).

Note 14 — Equity Method Investments

(dollars in millions)

Abbott's 50 percent-owned joint venture, TAP Pharmaceutical Products Inc. (TAP), is accounted for under the equity method of accounting. The investment in TAP was \$167, \$76 and \$340 at December 31, 2005, 2004 and 2003, respectively. Dividends received from TAP were \$343, \$638 and \$606 in 2005, 2004 and 2003, respectively. Abbott performs certain administrative and manufacturing services for TAP at negotiated rates that approximate fair market value. Summarized financial information for TAP is as follows:

Year Ended December 31	2005	2004	2003
Net sales	\$3,260.0	\$3,361.6	\$3,979.6
Cost of sales	883.4	990.4	1,066.8
Income before taxes	1,379.3	1,181.1	1,815.5
Net income	882.8	750.0	1,161.9
December 31	2005	2004	2003
Current assets	\$1,339.1	\$ 951.7	\$1,451.6
Total assets	1,470.2	1,176.6	1,718.1
Current liabilities	1,082.2	976.8	965.8
Total liabilities	1,136.2	1,025.2	1,037.2

Undistributed earnings of investments accounted for under the equity method amounted to approximately \$151 as of December 31, 2005.

Notes to Consolidated Financial Statements

Note 15 — Stock Purchase Rights

Common shares outstanding are subject to stock purchase rights. The rights are exercisable only if a person or group acquires ten percent or more of Abbott common shares or announces a tender or exchange offer which would result in ownership of ten percent or more of Abbott common shares. Following the acquisition of ten percent or more of Abbott's common shares, the holders of the rights, other than the acquiring person or group, may purchase Abbott common shares at half price. In the event of a merger or other acquisition of Abbott, the holders of the rights, other than the acquiring person or group, may purchase shares of the acquiring entity at half price. The rights were not exercisable at December 31, 2005.

Note 16 — Restructuring Plans

(dollars in millions)

In 2005, Abbott management approved plans to realign its global manufacturing operations and selected domestic and international commercial operations. In 2005, Abbott recorded pretax charges against earnings of approximately \$256 reflecting the impairment of manufacturing facilities and other assets, employee severance and other related charges. Approximately \$174 is classified as cost of products sold, \$10 as research and development and \$72 as selling, general and administrative. An additional \$14 was subsequently recorded in 2005 relating to these restructurings, primarily for accelerated depreciation. As a result of product re-registration timelines required under manufacturing regulations in a number of countries, manufacturing related realignments are expected to continue into 2007.

The following summarizes the restructuring activity for the global pharmaceutical manufacturing operations restructuring:

	Employee- Related and Other	Asset Impairments	Total
2005 restructuring charges	\$44.1	\$ 52.7	\$ 96.8
Payments and impairments	(0.3)	(52.7)	(53.0)
Accrued balance at December 31, 2005	\$43.8	\$ —	\$ 43.8

The following summarizes the restructuring activity for all other restructurings, which are individually not material:

	Employee- Related and Other	Asset Impairments	Total
2005 restructuring charges	\$147.6	\$ 11.1	\$158.7
Payments and impairments	(36.6)	(11.1)	(47.7)
Accrued balance at December 31, 2005	\$111.0	\$ —	\$111.0

Abbott expects to incur up to an additional \$150 in future periods for restructuring plans, primarily for accelerated depreciation and plant and equipment dispositions.

Note 17 — Quarterly Results (Unaudited)

(dollars in millions except per share data)

	2005	2004	2003
First Quarter			
Net Sales	\$5,382.7	\$4,640.9	\$4,008.9
Gross Profit	2,860.1	2,567.4	2,209.0
Net Earnings	837.9	822.9	801.0
Basic Earnings Per Common Share (a)	54	53	51
Diluted Earnings Per Common Share (a)	53	52	51
Market Price Per Share - High	48.16	47.25	40.85
Market Price Per Share - Low	43.34	39.28	33.75

Second Quarter			
Net Sales	\$5,523.8	\$4,703.0	\$4,126.3
Gross Profit	2,892.0	2,634.3	2,277.9
Net Earnings (b)	877.1	634.3	246.6
Basic Earnings Per Common Share (a) (b)	56	41	16
Diluted Earnings Per Common Share (a) (b)	56	40	16
Market Price Per Share - High	49.98	44.67	46.94
Market Price Per Share - Low	45.98	39.43	37.57

Third Quarter			
Net Sales	\$5,384.0	\$4,681.7	\$4,247.8
Gross Profit	2,706.8	2,566.8	2,319.1
Net Earnings (c)	680.7	804.1	761.2
Basic Earnings Per Common Share (a) (c)	44	52	49
Diluted Earnings Per Common Share (a) (c)	44	51	48
Market Price Per Share - High	50.00	43.20	45.09
Market Price Per Share - Low	41.57	38.26	37.65

Fourth Quarter			
Net Sales	\$6,047.3	\$5,654.4	\$4,897.3
Gross Profit	3,237.8	3,027.3	2,700.3
Net Earnings	976.4	974.6	941.1
Basic Earnings Per Common Share (a)	63	62	59
Diluted Earnings Per Common Share (a)	63	62	59
Market Price Per Share - High	44.36	47.63	47.51
Market Price Per Share - Low	37.50	40.25	39.95

(a) The sum of the quarters' basic and diluted earnings per share for 2004 does not equal the full year earnings per share amounts due to rounding.

(b) Second quarter 2003 included a pretax charge of \$622 for the settlement of litigation.

(c) Third quarter 2005 includes pretax restructuring charges of \$201.

Management Report on Internal Control Over Financial Reporting

The management of Abbott Laboratories is responsible for establishing and maintaining adequate internal control over financial reporting. Abbott's internal control system was designed to provide reasonable assurance to the company's management and board of directors regarding the preparation and fair presentation of published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Abbott's management assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2005. In making this assessment, it used the criteria set forth in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our assessment, we believe that, as of December 31, 2005, the company's internal control over financial reporting was effective based on those criteria.

Abbott's independent registered public accounting firm has issued an audit report on our assessment of the company's internal control over financial reporting. This report appears on page 64.

February 17, 2006

Reports of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Abbott Laboratories

We have audited the accompanying consolidated balance sheets of Abbott Laboratories and subsidiaries (the Company) as of December 31, 2005, 2004 and 2003, and the related consolidated statements of earnings, shareholders' investment, and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Abbott Laboratories and subsidiaries as of December 31, 2005, 2004 and 2003, and the results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2005, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 17, 2006, expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Deloitte & Touche LLP
Chicago, Illinois
February 17, 2006

To the Board of Directors and Shareholders of Abbott Laboratories

We have audited management's assessment, included in the accompanying Management Report on Internal Control Over Financial Reporting dated February 17, 2006, that Abbott Laboratories and subsidiaries (the Company) maintained effective internal control over financial reporting as of December 31, 2005, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations in internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as of December 31, 2005, is fairly stated, in all material respects, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2005, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2005 of the Company and our report dated February 17, 2006, expressed an unqualified opinion on those financial statements.

