HAMMOND COMMERCIAL SERVICES LIMITED

NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 31 AUGUST 2015

1. Accounting Policies

1.1 Basis of preparation of accounts

The accounts are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2007).

1.2 Turnover

Turnover comprises the invoiced value of goods and services supplied by the company, net of Value Added Tax.

1.3 Amortisation

Amortisation is calculated so as to write off the cost of an asset, less its residual value, over the useful economic life of that asset as follows:

Franchise fee	over 10 years
---------------	---------------

1.4 Fixed assets and depreciation

All fixed assets are initially recorded at cost. Depreciation is calculated so as to write off the cost of an asset, less its residual value, over the useful economic life of that asset as follows:

Fixtures and fittings	15% reducing balance basis
Motor vehicles	20% reducing balance basis

1.5 Stocks

Stock is valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

1.6 Hire purchase agreements

Assets held under hire purchase agreements are capitalised and disclosed under tangible fixed assets at their fair value. The capital element is treated as a liability and the interest charged to the profit and loss account on a straight line basis.

1.7 Deferred taxation

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred taxation is measured on a non-discounted basis at the average tax rates that would apply when the timing differences are expected to reverse, based on tax rates and laws that have been enacted by the balance sheet date.
