Registered Company No. SC031221

1. Accounting policies

Statutory information

The company is a private company limited by shares and registered in Scotland. The company's registered number and registered office address can be found on the Company Information page.

Basis of preparation

The financial statements have been prepared under the historical cost convention on a going concern basis unless otherwise specified within these accounting policies and in accordance with Section 1A of Financial Reporting Standard 102, the Financial Reporting Standard applicable in the UK and the Republic of Ireland and the Companies Act 2006.

Functional and presentation currency

The financial statements are presented in sterling and this is the functional currency of the company.

Turnover policy

Turnover is measured at the fair value of the consideration received or receivable, net of discounts and value added taxes. Turnover includes revenue earned from the rendering of services.

Turnover from the rendering of services is recognised by reference to the stage of completion of the contract. The stage of completion of a contract is measured by comparing the costs incurred for work performed to date to the total estimated contract costs.

Employee benefits

The company operates a defined contribution plan for its employees. A defined contribution plan is a pension plan under which the company pays fixed contributions into a separate entity. Once the contributions have been paid the company has no further obligation.

Contributions to defined contribution plans are expensed in the period to which they relate. Amounts not paid are shown in accruals in the Statement of Financial Position. The assets of the plan are held separately from the company in independently administered funds.

Current taxation

Current tax is recognised on taxable profit for the current and past periods. Current tax is measured at the amounts of tax expected to pay or recover using the tax rates and laws that have been enacted or substantively enacted at the reporting date.

Deferred tax

Deferred tax is recognised in respect of all timing differences between the recognition of income and expenses in the financial statements and their inclusion in tax assessments. Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date and that are expected to apply to the reversal of the timing difference, except for revalued land and investment property where the tax rate that applies to the sale of the asset is used. Current and deferred tax assets and liabilities are not discounted.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost or valuation less depreciation.

The assets residual values, useful lives and depreciation methods are reviewed and adjusted prospectively if appropriate, or if there is an indication of a significant change since the last reporting date.

Gains and losses on disposal are determined by comparing the proceeds with the carrying amount and are recognised in the Statement of Income and Retained Earnings.

	Reducing balance (%)	**Straight line (years)**
Plant and machinery	15	-
Vehicles	25	10

Stocks and work in progress

Stocks are valued at the lower of cost and estimated selling price (less any associated costs to enable such sales to complete).

At each date of Statement of Financial Position, stocks are assessed for impairment. If stock is impaired, the carrying amount is reduced to its selling price less costs to completed the sale. The impairment loss is recognised immediately in the Income Statement.

Trade and other debtors

Short term debtors are measured at transaction price (which is usually the invoice price), less any impairment losses for bad and doubtful debts. Loans and other financial assets are initially recognised at transaction price including any transaction costs and subsequently measured at amortised cost determined using the effective interest method, less any impairment losses for bad and doubtful debts.

Trade and other creditors

Short term creditors are measured at transaction price (which is usually the invoice price). Loans and other financial liabilities are initially recognised at transaction price net of any transaction costs and subsequently measured at amortised cost determined using the effective interest method.

Financial instruments

The company enters into basic financial instrument transactions that result in the recognition of financial assets and liabilities like trade and other debtors and creditors, loans from banks and other third parties, loans to related parties and investments in ordinary shares.
