Foreign currency

The Company's functional and accounts presentation currency is the United States dollar ("USD"). All figures filed are in USD.

Foreign currency transactions are translated into functional currency using the spot exchange rates at the dates of the transaction. At each period end, foreign currency monetary items are translated using the closing rate. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction and non-monetary items measured at fair value are measured using the exchange rate when fair value was determined.

Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss account.

Fixed assets

Intangible assets are investments in manufacturing process design studies and market studies. They are initially recognised at cost and are stated at the amount initially recognized, less accumulated amortisation and accumulated impairment losses. Amortisation will commence when the intangible asset is available for use and the depreciable amount will be allocated on a systematic basis over its useful life.

The investment in equity shares is held at cost less accumulated impairment loss.

Fixed assets are tested for impairment if there is any indication that an asset may be impaired at the balance sheet date. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount if the impairment test indicates that the recoverable amount is less than its carrying amount.

Share capital and distributions to equity holders

Ordinary shares are classified as equity. Dividends and other distributions to the company's shareholders are recognised as a liability in the financial statements in the period in which the dividends and other distributions are approved by the company's shareholders.
