1. Accounting policies

Statutory information

The company is a private company limited by shares and registered in England and Wales. The company's registered number and registered office address can be found on the Company Information page.

Statement of compliance

The financial statements have been prepared in accordance with the Companies Act 2006 and FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland including Section 1A Small Entities.

Revenue from sale of goods

Revenue from the sale of goods is recognised when the company has transferred to the buyer the significant risks and rewards of ownership of the goods, usually when goods are delivered and legal title has passed. Providing the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the company and the costs incurred or to be incurred in respect of the transition can be measured reliably.

Deferred tax

Deferred tax is recognised in respect of all timing differences between the recognition of income and expenses in the financial statements and their inclusion in tax assessments. Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date and that are expected to apply to the reversal of the timing difference, except for revalued land and investment property where the tax rate that applies to the sale of the asset is used. Current and deferred tax assets and liabilities are not discounted.

Tangible fixed assets and depreciation

All fixed assets are initially recorded at cost. Property, plant and equipment is used in the company's principal activity for the production and supply of goods or for administrative purposes and is stated in the balance sheet under the historic cost model. This model requires the assets to be stated at cost less amounts in respect of depreciation and less any accumulated impairment losses. Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value (which is the expected amount that would currently be obtained from disposal of an asset, after deducting the estimated costs of disposal, if the asset were already of the age and in the condition expected at the end of its useful life), over the useful economic life of the respective asset as follows:

	Reducing balance (%)	Straight line (years)
Office Equipment	15	3