Financial Instruments and Risk Management

Interest Rate Sensitive Financial Instruments

At December 31, 2005 and 2004, Abbott had interest rate hedge contracts totaling \$3.1 billion to manage its exposure to changes in the fair value of debt due July 2006 through March 2014. The effect of these hedges is to change the fixed interest rate to a variable rate. Abbott does not use derivative financial instruments, such as interest rate swaps, to manage its exposure to changes in interest rates for its investment securities. As of December 31, 2004, Abbott had \$1.6 billion of domestic commercial paper outstanding with an average annual interest rate of 2.2% with an average remaining life of 38 days. The fair market value of long-term debt at December 31, 2005 and 2004 amounted to \$6.4 billion and \$5.0 billion, respectively (average interest rates of 4.2% and 4.3%, respectively) with maturities through 2023. As of December 31, 2005 and 2004, the fair market value of current and long-term investment securities amounted to \$80 million and \$854 million, respectively. A hypothetical 100-basis point change in the interest rates would not have a material effect on cash flows, income or market values. (A 100-basis point change is believed to be a reasonably possible near-term change in rates.)

Market Price Sensitive Financial Instruments

Abbott maintains a portfolio of available-for-sale equity securities from strategic technology acquisitions. The market value of these investments was approximately \$99 million and \$96 million, respectively, as of December 31, 2005 and 2004. Abbott monitors these investments for other than temporary declines in market value, and charges impairment losses to income when an other than temporary decline in value occurs. A hypothetical 20 percent decrease in the share prices of these investments would decrease their fair value at December 31, 2005 by approximately \$20 million. (A 20 percent decrease is believed to be a reasonably possible near-term change in share prices.)

Non-Publicly Traded Equity Securities

Abbott maintains a portfolio of equity securities from strategic technology acquisitions that are not traded on public stock exchanges. The carrying value of these investments was approximately \$17 million and \$30 million, respectively, as of December 31, 2005 and 2004. No individual investment is in excess of \$9 million. Abbott monitors these investments for other than temporary declines in market value, and charges impairment losses to income when an other than temporary decline in estimated value occurs.

Foreign Currency Sensitive Financial Instruments

Abbott enters into foreign currency forward exchange contracts to manage its exposure to foreign currency denominated intercompany loans and trade payables and third-party trade payables and receivables. The contracts are marked-to-market, and resulting gains or losses are reflected in income and are generally offset by losses or gains on the foreign currency exposure being managed. At December 31, 2005 and 2004, Abbott held \$3.9 billion and \$3.3 billion, respectively, of such contracts, which all mature in the following calendar year.

In addition, certain Abbott foreign subsidiaries enter into foreign currency forward exchange contracts to manage exposures to changes in foreign exchange rates for anticipated intercompany purchases by those subsidiaries whose functional currencies are not the U.S. dollar. These contracts are designated as cash flow hedges of the variability of the cash flows due to changes in foreign exchange rates and are marked-to-market with the resulting gains or losses reflected in Accumulated other comprehensive income (loss). Gains or losses will be included in Cost of products sold at the time the products are sold, generally within the next calendar year. At December 31, 2005 and 2004, Abbott held \$222 million and \$984 million, respectively, of such contracts, which all mature in the following calendar year.

The following table reflects the total foreign currency forward contracts outstanding at December 31, 2005 and 2004.

	2005			2004

Financial Review

Abbott's revenues are derived primarily from the sale of a broad line of health care products under short-term receivable arrangements. Patent protection and licenses, technological and performance features, and inclusion of Abbott's products under a contract or by a pharmacy benefit manager most impact which products are sold, price controls, competition and rebates most impact the net selling prices of products, and foreign currency translation impacts the measurement of net sales. Abbott's primary products are prescription pharmaceuticals, nutritional products and diagnostic testing products. Abbott also owns 50 percent of TAP Pharmaceutical Products Inc (TAP) that Abbott accounts for on the equity method.

The worldwide launch of *HUMIRA*, the spin-off of Hospira, integration and restructuring activities and the loss of patent protection for some products have impacted Abbott's sales, costs and financial position over the last three years.

Subsequent to Abbott's 2001 acquisition of the Knoll pharmaceutical business, which significantly increased the scale of Abbott's pharmaceutical business, Abbott focused on reorganizing and growing its global pharmaceutical business. Abbott has established a global research and development organization and a global manufacturing and distribution organization to serve its domestic and international commercial pharmaceutical operations. Pharmaceutical research and development is focused on five therapeutic areas—immunology, oncology, neuroscience, diabetes/metabolism, and viral diseases. U.S. commercial pharmaceutical operations are focused mainly on primary care and specialty pharmaceuticals. In 2003, Abbott began the worldwide launch of *HUMIRA*, which increased its worldwide sales to \$1.4 billion in 2005 compared to \$852 million in 2004. In 2005, Abbott and Boehringer Ingelheim (BI) amended their agreement whereby Abbott distributed and promoted BI products. Effective January 1, 2006, Abbott will no longer distribute BI products but will receive residual commissions. Abbott's gross margins for BI products from the prior agreement in effect through December 31, 2005 were substantially lower than its average gross margin. 2005 sales of BI products were \$2.3 billion. Increased generic competition resulted in U.S. sales of *Synthroid* declining 22 percent in 2005 while holding a 36 percent market share.

In 2004, Abbott separated its diagnostic segment into four separate divisions—immunoassay/hematology, diabetes care, molecular, and point of care—to better focus on commercial and scientific opportunities. In early 2004, Abbott acquired TheraSense for \$1.2 billion, and began to integrate it with Abbott's diabetes care business. In late 2003, Abbott was informed by the FDA that it may distribute the immunoassay products in the U.S. that were impacted by regulatory restrictions imposed in 1999. Net sales and profits for this business declined over the restricted period, but stabilized in 2004 and 2005. In 2005, Abbott diagnostics launched more than 50 new products. In the Ross segment in 2003, Abbott settled its portion of an industry-wide investigation of the enteral nutritional business for \$614 million.

In 2004, Abbott completed the spin-off of Hospira, Abbott's former hospital products business. Annual sales of Hospira were approximately \$2.4 billion. As part of the spin-off, Hospira assumed \$700 million of debt. The historical operating and cash flow results of Hospira are

presented as discontinued operations. Hospira is contractually obligated to purchase the international hospital assets and operations that were not included in the spin-off. The legal transfer of certain remaining operations and assets (net of liabilities) outside the United States is expected to occur in the first half of 2006.

In early 2006, Abbott reached agreement to acquire Guidant's vascular intervention and endovascular solutions businesses, subject to Boston Scientific's acquisition of Guidant. Guidant's annual revenues from these businesses are approximately \$1 billion. The purchase price would be \$4.1 billion, plus contingent milestone payments of \$500 million.

TAP's contribution to Abbott's earnings declined in 2004 and 2003. A part of the decline was due to increased competition for *Prevacid*, TAP's largest selling product, and due to market contraction for prescription proton pump inhibitors. In 2004, TAP recorded additional litigation reserves of \$125 million for an anticipated legal settlement.

