Notes to the Abbreviated Accounts

For the year ending 30 June 2014

1 Accounting policies**Basis of accounting**

The financial statements have been prepared under the historical cost convention, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

The turnover shown in the profit and loss account represents amounts invoiced during the year, exclusive of Value Added Tax.

Amortisation

Amortisation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows: Goodwill-10% straight line

Hire purchase agreements

Assets held under hire purchase agreements are capitalised and disclosed under tangible fixed assets at their fair value. The capital element of the future payments is treated as a liability and the interest is charged to the profit and loss account on a straight line basis.

Fixed Assets

All fixed assets are initially recorded at cost.

Financial Instruments

Compound instruments Compound instruments comprise both a liability and an equity component. At date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar debt instrument. The liability component is accounted for as a financial liability. The residual is the difference between the net proceeds of issue and the liability component (at time of issue). The residual is the equity component, which is accounted for as an equity instrument. The interest expense on the liability component is calculated applying the effective interest rate for the liability component of the instrument. The difference between this amount and any repayments is added to the carrying amount of the liability in the balance sheet.

Depreciation

Depreciation has been provided at the following rates in order to write off the assets over their estimated useful lives.
