## **Notes to the Financial Statements**

**Period from 26 July 2016 to 30 July 2017**

### **1. General information**

The company is a private company limited by shares, registered in England and Wales. The address of the registered office is 10 Dominion Street, London, EC2M 2EF, England. The company was incorporated on 26 July 2016.

### **2. Statement of compliance**

These financial statements have been prepared in compliance with Section 1A of FRS 102, 'The Financial Reporting Standard applicable in the UK and the Republic of Ireland'.

### **3. Accounting policies**

#### **Basis of preparation**

The going concern basis has been used. The directors expect the related companies, because of the nature of their relationship with the company, to continue with their support for at least twelve months from the date of approval of the financial statements. This basis has been applied on the continuing support of the related companies. If the going concern basis were not appropriate, adjustments would have to be made to restate fixed assets as current assets, reduce the value of the assets to their recoverable amount and to provide for any further liabilities that might arise.

#### **Revenue recognition**

Turnover is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods supplied and services rendered, stated net of discounts and of Value Added Tax. When the outcome of a transaction involving the rendering of services can be reliably estimated, revenue from the rendering of services is measured by reference to the stage of completion of the service transaction at the end of the reporting period. When the outcome of a transaction involving the rendering of services cannot be reliably estimated, revenue is recognised only to the extent that expenses recognised are recoverable.

#### **Financial instruments**

A financial asset or a financial liability is recognised only when the entity becomes a party to the contractual provisions of the instrument. Basic financial instruments are initially recognised at the transaction price, unless the arrangement constitutes a financing transaction, where it is recognised at the present value of the future payments discounted at a market rate of interest for a similar debt instrument. Debt instruments are subsequently measured at amortised cost.
