Notes to the abbreviated financial statements for the year ended 27 January 1996

1. Principal accounting policies

The financial statements have been prepared in accordance with Applicable Accounting Standards in the United Kingdom. A summary of the more important accounting policies, which have been applied consistently, is set out below.

Basis of accounting

The financial statements are prepared in accordance with the historical cost convention, modified to include the revaluation of heritable property.

Tangible fixed assets

The cost of tangible fixed assets is their purchase cost together with any incidental costs of acquisition.

Depreciation is calculated so as to write off the cost of tangible fixed assets, other than land and buildings, on a straight line basis over the expected useful economic lives of the assets concerned. Land and buildings are maintained to ensure that their value does not diminish over time. The maintenance costs are charged to profit and loss in the year incurred. In the directors' opinion, depreciation would be immaterial and has not been charged.

The principal annual rates used for this purpose are:

	%
Motor vehicles	25

Leasing

Leasing agreements which transfer to the company substantially all the benefits and risk of ownership of an asset are treated as if the asset had been purchased outright. The assets are included in fixed assets and the capital element of the leasing commitments is shown as obligations under finance lease. The lease rentals are treated as consisting of capital and interest elements. The capital element is applied to reduce the outstanding obligations and the interest element is charged against profit in proportion to the reducing capital element outstanding. Assets held under finance leases are depreciated over the shorter of the lease term and the useful lives of equivalent owned asset.

2. Called up share capital

	1996 £	1995 £
Authorised 12500 ordinary shares of £1 each	12500 =====	12500 =====
Allotted, called up and fully paid 10000 ordinary shares of £1 each	10000 =====	10000 =====
