Notes to the Abbreviated Accounts

For the year ending 31 July 2012

1 **Accounting policies**

Basis of accounting

The financial statements have been prepared under the historical cost convention, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover comprises the value of sales excluding value added tax and trade discounts.

Investment properties

Investment properties are shown at their open market value. The surplus or deficit arising from revaluations is transferred to the investment revaluation reserve unless a deficit, or its reversal, on an individual investment property is expected to be permanent, in which case it is recognised in the profit and loss account for the year. This is in accordance with the FRSE (effective April 2008) which, unlike the Companies Act 2006, does not require depreciation of investment properties. Investment properties are held for their investment potential and not for use by the company and so their current value is of prime importance. The departure from the provisions of the Act is required in order to give a true and fair view.

Stocks

Stocks are stated at the lower of cost and net realisable value.

Operating lease agreements

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged against profits on a straight line basis over the period of the lease.

Financial Instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments.

Fixed asset investments

Fixed asset investments are stated at cost less any provisions for impairment.

Rental income

Rental income is accounted for in the period to which it relates.
