These accounts have been prepared in accordance with the provisions applicable to companies subject to the small companies regime.

Advantage has been taken of the audit exemptions available for small companies conferred by Section 477 of the Companies Act 2006 on the grounds:

- that for the year ended 31 October 2011 the company was entitled to the exemptions from a statutory audit under Section 477 of the Companies Act 2006; and
- that no notice has been deposited under Section 476 of the Companies Act 2006 in relation to the financial statements for the financial year.

The directors acknowledge their responsibilities for:

- ensuring that the company keeps proper accounting records which comply with Section 386 of the Companies Act 2006; and
- preparing financial statements which give a true and fair view of the state of affairs of the company as at 31 October 2011 and of its profit for the year then ended in accordance with the requirements of Section 393 of the Companies Act 2006, and which otherwise comply with the requirements of the Companies Act 2006 relating to financial statements, so far as applicable to the company.

The abbreviated financial statements on pages 1 to 5 were approved by the board of directors on 14 March 2012 and were signed on its behalf by:

1 Accounting policies

These financial statements have been prepared on the going concern basis under the historical cost convention and in accordance with the Companies Act 2006 and applicable accounting standards in the United Kingdom. The principal accounting policies, which have been applied consistently throughout the year, are set out below.

Goodwill

Purchased goodwill arising on acquisitions is eliminated by amortisation through the profit and loss account over its useful economic life. The useful economic life of the asset shown in note 9 has been estimated by the directors at ten years.

Tangible fixed assets

Tangible fixed assets are stated at cost less accumulated depreciation.

The cost of tangible fixed assets is their purchase cost, together with any incidental costs of acquisition. Depreciation is calculated so as to write off the cost, of tangible fixed assets, less their estimated residual values, over the expected useful economic lives of the assets concerned. The principal annual rates used are as follows:

Buildings	-	2%	straight line
Plant and equipment	-	25%	reducing balance
Leased equipment	-	20%	straight line
Motor vehicles	-	25%	reducing balance

Investments

Fixed asset investments are stated at their purchase cost less any provision for impairment. Investment income is included in the profit and loss account on an accruals basis.

Stocks

Stocks are stated at the lower of cost and net realisable value. Provision is made for obsolete, slow moving and defective stocks.

Debtors

Debtors are stated after all known bad debts have been written off and specific provision has been made against all debts considered doubtful of collection.

Turnover

Turnover represents the invoiced value of goods and services supplied during the year excluding value added tax and is net of sales returns and trade discounts. Revenue is recognised when, and to the extent that, the company obtains the right to consideration in exchange for its performance.

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. A net deferred tax asset is recognised as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on an undiscounted basis.

1 Accounting policies (continued)

Foreign currencies

Transactions denominated in foreign currencies are translated at the exchange rate at the date of the transaction. All monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date or the exchange rate of a related foreign exchange contract where appropriate. Non-monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange at the date of the transaction. The resulting gain or loss is dealt with in the profit and loss account.

Leased assets

Where the company enters into a lease which entails taking substantially all the risks and rewards of ownership of an asset, the lease is treated as a "finance lease". The asset is recorded in the balance sheet as a tangible fixed asset and is depreciated over its estimated useful economic life or the term of the lease, whichever is shorter. Future instalments under such leases, net of finance charges, are included within creditors. Rentals payable are apportioned between the finance element, which is charged to the profit and loss account, and the capital element which reduces the outstanding obligation for future instalments.

Rentals under operating leases are charged to the profit and loss account as incurred.

Pension costs

The company operates a defined contribution scheme for specific directors. The cost of funding the defined contribution scheme is charged to the profit and loss account as incurred.