Abbott's short- and long-term debt totaled \$6.6 billion at December 31, 2005, largely incurred to finance acquisitions. Operating cash flows in excess of capital expenditures and cash dividends have allowed Abbott to reduce debt and fund acquisitions over the last three years. At December 31, 2005, Abbott's long-term debt rating was AA by Standard and Poor's and A1 by Moody's Investors Service.

In 2006, Abbott will focus on several key initiatives. In the global pharmaceutical business, Abbott will launch newly approved indications for *HUMIRA*. Abbott will also focus on appropriate market support for *Synthroid*, which became subject to generic U.S. competition in mid-2004, and for sevoflurane, which became subject to generic competition in December 2005. In 2005, TAP received an approvable letter from the FDA for febuxostat. Contingent upon FDA approval, TAP plans to launch febuxostat in 2006. Pharmaceutical research and development efforts will continue to be focused in the five therapeutic areas noted above with a significant portion of the development expenditures allocated to new *HUMIRA* indications. Abbott expects to submit additional pharmaceutical regulatory filings in 2006. In the immunoassay business, attention will be focused on improving revenue growth by capitalizing on recent product launches, including the U.S. launch of the blood screening system, *PRISM*, launching additional products, and commercial execution of the existing broad product portfolio. In the hematology business, attention will be focused on the continued launch of *CELL-DYN Sapphire* and other analyzers. For diabetes care, Abbott will continue the launch of *FreeStyle Connect* and Abbott anticipates the approval of *FreeStyle Navigator* in 2006. Upon closure of the acquisition of Guidant's vascular business, planning for its integration would be a key activity in the vascular business. Focus in this business will also be on the 2005 launch of *Xact Carotid Stent* and *Emboshield Embolic Protection System* and the projected approval of *ZoMaxx*, Abbott's drug-eluting stent, in Europe. With a greater focus on consumer marketing, Ross will maximize the strength of its core brands and further develop its healthy-living market presence. In the other business segments, Abbott will focus on developing or acquiring differentiated technologies in higher growth segments of those markets.

Financial Review

Critical Accounting Policies

Sales Rebates — Approximately 40 percent of Abbott's consolidated gross revenues are subject to various forms of rebates and allowances that Abbott records as reductions of revenues at the time of sale. Most of these rebates and allowances are in two of Abbott's domestic segments—the Pharmaceutical Products segment and the Ross Products segment. Abbott provides rebates to pharmacy benefit management companies, to state agencies which administer the federal Medicaid program and the Special Supplemental Food Program for Women, Infants, and Children (WIC), wholesalers, group purchasing organizations, and other government agencies and private entities. Rebate amounts are usually based upon the volume of purchases using contractual or statutory prices for a product. Factors used in the rebate calculations include the identification of which products have been sold subject to a rebate, which customer or government agency price terms apply, and the estimated lag time between sale and payment of a rebate. Using historical trends, adjusted for current changes, Abbott estimates the amount of the rebate that will be paid, and records the liability as a reduction of gross sales when Abbott records its sale of the product. Settlement of the rebate generally occurs from two to 24 months after sale. Abbott regularly analyzes the historical rebate trends and makes adjustments to reserves for changes in trends and terms of rebate programs. Rebates and chargebacks charged against gross sales in 2005, 2004 and 2003 amounted to approximately \$2.5 billion, \$2.4 billion and \$1.8 billion, respectively, or 22.9 percent, 25.6 percent, and 22.7 percent, respectively, based on gross sales of approximately \$10.9 billion, \$9.3 billion and \$8.0 billion, respectively, subject to rebate. A one-percentage point increase in the percentage of rebates to related gross sales would decrease net sales and operating earnings by approximately \$109 million in 2005. Other allowances charged against gross sales were approximately \$284 million, \$233 million and \$191 million for cash discounts in 2005, 2004 and 2003, respectively, and \$162 million, \$163 million and \$171 million for returns in 2005, 2004 and 2003, respectively. Cash discounts are known within 15 to 30 days of sale, and therefore can be reliably estimated. Returns can be reliably estimated because Abbott's historical returns are low, and because sales returns terms and other sales terms have remained relatively unchanged for several periods.

Management analyzes the adequacy of ending accrual balances each quarter. In the Ross nutritional business, management uses both internal and external data available to estimate the level of inventory in the distribution channel. Management internally estimates the inventory in the retail channel that is not on the retail shelf. A third party continuously measures time on the retail shelf, which is a relatively significant portion of the time inventory is in the distribution channel. Except for a transition period before or after a change in the supplier for the WIC business in a state, inventory in the distribution channel does not vary substantially. Management also estimates the states' processing lag time based on claims data. In addition, internal processing time is a factor in estimating the accrual. In the WIC business, the state where the sale is made, which is the determining factor for the applicable price, is reliably estimable. Estimates are required for the amount of WIC sales within each state where Abbott has the WIC business. External data sources utilized for that estimate are participant data

from the U.S. Department of Agriculture (USDA), which administers the WIC program, participant data from some of the states, and internally administered market surveys. The USDA has been making its data available for many years. Internal data includes historical redemption rates and pricing data. At December 31, 2005, Ross had the exclusive WIC business in 11 states.

In the domestic pharmaceutical business, the most significant charges against gross sales are for Medicaid Rebates, Pharmacy Benefit Manager Rebates and Wholesaler Chargebacks. In order to evaluate the adequacy of the ending accrual balances, management uses both internal and external estimates of the level of inventory in the distribution channel and the rebate claims processing lag time. External data sources used to estimate the inventory in the distribution channel include inventory levels periodically reported by wholesalers and third party market data purchased by Abbott. Management estimates the processing lag time based on periodic sampling of claims data. To estimate the price rebate percentage, systems and calculations are used to track sales by product by customer and to estimate the contractual or statutory price. Abbott's systems and calculations have developed over time as rebates have become more significant, and Abbott believes they are reliable.

The following table is an analysis of the four largest rebate accruals, which comprise approximately 80 percent of the consolidated rebate provisions charged against revenues in 2005. Remaining rebate provisions charged against gross sales are not significant in the determination of operating earnings (dollars in thousands).

	Ross Products WIC Rebates	Pharmaceutical Products		
		Medicaid Rebates	Pharmacy Benefit Manager Rebates	Wholesaler Charge- backs

December 31, 2005	\$ 94,776	\$ 455,003	\$ 134,131	\$ 48,087

Adjustments for prior years' rebate accruals have not been material. Abbott employs various techniques to verify the accuracy of claims submitted to it, and where possible, works with the organizations submitting claims to gain insight into changes that might affect the rebate amounts. For Medicaid and other government agency programs, the calculation of a rebate involves interpretations of relevant regulations, which are subject to challenge or change in interpretation.

Financial Review

Income Taxes — Abbott operates in numerous countries where its income tax returns are subject to audits and adjustments. Because Abbott operates globally, the nature of the audit items are often very complex, and the objectives of the government auditors can result in a tax on the same income in more than one country. Abbott employs internal and external tax professionals to minimize audit adjustment amounts where possible. As part of Abbott's calculation of the provision for taxes on earnings, Abbott records the amount that it expects to incur as a result of audits. Each quarter, Abbott reviews its exposures in accordance with Statement of Financial Accounting Standards (SFAS) No. 5, "Accounting for Contingencies." In the U.S., Abbott's federal income tax returns through 2000 are settled, and the income tax returns for years after 2000 are open. Except for taxes on dividends that were remitted under the American Jobs Creation Act of 2004, Abbott does not record deferred income taxes on earnings reinvested indefinitely in foreign subsidiaries.

