AMIGO TECHNOLOGY LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 AUGUST 2017

1. STATUTORY INFORMATION

Amigo Technology Limited is a private company, limited by shares, registered in Not specified/Other. The company's registered number and registered office address can be found on the Company Information page.

2. ACCOUNTING POLICIES

Basis of preparing the financial statements

These financial statements have been prepared in accordance with the provisions of Section 1A "Small Entities" of Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and the Companies Act 2006. The financial statements have been prepared under the historical cost convention. The financial statements are presented in sterling which is the functional currency of the company and rounded to the nearest £.

Turnover

Turnover represents sales to external customers at invoiced amounts less value added tax.

The Company's primary sources of revenue are from fees and commissions charged to clients.

Fees, commissions and other income receivable are recognised in the period to which they relate. Income is brought into account at the point of invoicing (when the service has been performed) rather than when signed contracts are exchanged. In the case of consultancy fees and contributions to development costs, where there is an exception of future servicing requirements, a proportionate element of the income is deferred to cover the associated contractual obligations.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Fixtures and fittings	- 25% on cost
Computer equipment	- 33.33% on cost

Taxation

Taxation for the year comprises current and deferred tax. Tax is recognised in the Income Statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current or deferred taxation assets and liabilities are not discounted.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Research and development

Expenditure on research and development is written off in the year in which it is incurred.

AMIGO TECHNOLOGY LIMITED

NOTES TO THE FINANCIAL STATEMENTS - continued FOR THE YEAR ENDED 31 AUGUST 2017

2. ACCOUNTING POLICIES - continued

Hire purchase and leasing commitments

Rentals paid under operating leases are charged to profit or loss on a straight line basis over the period of the lease.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to profit or loss in the period to which they relate.

Share-based payment

When share options are awarded to employees, the fair value of the options at the date of grant is charged to the income statement over the vesting period. Non-market vesting conditions are taken into account by adjusting the number of equity instruments expected to vest at each balance sheet date so that, ultimately, the cumulative amount recognised over the vesting period is based on the number of options that eventually vest. Market vesting conditions are factored into the fair value of the options granted. As long as all other vesting conditions are satisfied, a charge is made irrespective of whether the market vesting conditions are satisfied. The cumulative expense is not adjusted for failure to achieve a market vesting condition.

Where the terms and conditions of options are modified before they vest, the increase in fair value of the options, measured immediately before and after the modification, is also charged to the income statement over the remaining vesting period.

Where equity instruments are granted to persons other than employees, the income statement is charged with the fair value of the goods and services received unless this cannot be assessed with certainty, in which case the fair value of the share option is used in lieu of services provided.

Cash at bank and in hand

Cash at bank and in hand comprise cash, demand deposits and other short-term highly liquid investments that are readily convertible to known amounts of cash and are subject to insignificant risk of changes in value.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities. Where shares are issued, any component that creates a financial liability of the company is presented as a liability in the balance sheet. The corresponding dividends relating to the liability component are charged as interest expense in the profit and loss account.

3. EMPLOYEES AND DIRECTORS

The average number of employees during the year was 14 (2016 - 12).

11. SHARE-BASED PAYMENT TRANSACTIONS

EMI Share Option Scheme

Amigo Technology Limited operates an equity settled share based remuneration scheme for employees, the only vesting condition being that the individual remains an employee of the firm over the vesting period of 4 years.

The exercise price of the options was £10.30 equal to the estimated market price of the shares on the date of the grant. The contractual life of each option granted is 10 years. There are no cash settlement alternatives.

Unapproved Options

In addition share options have been granted to certain individuals and companies in lieu of services rendered and release of liabilities. In majority of cases the exercise price of the options is equal to the estimated market price of the shares on the date of the grant (£10.30) although a certain number were issued at the nominal value of the shares. The contractual life of each option granted is 10 years. There are no cash settlement alternatives.
