ACCOUNTING POLICIES

BASIS OF ACCOUNTING

The financial statements have been prepared under the historical cost convention, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

GOING CONCERN

The company had net liabilities at the year end of £306,339 (2010 £76,952) With no income streams, the company continues to service its commitments to creditors as and when they fall due with the support of group companies After making enquiries of its creditors, the company has been provided with a mechanism, if required, to defer payments The directors therefore have a reasonable expectation that the company has sufficient resources to continue to operate for the foreseeable future On this basis, the directors consider it appropriate to prepare the financial statements on a going concern basis Accordingly, they continue to adopt the going concern basis in preparing the annual report and accounts

CONSOLIDATION

In the opinion of the directors, the company and its subsidiary undertakings comprise a small group The company has therefore taken advantage of the exemption provided by Section 398 of the Companies Act 2006 not to prepare group accounts The financial statements present the results of the parent company only and do not show the results of the group

FINANCIAL INSTRUMENTS

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its financial liabilities

Where the contractual obligations of financial instruments (including share capital) are equivalent to a similar debt instrument, those financial instruments are classed as financial liabilities Financial liabilities are presented as such in the balance sheet Finance costs and gains or losses relating to financial liabilities are included in the profit and loss account Finance costs are calculated so as to produce a constant rate of return on the outstanding liability

INVESTMENT