Pension and Post-Employment Benefits — Abbott offers pension benefits and post-employment health care to many of its employees. Abbott engages outside actuaries to calculate its obligations and costs under these programs. With the assistance of outside actuaries, Abbott must develop long-term assumptions, the most significant of which are the health care cost trend rate, discount rate and the expected return on plan assets. The discount rate used to measure liabilities as of December 31, 2005 was determined based on high-quality fixed income investments that match the duration of the expected retiree benefits. Prior to December 31, 2005, the discount rate was determined by reference to a composite corporate AA bond index. The health care cost trend rate represents Abbott's expected annual rates of change in the cost of health care benefits and is a forward projection of health care costs as of the measurement date. A difference between the assumed rates and the actual rates, which will not be known for decades, can be significant in relation to the obligations and the annual cost recorded for these programs. Recent low interest rates have significantly increased unrecognized actuarial losses for these plans. At December 31, 2005, the unrecognized actuarial losses for Abbott's defined benefit plans and medical and dental plans were \$1.5 billion and \$698 million, respectively. Unrecognized actuarial losses and gains are amortized over the remaining service periods of the employees under the corridor method, in accordance with the rules for accounting for post-employment benefits. Differences between the expected long-term return on plan assets and the actual annual return are amortized over a five-year period. Footnote 4 to the consolidated financial statements describes the impact of a one-percentage point change in the health care cost trend rate, however, there can be no certainty that a change would be limited to only one percentage point. In 2005, Abbott reversed previously recorded minimum pension liability adjustments of \$562 million because the assets of certain defined benefit plans were now in excess of the accumulated benefit obligations due primarily to plan

contributions in 2005. This resulted in a credit to Accumulated other comprehensive income (loss) of \$346 million, net of taxes. In 2004 and 2003, Abbott recorded minimum pension liability adjustments of \$120 million and \$155 million, respectively, because the accumulated benefit obligations for certain defined benefit plans exceeded the market value of the plans' assets. This resulted in charges to Accumulated other comprehensive income (loss) of \$76 million and \$99 million, net of taxes, in 2004 and 2003, respectively.

Valuation of Intangible Assets — Abbott has acquired and continues to acquire significant intangible assets that Abbott records at fair value. Those assets which do not yet have regulatory approval and for which there are no alternative uses are expensed as acquired in-process research and development, and those that have regulatory approval are capitalized. Transactions involving the purchase or sale of intangible assets occur with some frequency between companies in the health care field, and valuations are usually based on a discounted cash flow analysis using market participant assumptions. Abbott uses a discounted cash flow model to value most of its acquired intangible assets. The discounted cash flow model requires assumptions about the timing and amount of future net cash inflows, risk, the cost of capital, and terminal values. Each of these factors can significantly affect the value of the intangible asset. Abbott engages independent valuation experts who review Abbott's critical assumptions and calculations for significant acquisitions of intangibles. Abbott reviews intangible assets for impairment each quarter using an undiscounted net cash flows approach. If the undiscounted cash flows of an intangible asset are less than the carrying value of an intangible asset, the intangible asset is written down to its fair value, which is usually the discounted cash flow amount. Where cash flows cannot be identified for an individual asset, the review is applied at the lowest group level for which cash flows are identifiable. Goodwill is reviewed for impairment annually or when an event that could result in an impairment of goodwill occurs. At December 31, 2005 goodwill and intangibles amounted to \$5.2 billion and \$4.7 billion, respectively, and amortization expense for intangible assets amounted to approximately \$490 million in 2005. There were no impairments of goodwill in 2005, 2004 or 2003.

Litigation — Abbott accounts for litigation losses in accordance with SFAS No. 5, "Accounting for Contingencies." Under SFAS No. 5, loss contingency provisions are recorded for probable losses at management's best estimate of a loss, or when a best estimate cannot be made, a minimum loss contingency amount is recorded. These estimates are often initially developed substantially earlier than the ultimate loss is known, and the estimates are refined each accounting period, as additional information becomes known. Accordingly, Abbott is often initially unable to develop a best estimate of loss, and therefore the minimum amount, which could be zero, is recorded. As information becomes known, either the minimum loss amount is increased, resulting in additional loss provisions, or a best estimate can be made, also

Financial Review

resulting in additional loss provisions. Occasionally, a best estimate amount is changed to a lower amount when events result in an expectation of a more favorable outcome than previously expected. For its legal proceedings and environmental exposures, Abbott estimates the range of possible loss to be from approximately \$15 million to \$60 million. Reserves of approximately \$35 million have been recorded at December 31, 2005 for these proceedings and exposures. These reserves represent management's best estimate of probable loss, as defined by SFAS No. 5.

Stock Compensation — Through December 31, 2005, Abbott measured compensation cost using the intrinsic value-based method of accounting for stock options and replacement stock options granted to employees and disclosed the impact of the fair value method in the footnotes to the consolidated financial statements. In 2006, Abbott will adopt SFAS No. 123 (revised 2004), "Share-Based Payment," which requires that fair value be recorded in the results of operations. Since there is no market for trading employee stock options, management must use a fair value method. There is no certainty that the results of a fair value method would be the value at which employee stock options would be traded for cash. Fair value methods require management to make several assumptions, the most significant of which are the selection of a fair value model, stock price volatility and the average life of an option. Abbott began preparing for adoption of the new standard in 2004. Abbott has readily available grant-by-grant historical activity for several years in its option administration system. Using this data, Abbott compared valuation results using the binomial method to the Black-Scholes method Abbott had been using and found the results to be comparable. Abbott evaluated whether certain holders of stock options exercised their options differently than other holders and did not find any differentiating pattern among holders. Abbott studied its implied volatility and concluded that a combination of historical and implied volatility will be a better measure than historical volatility alone. Abbott also quantified the additional paid-in capital amount available for use in determining tax effects of early exercise for measurement of tax expense. Abbott will use the modified prospective method of adoption. Under this method, prior years' financial results will not include the impact of recording stock options using fair value. Footnote 10 quantifies the effect of application of fair value to 2005 and prior awards. Based upon the valuation of stock options granted in the 2006 annual grant, which comprise the majority of the grant activity for the year, Abbott estimates the impact of the 2006 change in stock compensation expense on diluted earnings per share of approximately \$0.15, which includes \$0.14 per diluted share for the impact of expensing the fair value of stock options. The 2006 expense for stock compensation is dependent on the number of options granted in the future, the terms of those awards and their fair value, and therefore, the effect on diluted earnings per share could change.

Results of Operations

Sales

The following table details the components of sales growth by segment for the last three years.

