Natural Generation Holdings Limited

Notes to the Financial Statements for the Year Ended 31 December 2022

1 General information

The company is a private company limited by share capital, incorporated in England.

The address of its registered office is Unit 3 Cligga Industrial Estate, St. Georges Hill, Perranporth, Cornwall, TR6 0EB
.

2 Accounting policies

Summary of significant accounting policies and key accounting estimates

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Statement of compliance

These financial statements have been prepared in accordance with Financial Reporting Standard 102 Section 1A smaller entities - 'The Financial Reporting Standard applicable in the United Kingdom and Republic of Ireland' and the Companies Act 2006 (as applicable to companies subject to the small companies' regime).

Basis of preparation

These financial statements have been prepared using the historical cost convention except that as disclosed in the accounting policies certain items are shown at fair value.

These financial statements are prepared in sterling which is the functional currency of the entity.

Summary of disclosure exemptions

The Company has taken advantage of the exemption available under paragraph 33.1A of FRS 102 and does not disclose related party transactions with members of the same group that are wholly owned.

Group accounts not prepared

The company has taken advantage of the exemption from preparing consolidated financial statements contained in the small companies regime on the basis that at the year end it is a subsidiary undertaking in a small group.

Natural Generation Holdings Limited

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Going concern

The financial statements have been prepared on a going concern basis.

At the year end the company had net current assets of £100 and net assets of £44,023 which includes £185,447 due to its trading subsidiary, Natural Generation Limited. Natural Generation Limited has indicated that it will not seek repayment of this amount until such time as the company has sufficient funds. In this regard, the Directors feel it is appropriate to repeat below what is said in the Directors' Report for Natural Generation Limited regarding going concern.

The company's forecasts and projections for the next twelve months show that the company should be able to continue in operational existence for that period, taking into account reasonable possible changes in trading performance and the potential impact on the business of possible future scenarios arising from the impact on the economy of the current high levels of inflation. In the directors' assessment they have considered the effectiveness of available measures to assist in mitigating any impact of the effect of delays in repairs and cost increases.

Consequently, based on the factors set out above the directors have a reasonable expectation that the company has adequate financial resources to continue in operational existence for at least twelve months from the date of signing the financial statements and therefore the directors believe that it remains appropriate to prepare the financial statements on a going concern basis.

Tax

The tax expense for the period comprises tax. Tax is recognised in profit or loss, except that a charge attributable to an item of income or expense recognised as other comprehensive income is also recognised directly in other comprehensive income.

The current income tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the reporting date in the countries where the company operates and generates taxable income.

Deferred tax is recognised in respect of all timing differences between taxable profits and profits reported in the financial statements.

Unrelieved tax losses and other deferred tax assets are only recognised when it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date and that are expected to apply to the reversal of the timing difference.

Investments

Investments in equity shares which are not publicly traded and where fair value cannot be measured reliably are measured at cost less impairment.

Debtors

Debtors are amounts due from customers for merchandise sold or services performed in the ordinary course of business.

Debtors are recognised initially at the transaction price. They are subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for the impairment of debtors is established when there is objective evidence that the company will not be able to collect all amounts due according to the original terms of the receivables.

Natural Generation Holdings Limited

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Creditors

Creditors are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if the company does not have an unconditional right, at the end of the reporting period, to defer settlement of the creditor for at least twelve months after the reporting date. If there is an unconditional right to defer settlement for at least twelve months after the reporting date, they are presented as non-current liabilities.

Creditors are recognised initially at the transaction price and subsequently measured at amortised cost using the effective interest method.

Dividends

Dividend distribution to the company's shareholders is recognised as a liability in the financial statements in the reporting period in which the dividends are declared.

Staff numbers

The average number of persons employed by the company (including directors) during the year, was 3 (2021 - 3).

3 Auditor's remuneration

The auditor's remuneration has been borne by the company's subsidiary undertaking on its behalf for the current and prior year.

At 31 December 2021		229,370

Natural Generation Holdings Limited

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

4 Investments (continued)

The cost of the company's investment in Aeolus Power (MOTs) Limited reflected the underlying fair value of the net assets and goodwill at the time of acquisition. As a result of the subsequent migration of the trade of Aeolus Power to Natural Generation Limited, the value of the company's investment in Aeolus Power fell below the amount at which it was stated in the books and records. Accordingly the investment should be written down and charged as a loss to the company however the directors consider that there has been no overall loss to the company and hence it would fail to give a true and fair view to charge the diminution and instead it should be reallocated to the company's investment in Natural Generation Limited.

Details of undertakings

Details of the investments in which the company holds 20% or more of the nominal value of any class of share capital are as follows:

Undertaking	Registered office	Holding	Proportion of voting rights and shares held	
			2022	2021
