Notes to the Accounts

for the period from 1 August 2018 to 30 April 2019

1 Accounting policies

Basis of preparation

The accounts have been prepared under the historical cost convention and in accordance with FRS 102, The Financial Reporting Standard applicable in the UK and Republic of Ireland (as applied to small entities by section 1A of the standard).

Turnover

Turnover is measured at the fair value of the consideration received or receivable, net of discounts and value added taxes. Turnover includes revenue earned from the sale of goods. Turnover from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have transferred to the buyer.

Tangible fixed assets

Tangible fixed assets are measured at cost less accumulative depreciation and any accumulative impairment losses. Depreciation is provided on all tangible fixed assets, other than in the year of acquisition, at rates calculated to write off the cost, less estimated residual value, at 18% per annum (reducing balance).

Stocks

Stocks are measured at the lower of cost and estimated selling price less costs to complete and sell. Cost is determined using the first in first out method. The carrying amount of stock sold is recognised as an expense in the period in which the related revenue is recognised.

Creditors

Short term creditors are measured at transaction price (which is usually the invoice price).

Taxation

A corporation tax liability is recognised for the tax payable on the taxable profit of the current and past periods. A corporation tax asset is recognised in respect of a tax loss that can be carried back to recover tax paid in a previous period. Corporation tax assets and liabilities are not discounted.