Total Net Sales	Total % Change	Components of Change %		
		Price	Volume	Exchange
2005 vs. 2004	13.5	0.1	12.1	1.3
2004 vs. 2003	13.9	1.6	9.1	3.2
2003 vs. 2002	13.1	1.3	7.8	4.0

Total U.S.

2005 vs. 2004	13.0	0.8	12.2	—
2004 vs. 2003	12.8	3.8	9.0	—
2003 vs. 2002	11.6	1.6	10.0	—

Total International

2005 vs. 2004	14.2	(0.7)	12.0	2.9
2004 vs. 2003	15.3	(1.0)	8.9	7.4
2003 vs. 2002	15.1	0.9	5.0	9.2

Pharmaceutical Products Segment

2005 vs. 2004	16.1	1.6	14.5	—
2004 vs. 2003	15.8	7.2	8.6	—
2003 vs. 2002	19.5	3.3	16.2	—

Diagnostic Products Segment

2005 vs. 2004	11.2	(0.7)	9.9	2.0
2004 vs. 2003	11.1	(1.2)	6.9	5.4
2003 vs. 2002	5.0	—	(1.8)	6.8

Ross Products Segment

2005 vs. 2004	8.5	(0.9)	9.4	—
2004 vs. 2003	8.9	(0.5)	9.4	—
2003 vs. 2002	2.3	(0.9)	3.2	—

International Segment

2005 vs. 2004	13.0	(0.3)	10.4	2.9
2004 vs. 2003	15.9	(1.0)	9.5	7.4
2003 vs. 2002	13.5	1.4	3.4	8.7

Financial Review

A comparison of the product group sales by segment is as follows. Percentage changes are versus the prior year and are based on unrounded numbers.

(dollars in millions)	2005	Percent Change	2004	Percent Change	2003	Percent Change
Pharmaceutical Products						
Primary Care	\$4,788	18	\$4,041	22	\$3,324	26
Specialty	2,908	18	2,460	28	1,915	23
Diagnostic Products						
Immunochemistry	2,187	2	2,141	2	2,094	3
Diabetes Care	1,067	35	791	46	542	10
Ross Products						
Pediatric Nutritionals	1,097	(4)	1,146	5	1,093	9
Adult Nutritionals	1,077	15	934	15	809	(3)
International						
Other Pharmaceuticals	3,656	15	3,184	21	2,629	15
Anti-infectives	838	4	804	5	766	10
Hospital Pharmaceuticals	669	13	592	15	516	18
Pediatric Nutritionals	698	17	595	13	527	8
Adult Nutritionals	715	8	663	12	591	12

Sales in the Pharmaceutical Products segment of *Mobic*, *Tricor*, *Omnicef* and *Flomax* favorably impacted Primary Care Products sales, and increased sales of *HUMIRA* favorably impacted Specialty Products sales. U.S. sales of *Synthroid*, which is now subject to generic competition, were \$498 million, \$637 million, and \$565 million in 2005, 2004 and 2003, respectively. Increased sales of *HUMIRA* and *Kaletra* also favorably impacted Other Pharmaceuticals sales in the International Segment in 2005 and 2004. Worldwide sales of *HUMIRA* totaled \$1.4 billion in 2005, \$852 million in 2004 and \$280 million in 2003. Diagnostic Products and International segment products sales were favorably impacted in 2005, 2004 and 2003 by the effect of the relatively weaker U.S. dollar. Diabetes Care product sales for the Diagnostic Products segment were favorably impacted by the acquisition of TheraSense in the second quarter of 2004. In addition, Adult Nutritionals product sales for the Ross Products segment were favorably impacted by the acquisitions of ZonePerfect in the third quarter of 2003 and EAS in the fourth quarter of 2004. The decrease in sales for pediatric nutritionals in 2005 was primarily due to overall infant nutritionals non-WIC category decline and competitive share loss. Abbott has periodically sold product rights to non-strategic products and has recorded the related gains in net sales in accordance with Abbott's revenue recognition policies as discussed in footnote 1 to the consolidated financial statements. Related net sales were \$177 million in 2005, \$144 million in 2004 and \$241 million in 2003. Sales of new products in 2005 are estimated to be approximately \$1.6 billion, led by *HUMIRA* in the Pharmaceutical Products and International segments and incremental sales of approximately \$260 million from the 2004 acquisitions of TheraSense and EAS.

The expiration of licenses, patent protection and generic competition can affect the future revenues and operating income of Abbott. Significant ongoing generic activities, and significant patent and license expirations in the next three years are as follows. The U.S. composition of matter patent for *Depakote* expires in 2008. The Pharmaceutical Products segment's sales of *Depakote* in 2005 were \$1 billion. The Pharmaceutical Products segment has an agreement with Boehringer Ingelheim to co-promote and distribute three of its products. In 2005, Abbott and Boehringer Ingelheim amended the agreement. Effective January 1, 2006, Abbott no longer distributes or records sales for the Boehringer Ingelheim products, but will continue to co-promote one product, *Micardis*, through March 31, 2006, and will receive residual commissions on Boehringer Ingelheim's sales of the three products. The amount of pretax income under the amended agreement will be the same as expected under the previous agreement. Net sales of Boehringer Ingelheim products in 2005 were approximately \$2.3 billion. In the second quarter 2004, the FDA granted approval for generic competition to *Synthroid* and generic competitors have entered the market. In 2004 and 2005, clarithromycin became subject to generic competition in several European markets. International segment sales of clarithromycin in 2005 were \$760 million. In the U.S., the Pharmaceutical Products segment markets clarithromycin in two forms, the immediate release and the extended release forms, both of which are covered by additional non-composition of matter patents. In May 2005, the composition of matter patent on clarithromycin in the U.S. expired, and several immediate release generic products were launched by competitors. Manufacturers of the extended release forms of clarithromycin were enjoined from entering the U.S. market due to Abbott's non-composition of matter patents. U.S. sales of clarithromycin in 2005 and 2004 were \$306 million and \$458 million, respectively. There may be further generic competition for clarithromycin in the U.S. and other countries in 2006 depending on the results of legal proceedings related to the patents. Upon the December 2005 expiration of a court order related to licenses for sevoflurane, Baxter is now permitted to market a competitive form of sevoflurane. In addition, sevoflurane has been subject to generic competition from other competitors in isolated markets outside of the U.S. and further generic competition in international markets is possible. Worldwide sales of sevoflurane in 2005 were \$87.4 million. The composition of matter patent for *Omnicef* expires in May 2007. Abbott holds an additional non-composition of matter patent that expires in 2011. The Pharmaceutical Products segment sales of *Omnicef* in 2005 were \$495 million. In mid 2006, the Ross segment's co-promotion agreement for *Synagis* will terminate. U.S. co-promotion revenues were \$231 million in 2005. Abbott will continue to market *Synagis*, and will market its follow-on product, *Numax*, in select international markets and will receive residual commissions on U.S. sales of *Synagis*.

