CLOSE BROTHERS FINANCE plc

REPORT OF THE DIRECTORS

The Company is a wholly owned subsidiary of Close Brothers Limited ("CBL"), which is itself a wholly owned subsidiary of Close Brothers Group plc ("CBG"), the ultimate parent undertaking. The Company operates as part of the CBL group which provides a range of banking services.

Business review and principal activities

The Company is a finance company. There have not been any significant changes in the Company's principal activities during the year. Although in 2011 the Company brought back the floating rate note it issued in 2005, it continues to operate as a funding vehicle for the CBL group. The directors are not aware of any likely major changes in the Company's activities in the next year.

As shown in the Company's profit and loss account on page 6, interest income has decreased by 100% over prior year, similarly interest expense has decreased 100% over the same period. This was largely due to the debt security being brought back in February 2011. There was neither a profit nor a loss for the year.

No dividend has been proposed by the directors for the current year (2011 Nil).

CBL manages its operations on a divisional basis. For this reason, the Company's directors believe that further key performance indicators for the Company are not necessary or appropriate for an understanding of its development, performance or position. The performance of CBL, the parent company, is presented in its Annual Report which also includes the results of this company. The Company exists as a funding vehicle for the group and does not generate profit and loss on its own account. Therefore key performance indicators for this company are not necessary.

Going concern

After making enquiries, the directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the financial statements.

Further details regarding the adoption of the going concern basis can be found in the accounting policies in note 1 of the financial statements.

Financial risk management objectives and policies

The company's purpose is to act as a funding vehicle for the CBL Group. It issues third party debt. The company's previous issue of third party debt was brought back by the Company during the previous year and no further debt has been issued. Risks and uncertainties are further disclosed in note 9 to the financial statements.

Environment

Because the Company has no physical activities, its impact on the environment is negligible.

Employees

The Company has no employees.

Directors

The directors, who served throughout the year were as follows:

Mr S R Hodges
Mr M P Hook

Creditors payment policy

It is the Company's policy to settle all debts with its suppliers of goods and services on a timely basis, taking account of the credit period given by each supplier. At 31 July 2012 there were no unpaid suppliers of goods and services (2011 Nil).

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). Going concern

The Company's financial risk management objectives and its exposure to credit risk and liquidity risk have been set out in note 9.

Interest receivable

Interest receivable and payable is recognised in the profit and loss account using the effective interest rate method. This method applies a rate that discounts estimated future cash payments or receipts to the net carrying amount of the financial instrument. When calculating the effective interest rate, the cash flows take into account all contractual terms of the financial instrument including transaction costs and all other premiums or discounts but not future credit losses.

Segmental analysis

All income, profits and net assets relate to financing activities located in the United Kingdom. All the activities of the Company are classified as continuing.

Capital instruments

Financial risk management objectives

The Company is exposed to financial risks through its financial assets and financial liabilities. The most important components of financial risk are market risk, credit risk and liquidity risk.

CLOSE BROTHERS FINANCE plc**NOTES TO THE FINANCIAL STATEMENTS – YEAR ENDED 31 JULY 2012 (continued)****9 FINANCIAL INSTRUMENTS (continued)**Market risk

The Company's activities expose it primarily to the financial risks of changes in interest rates and foreign currency exchange rates. The Company is a funding vehicle, whereby the funds raised from loan notes issued to third parties would be transferred to the parent Company on the same economic terms as that of the loan note. Due to this the interest rate and foreign currency exchange rate risks for the Company are negligible.

Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. As the counterparty is a group company, credit risk is minimal.

No amounts are past due but not impaired.

Liquidity risk

Liquidity risk is the potential that obligations cannot be met as they fall due as a consequence of having a timing mismatch. The Company is not exposed to this risk as the loan note was brought back in the previous year.

The parent undertaking of the largest group of undertakings for which group financial statements are drawn up and of which the company is a member is Close Brothers Group plc, the ultimate parent undertaking and controlling party, which is a listed company registered in England and Wales, and the parent undertaking of the smallest such group is Close Brothers Limited, registered in England and Wales.
