Turnover

Turnover represents the value of rents and services invoiced to customers during the year, excluding value added tax.

Tangible fixed assets

Tangible fixed assets are recognised at cost and subsequently measured under the historical cost model being cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes any direct expenditure incurred to bring the asset to its current location and condition necessary for the asset to work as intended by management.

Repairs and maintenance costs are charged to the Income Statement in the period in which they are incurred.

Depreciation is provided at the following annual rates in order to write off the cost of each asset over its estimated useful life:

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.