Financial Review

Operating Earnings

Gross profit margins were 52.4 percent of net sales in 2005, 54.9 percent in 2004 and 55.0 percent in 2003. The decrease in the gross profit margin in 2005 was due to unfavorable product mix, primarily as a result of increased sales of Boehringer Ingelheim products that have lower margins than other products in the Pharmaceutical Products segment. Restructuring charges, discussed below, reduced the gross profit margin in 2005 by 0.8 percentage points. The gross profit margin in 2004 was impacted by the favorable mix effect of exchange on the gross profit margin and by unfavorable product mix, primarily increased sales of lower margin Boehringer Ingelheim products, as discussed above, in the Pharmaceutical Products segment. The gross profit margin for 2003 was impacted by a charge of \$88 million for an impairment of assets and other expenses as a result of a lower sales forecast for *Abbokinase*, partially offset by favorable product mix, resulting mainly from increased sales in the Pharmaceutical Products segment. Gross profit margins in all years were also affected by productivity improvements, higher project expenses for new products, higher manufacturing capacity costs for anticipated unit growth, and the effects of inflation and competitive pricing pressures.

In the U.S., states receive price rebates from manufacturers of infant formula under the federally subsidized Special Supplemental Food Program for Women, Infants, and Children. There are also rebate programs for pharmaceutical products. These rebate programs continue to have a negative effect on the gross profit margins of the Ross and Pharmaceutical Products segments. In addition, pricing pressures unfavorably impacted the gross profit margins for the Ross Products segment in 2005, 2004 and 2003.

The gross profit margins for the Pharmaceutical Products segment were unfavorably impacted in 2005 and 2004 by unfavorable product mix and favorably impacted in 2003 by favorable product mix. The unfavorable product mix in 2005 and 2004 was due primarily to increased sales of lower margin Boehringer Ingelheim products and higher other manufacturing costs. The gross profit margin in 2003 for the Diagnostic Products segment was impacted by the effects of a FDA consent decree.

Research and development expense, excluding acquired in-process research and development, was \$1.8 billion in 2005, \$1.7 billion in 2004 and \$1.6 billion in 2003 and represented increases of 7.3 percent in 2005, 4.5 percent in 2004 and 10.1 percent in 2003. The majority of research and development expenditures are concentrated on pharmaceutical products.

Selling, general and administrative expenses increased 11.7 percent in 2005 compared to increases of 2.4 percent in 2004 and 29.1 percent in 2003. The restructuring charges discussed below and an increase in a bad debt reserve associated with an unfavorable court ruling increased the percent change from 2004 by 2.7 percentage points in 2005. In 2003, Abbott recorded in selling, general and administrative expenses, a pretax charge of \$614 million related to the settlement of the Ross enteral nutritional investigation. This 2003 charge reduced

the increase in selling, general and administrative expenses by 15.0 percentage points for 2004 and increased selling, general and administrative expenses by 16.5 percentage points over 2002. The increases in selling, general and administrative expenses, excluding the restructuring charges and the charge for the investigation, were due primarily to increased selling and marketing support for new and existing products, including commercial activities related to sales force expansion and product launches, including Abbott's carotid stent and new *HUMIRA* indications. These increases also reflect the effects of the acquisitions of TheraSense and EAS in 2004. Increases in all three years also reflect inflation and additional selling and marketing support primarily in the Pharmaceutical Products and International segments.

Restructurings

(dollars in millions)

In 2005, Abbott management approved plans to realign its global manufacturing operations and selected domestic and international commercial operations. In 2005, Abbott recorded pretax charges against earnings of approximately \$256 reflecting the impairment of manufacturing facilities and other assets, employee severance and other related charges. Approximately \$174 is classified as cost of products sold, \$10 as research and development and \$72 as selling, general and administrative. An additional \$14 was subsequently recorded in 2005 relating to these restructurings, primarily for accelerated depreciation. As a result of product re-registration timelines required under manufacturing regulations in a number of countries, manufacturing related realignments are expected to continue into 2007.

The following summarizes the restructuring activity for the global pharmaceutical manufacturing operations restructuring.

	Employee- Related and Other	Asset Impairments	Total
2005 restructuring charges	\$44.1	\$52.7	\$96.8
Payments and impairments	(10.3)	(52.7)	(53.0)
Accrued balance at December 31, 2005	\$43.8	\$—	\$43.8

The following summarizes the restructuring activity for all other restructurings, which are individually not material.

	Employee- Related and Other	Asset Impairments	Total
2005 restructuring charges	\$147.6	\$11.1	\$158.7
Payments and impairments	(36.6)	(11.1)	(47.7)
Accrued balance at December 31, 2005	\$111.0	\$—	\$111.0

Abbott expects to incur up to an additional \$150 in future periods for restructuring plans, primarily for accelerated depreciation and plant and equipment dispositions.

Financial Review

(Income) from TAP Pharmaceutical Products Inc. Joint Venture

Abbott's income from the TAP Pharmaceutical Products Inc. joint venture was lower in 2005 and 2004 compared to 2003 due to decreased sales due to market contraction for prescription proton pump inhibitors, and in 2004 by approximately \$40 million as a result of an agreement with plaintiffs to settle litigation.

Net Interest Expense

Net interest expense increased in 2005 and 2004 due to the impact of higher interest rates on debt levels, partially offset by higher interest income. Net interest expense decreased in 2003 due to a lower level of borrowings and lower interest rates.

Taxes on Earnings

The effective income tax rates on income from continuing operations were 27.0 percent in 2005, 23.0 percent in 2004 and 26.1 percent in 2003. In 2005, Abbott remitted \$4.3 billion of foreign earnings in accordance with the American Jobs Creation Act of 2004 and recorded additional tax expense of \$245 million, which increased the effective tax rate by approximately 5.3 percentage points. This was partially offset by adjustments of prior years' tax accounts resulting primarily from resolution of prior years' accrual requirements, which decreased the effective tax rate by 2.3 percentage points. The effective tax rate for 2004 reflects adjustments of prior years' tax requirements primarily as a result of resolutions of prior years' tax audits and the effect of non-deductible acquired in-process research and development. The effect of these items for 2004 was to decrease the effective tax rate by approximately 1.2 percentage points. The effective tax rate for 2003 includes the effect of the charge for the settlement of the Ross enteral nutritional investigation and the charges for acquired in-process research and development. The effect of these charges for 2003 was to increase the effective tax rate by approximately 2.4 percentage points. Abbott expects to apply an annual effective rate of between 23.5 percent and 24.0 percent in 2006.

Spin-off of Abbott's Core Hospital Products Business

On April 12, 2004, Abbott's Board of Directors declared a special dividend distribution of all of the outstanding shares of common stock of Hospira, Inc., payable on April 30, 2004. Hospira included the operations relating to the manufacture and sale of hospital products including specialty injectable pharmaceuticals, medication delivery systems and critical care devices and injectable pharmaceutical contract manufacturing. Hospira included Abbott's Hospital Products segment, after that segment's reorganization on January 1, 2004, and portions of Abbott's International segment. The income and cash flows of Hospira and the direct transaction costs of the spin-off have been presented as discontinued operations in the Consolidated Statement of Earnings and Statement of Cash Flows. Prior years' balance sheets have not been adjusted to reflect the effect of the spin-off.

The legal transfer of certain remaining operations and assets (net of liabilities) outside the United States is expected to occur in the first half of 2006. These operations and assets are used in the conduct of Hospira's international business and Hospira is subject to the risks and entitled to the benefits generated by these operations and assets.

