Auto Insulations Limited

Notes to the abbreviated financial statements for the period ended 30 September 2005

1. Accounting policies

Accounting convention

The accounts are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2005).

Turnover

Turnover comprises property rental and plant and machinery rental income. The amount included represents amounts receivable for the year on an accruals basis excluding value added tax.

Tangible fixed assets and depreciation

Depreciation is provided at rates calculated to write off the cost less residual value of each asset over its expected useful life, as follows:

Land and buildings	-	1% reducing balance
Plant and machinery	-	12.5% reducing balance

Leasing and hire purchase commitments

Assets obtained under hire purchase contracts and finance leases are capitalised as tangible assets and depreciated over the shorter of the lease term and their useful lives. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the profit and loss account so as to produce constant periodic rates of charge on the net obligations outstanding in each period.

Deferred taxation

Provision is made for deferred taxation using the liability method to take account of timing differences between the incidence of income and expenditure for taxation and accounting purposes except to the extent that the directors consider that a liability to taxation is unlikely to materialise.
