M Wood (Director)

Company registration number: 04751663

IB WOOD & SONS LIMITED
Notes to the Financial Statements
For the year ended 31 December 2023

(1) General Information

The company is a private company limited by shares and is registered in England and Wales. The address of the registered office is Agincourt House, 14 Clytha Park Road, Newport, Wales, NP20 4PB.

(2) Statement of compliance

These individual financial statements have been prepared in accordance with FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" Section 1A and Companies Act 2006, as applicable to companies subject to the small companies' regime.

(3) Significant Accounting Policies

Basis of Preparation

The financial statements have been prepared on the historical cost basis and in accordance with the Companies Act 2006. The presentation and functional currency of the company is pounds sterling. The financial statements are presented in pound units (£) unless stated otherwise.

Revenue recognition

Turnover is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods supplied and services rendered, stated net of discounts and of Value Added Tax. The company recognises revenue when the amount of revenue can be measured reliably, when it is probable that future economic benefits will flow to the entity and when specific criteria have been met as described below.

Sale of goods

Sales of goods are recognised when the company has delivered the goods to the customer, no other significant obligation remains unfulfilled that may affect the customer's acceptance of the products and risks and rewards of ownership have transferred to them.

Borrowing costs

All borrowing related costs are included within the statement of income in the period in which they are incurred using the effective interest method.

Intangible fixed assets

Intangible fixed assets (including purchased goodwill and patents) are included at cost less accumulated amortisation.

Goodwill

Goodwill arises on business acquisitions and represents the excess of the cost of the acquisition over the company's interest in the net amount of the identifiable assets, liabilities and contingent liabilities of the acquired business.

Goodwill recognised at acquisition is measured at cost less accumulated amortisation and

accumulated impairment losses. Goodwill is amortised on a straight-line basis over its useful life, which is estimated to be 20 years. Goodwill amortisation is included within administration expenses.

Property, plant and equipment

Property, plant and equipment is stated at cost less accumulated depreciation and impairment losses. Part of an item of property, plant and equipment having different useful lives are accounted for as separate items.

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Depreciation is provided to write off the cost less estimated residual value, of each asset over its expected useful life as follows:

Asset class and depreciation rate

Land and Buildings	2% straight line
Plant and Machinery	10% reducing balance
Fixtures and Fittings	25% straight line
Equipment	20% straight line

Investments in subsidiaries, jointly controlled entities or associates

Investments in subsidiaries, jointly controlled entities or associates are accounted for at cost less provision for impairment.

Inventories

Inventories are measured at the lower of cost and net realisable value. Costs of inventories are determined on a first-in-first-out basis. Net realisable value represents the estimated selling price for inventories less all estimated costs necessary to make the sale.

Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The company as lessee

Assets held under finance leases are initially recognised as assets of the company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in the income statement.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. In the event that lease incentives are received to enter into operating leases, the aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis over the lease period.

Taxation

Taxation expense represents the aggregate amount of current tax and deferred tax recognised

in the reporting period.

Current Tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the income statement because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Employee benefits

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

(4) Employees

During the year, the average number of employees including director was 8 (2022 : 6).