These assets and liabilities have been presented as held for sale in the Consolidated Balance Sheets as of December 31, 2005 and 2004. The assets and liabilities held for sale consist primarily of inventories, trade accounts receivable, equipment and trade accounts payable, salaries and other accruals.

Abbott has retained liabilities for taxes on income prior to the spin-off, defined benefit, post-employment medical and dental plan obligations and assets, as of the spin-off, for most of Hospira's U.S. retired employees and U.S. retirement eligible employees and certain potential liabilities, if any, related to alleged improper pricing practices prior to the spin-off in connection with federal, state and private reimbursement for certain drugs.

Business Combinations and Technology Acquisitions

In 2005, Abbott acquired the remaining interest in a small medical products company that was previously accounted for under the equity method of accounting and a less than 50 percent equity interest in a small medical products company. The aggregate cash purchase price was approximately \$25 million. Acquisition accounting resulted in the recording of non-tax deductible goodwill of approximately \$69 million, intangible assets of approximately \$22 million and a charge of approximately \$17 million for acquired in-process research and development. In 2005, Abbott acquired additional rights related to HUMIRA for approximately \$270 million, which will be amortized over 13 years.

In 2004, Abbott paid approximately \$2.3 billion for strategic business and technology acquisitions, as follows: Abbott acquired TheraSense, Inc., a leader in the development, manufacturing and marketing of blood glucose self-monitoring systems, for approximately \$1.2 billion in cash; i-STAT Corporation, a manufacturer of point-of-care diagnostic products for blood analysis, for approximately \$394 million in cash; EAS, a nutritional company with a portfolio of nationally recognized brands, for approximately \$320 million in cash, and Spine Next, a manufacturer of orthopedic spinal implant devices, for approximately \$58 million in cash plus additional milestone payments of up to \$23 million upon achievement of future targets. Abbott also acquired certain other product technologies for approximately \$352 million. These acquisitions resulted in a charge of \$271 million for acquired in-process research and development, intangible assets of approximately \$1.3 billion, non-tax deductible goodwill of approximately \$923 million and deferred income taxes of approximately \$406 million. Acquired intangible assets, primarily trade names, are amortized over 5 to 20 years (average of approximately 14 years).

In 2003, Abbott paid approximately \$459 million for strategic business and technology acquisitions, as follows: Abbott acquired ZonePerfect Nutrition Company, a marketer of healthy and nutritious products for active people, for approximately \$160 million in cash; Integrated Vascular Systems, Inc., a developer of a novel vessel closure technology, for approximately \$65 million in cash, and Spinal Concepts Inc., a marketer of spinal fixation products used in the treatment of spinal disorders, diseases and injuries, for approximately \$166 million in cash.

Financial Review

plus additional milestone payments of up to \$40 million if agreed upon targets are met. Abbott also acquired the assets of JOMED N.V.'s coronary and peripheral interventional business for approximately \$68 million in cash. These acquisitions resulted in a charge of approximately \$100 million for acquired in-process research and development, intangible assets of approximately \$222 million and non-tax deductible goodwill of approximately \$182 million. Acquired intangible assets, primarily product technology, are amortized over 9 to 25 years (average of approximately 16 years).

Had the above acquisitions taken place on January 1 of the previous year, consolidated sales and income would not have been significantly different from reported amounts.

In early 2006, Abbott agreed to acquire Guidant's interventional vascular and endovascular solutions businesses for \$4.1 billion in connection with Boston Scientific's acquisition of Guidant. Abbott would also pay \$250 million each upon government approvals to market Guidant's drug-eluting stent in the U.S. and in Japan. In addition, Abbott agreed to provide Boston Scientific a \$900 million 4 percent loan and to acquire \$1.4 billion of Boston Scientific common stock directly from Boston Scientific contingent upon the closing of the Guidant acquisition. The acquisition is expected to be completed in the first half of 2006.

Financial Condition

Cash Flow

Net cash from operating activities of continuing operations amounted to \$5.0 billion, \$4.3 billion and \$3.4 billion in 2005, 2004 and 2003, respectively. In 2005, 2004 and 2003, \$641 million, \$482 million and \$200 million, respectively, was contributed to the main domestic defined benefit plan. In addition, Abbott transferred approximately \$45 million to Hospira in 2004 in accordance with the employee benefit agreement governing the assumption by Hospira of certain defined benefit plan assets and liabilities. Abbott expects pension funding for its main domestic pension plan in 2006 to 2011 to be between \$200 million and \$400 million annually. The increased contribution in 2005 was due, in part, to the investment of cash remitted under the American Jobs Creation Act of 2004.

Debt and Capital

At December 31, 2005, Abbott's long-term debt rating was AA by Standard and Poor's and A1 by Moody's Investors Service. Abbott has readily available financial resources, including unused lines of credit of

\$3.0 billion, which support domestic commercial paper borrowing arrangements. Subsequent to the announced potential acquisition of Guidant's vascular intervention and endovascular solutions businesses, Standard and Poor's affirmed their current debt ratings for Abbott and maintained their current "stable" outlook. Moody's Investors Service indicated they would likely affirm their current debt ratings for Abbott and would likely change their current outlook from "stable" to "negative."

In October 2004, the Board of Directors authorized the purchase of 50 million shares of Abbott's common stock from time to time and no shares were purchased under this authorization in 2004. In 2005, Abbott purchased approximately 30 million of its common shares under this authorization at a cost of approximately \$1.3 billion. In 2004 and 2003, Abbott purchased approximately 11.7 million and 2.7 million, respectively, of its common shares at a cost of approximately \$500 million and \$98 million, respectively, under a prior authorization.

In 2005, Abbott borrowed \$1.9 billion of long-term debt that matures in May 2008 with variable interest rates above LIBOR. Proceeds from this debt were invested in short-term investments. Abbott issued \$1.5 billion of long-term debt in 2004 that matures in 2009 through 2014 with interest rates ranging from 3.5 percent to 4.35 percent. Proceeds from this debt were used to fund the acquisition of TheraSense and to pay down domestic commercial paper borrowings.

Abbott retained \$700 million of proceeds from borrowings that Hospira assumed as a result of the spin-off and used these proceeds to reduce domestic commercial paper borrowings. In addition, Abbott retired long-term debt of \$1.65 billion in 2004 with proceeds from domestic commercial paper borrowings.

Working Capital

Working capital was \$4.0 billion at December 31, 2005, \$3.9 billion at December 31, 2004 and \$2.7 billion at December 31, 2003.

Capital Expenditures

Capital expenditures of \$1.2 billion in 2005, \$1.3 billion in 2004 and \$1.1 billion in 2003 were principally for upgrading and expanding manufacturing, research and development, investments in information technology and administrative support facilities in all segments, and for laboratory instruments placed with customers.

Contractual Obligations

The following table summarizes Abbott's estimated contractual obligations as of December 31, 2005.

(dollars in millions)	Payment Due By Period				
	Total	2006	2007-2008	2009-2010	2011 and Thereafter
Long-term debt, including current maturities and future interest payments	\$ 7,237	\$2,080	\$3,036	\$ 730	\$1,391
Operating lease obligations	348	86	119	57	86
Capitalized auto lease obligations	106	35	71	—	—
Purchase commitments (a)	1,454	1,311	99	32	12
Other long-term liabilities reflected on the consolidated balance sheet —					
Benefit plan obligations	1,275	—	208	217	850
Other	1,305	—	393	208	704
Total	\$11,725	\$3,512	\$3,926	\$1,244	\$3,043

(a) Purchase commitments are for purchases made in the normal course of business to meet operational and capital expenditure requirements.

Financial Review

Contingent Obligations

Abbott has periodically entered into agreements in the ordinary course of business, such as assignment of product rights, with other companies which has resulted in Abbott becoming secondarily liable for obligations that Abbott was previously primarily liable. Since Abbott no longer maintains a business relationship with the other parties, Abbott is unable to develop an estimate of the maximum potential amount of future payments, if any, under these obligations. Based upon past experience, the likelihood of payments under these agreements is remote. In addition, Abbott periodically acquires small companies in which Abbott agrees to pay contingent consideration based on attaining certain thresholds.

As previously noted, in connection with the potential acquisition of certain Guidant businesses, Abbott has agreed to acquire up to \$6.9 billion of assets, comprised of \$4.1 billion for the businesses, up to \$500 million in milestone payments, a \$900 million loan to Boston Scientific, and \$1.4 billion of Boston Scientific common stock.

In connection with the spin-off of Hospira, Abbott has retained liabilities for taxes on income prior to the spin-off and certain potential liabilities, if any, related to alleged improper pricing practices in connection with federal, state and private reimbursement for certain drugs.

Recently Issued Accounting Standards

In 2006, Abbott must adopt Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), "Share-Based Payment," which requires that the fair value of stock options granted to employees be recorded in the results of operations. Abbott will use the modified prospective method of adoption. Under this method, prior years' financial results will not include the impact of recording stock options using fair value. Footnote 10 quantifies the effect of application of fair value to 2005 and prior awards. Based upon the valuation of stock options granted in the 2006 annual grant, which comprise the majority of the grant activity for the year, Abbott estimates the impact of the 2006 change in stock compensation expense on diluted earnings per share of approximately \$0.15, which includes \$0.14 per diluted share for the impact of expensing the fair value of stock options. The 2006 expense for stock compensation is dependent on the number of options granted in the future, the terms of those awards and their fair value, and therefore, the effect on diluted earnings per share could change.

In May 2005, the Financial Accounting Standards Board (FASB) issued SFAS No. 154, "Accounting Changes and Error Corrections." This statement generally requires retrospective application to prior periods' financial statements of voluntary changes in accounting principles. Under the prior rules, changes in accounting principles were generally recognized by including in net income of the period of the change

the cumulative effect of changing to the new accounting principle. This statement does not change the previous requirements for reporting the correction of an error in previously issued financial statements, change in accounting estimate or justification of a change in accounting principle on the basis of preferability. This statement is effective for accounting changes made in fiscal years beginning after December 15, 2005. Adoption of the provisions of the statement is not expected to have a material effect on the results of operations or financial position of Abbott.

In November 2004, the FASB issued SFAS No. 151, "Inventory Costs." This statement clarifies the accounting for the abnormal amount of idle facilities expense, freight, handling costs and wasted material. This statement requires that those items be recognized as current-period expense. In addition, the statement requires that allocation of fixed overhead to the cost of conversion be based on the normal capacity of the production facilities. This statement is effective for inventory costs incurred after December 31, 2005. Adoption of this statement will not have a material effect on the financial statements of Abbott.

Legislative Issues

Abbott's primary markets are highly competitive and subject to substantial government regulation. Abbott expects debate to continue in the U.S. at both the federal and the state levels over the availability, method of delivery, and payment for health care products and services. Abbott believes that if further legislation is enacted, it could have the effect of reducing access to health care products and services, or reducing prices or the rate of price increases for health care products and services. International operations are also subject to a significant degree of government regulation. It is not possible to predict the extent to which Abbott or the health care industry in general might be adversely affected by these factors in the future. A more complete discussion of these factors is contained in Item 1, Business, and Item 1A, Risk Factors on Form 10-K.

Private Securities Litigation Reform Act of 1995 — A Caution Concerning Forward-Looking Statements

Under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, Abbott cautions investors that any forward-looking statements or projections made by Abbott, including those made in this document, are subject to risks and uncertainties that may cause actual results to differ materially from those projected. Economic, competitive, governmental, technological and other factors that may affect Abbott's operations are discussed in Exhibit 99.1 to the Annual Report on Form 10-K.

Summary of Selected Financial Data

(dollars in millions except per share data)

Year ended December 31	2005	2004	2003	2002	2001	2000

Shareholder and Corporate Information

Stock Listing

The ticker symbol for Abbott's common stock is ABI. It is listed on the New York, Chicago, Pacific, London and Swiss exchanges. It is traded on the Boston, Cincinnati and Philadelphia exchanges.

Quarterly Dividend Dates

Dividends are expected to be declared and paid on the following schedule in 2006, pending approval by the board of directors:

Quarter	Declared	Record	Paid
First	2/17	4/13	5/15
Second	6/16	7/14	8/15
Third	9/8	10/13	11/15
Fourth	12/8	1/15/07	2/15/07

Tax Information for Shareholders

Tax information regarding the Hospira spinoff is available online at www.abbottinvestor.com

Abbott is an Illinois High Impact Business and is located in a U.S. Federal Foreign Trade Sub-Zone (Sub-Zone 22F). Dividends may be eligible for a subtraction from base income for Illinois income tax purposes.

If you have any questions, please contact your tax advisor.

Dividend Reinvestment Plan

The Abbott Dividend Reinvestment Plan offers registered shareholders an opportunity to purchase additional shares, commission-free, through automatic dividend reinvestment and/or optional cash investments. Interested persons may contact the transfer agent, call Abbott's Investor Newsline or write Abbott Shareholder Services.

Dividend Direct Deposit

Shareholders may have quarterly dividends deposited directly into a checking or savings account at any financial institution that participates in the Automated Clearing House system. For more information, please contact the transfer agent, call the Investor Newsline or write Abbott Shareholder Services.

Annual Meeting

The annual meeting of shareholders will be held at Abbott's corporate headquarters on Friday, April 28, 2006, at 9 a.m. Questions regarding the annual meeting may be directed to the Corporate Secretary.

A copy of Abbott's 2005 Form 10-K Annual Report, as filed with the Securities and Exchange Commission, is available on the Abbott Web site at www.abbott.com or by contacting the Investor Newsline.

CEO and CFO Certifications

In 2005, Abbott's chief executive officer (CEO) provided to the New York Stock Exchange the annual CEO certification regarding Abbott's compliance with the New York Stock Exchange's corporate governance listing standards. In addition, Abbott's CEO and chief financial officer filed with the U.S. Securities and Exchange Commission all required certifications regarding the quality of Abbott's public disclosures in its fiscal 2005 reports.
