The Directors present their report and the audited financial statements for the year ended 30 June 2013.

Principal Activities and Status

The principal activities of First State Investment Management (UK) Limited ("the Company") are the management of investment portfolios. The Company is a wholly owned subsidiary of SI Holdings Limited. The Company is regulated by the FCA.

Commonwealth Bank of Australia ("CBA"), incorporated in Australia and listed on the Australian Stock Exchange, is one of the largest Australian banks by market capitalisation and a leading provider of integrated financial services. CBA is regarded by the Directors of the Company as the Company's ultimate parent company.

Review of Business, Risks and Uncertainties

The Company is part of the international operations of Colonial First State Global Asset Management ("CFSGAM"). CFSGAM operates as First State Investments outside Australia. CFSGAM/First State Investments is the consolidated asset management division of CBA. As at 30 June 2013, CFSGAM and First State Investments collectively managed over A\$174 billion in assets under management on behalf of institutional investors, pension funds, wholesale distributors and platforms, financial planners and their clients worldwide.

CFSGAM is managed by CBA's Wealth Management ("WM") division. Within CBA, WM is responsible for the manufacture and administration of non-banking services, including business units such as Colonial First State in Australia and First State Investments in the UK and Asia. WM also provides strategic and operational support for the investment and insurance products of group companies.

The Company provides a range of specialist investment management services. Our core areas of focus include Global equities, Asia Pacific and Global Emerging Markets equities, Global Emerging Markets debt, Property securities, Listed Infrastructure equities and Global Resources investment. We manage various types of investments and clients, including pooled vehicles, segregated mandates, pension funds, commingled funds, institutional and retail investors.

Our primary goals are:

- to protect and enhance our existing business,
- to expand our range of investment capabilities,
- to broaden and deepen our distribution capabilities,
- to develop our organisational and managerial capabilities,
- to invest in and implement a global platform and processes.

FIRST STATE INVESTMENT MANAGEMENT (UK) LIMITED

REPORT OF THE DIRECTORS

FOR THE YEAR ENDED 30 JUNE 2013

Review of Business, Risks and Uncertainties (continued)

Pursuit of these goals has resulted in: the closure of a number of funds to new business due to maximum capacity constraints, in order to protect and enhance performance levels for existing clients; the development of the Listed Infrastructure and Global Emerging Markets debt businesses; the opening of a second branch office in Continental Europe; the appointment of a number of key senior personnel; and the implementation of systems globally.

We strive to be at the forefront of specialist investing in both developed and emerging markets. The majority of the portfolios we invest our clients' wealth into generated returns in excess of 30% in sterling terms during the last 3 years and net inflows of over £1.95 billion in the year accounted for further growth of the UK business.

The principal risk to the level of profitability of the Company is the underlying profitability of the investment management entities within the Group in the event of another market correction or a sustained period of underperformance that leads to a significant decrease in funds under management. The particular long-term investment style of the Group should protect its revenue and its customers' investments more than many competitors, should any correction materialise. The business is also exposed to key man risk associated with the Asia Pacific/Global Emerging Markets team. The Directors are of the opinion that this risk has been managed via the introduction of a long term incentive scheme. These risks have been reported in First State Investment's Internal Capital Adequacy Assessment Process.

The Directors consider that the Company's activities will continue unchanged in the foreseeable future.

Results and Dividends

The profit for the financial year after taxation but before dividends was £38,937,000 (2012: £39,151,000).

Dividends were recommended and paid as follows:

2013					2012

Company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have prepared the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that year. - make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;

They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

FIRST STATE INVESTMENT MANAGEMENT (UK) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2013

1. Principal accounting policies

The financial statements have been prepared in accordance with applicable Accounting Standards in the United Kingdom. A summary of the accounting policies, which have been applied consistently, is set out below.

(a) Basis of accounting

These financial statements are prepared on the going concern basis, under the historical cost convention, and in accordance with the Companies Act 2006 and applicable accounting standards in the United Kingdom. The principle accounting policies which have been applied consistently throughout the year are set out below. The financial statements contain information about the Company as an individual company and do not contain consolidated financial information as the parent of a group. The Company is exempt under section 401 of the Companies Act 2006 from the requirement to prepare consolidated financial statements as it and its subsidiary undertakings are included by full consolidation in the consolidated financial statements of its parent, CBA, a company incorporated in Australia.

(b) Revenue

Revenue recognition is based on the benefits to the Company of any income flows which can be reliably determined. Turnover of the Company is from the provision of asset management services and includes management fees and performance fees. Turnover is presented net of Value Added Tax and other sales taxes.

Management fees are recognised as earned, over the year in which the services are performed. Such fees are primarily based on predetermined percentages of the value of assets under management and are presented net of allocations across entities made in accordance with our transfer pricing policy.

Performance fees are calculated with reference to performance benchmarks specified in the individual investment management agreements. Revenues arising in respect of performance fee arrangements are recognised provided that the outcome of such arrangements can be estimated reliably and it is probable that the economic benefits associated with the transaction will flow to the Company.

Interest received (and paid) is recognised on an accruals basis by applying the appropriate rate of interest.

(c) Administrative expenses

Administrative expenses are recognised in the year in which they are incurred and include amounts recharged from another group company.

(d) Taxation

The charge for taxation is based on the profit or loss for the year as adjusted for disallowable items. Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, together with adjustments to tax payable in respect of prior years.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more, or right to pay less, tax in future have occurred at the balance sheet date. This is subject to deferred tax assets only being recognised if it is considered more likely than not that there will be suitable profits from which the future reversal of the underlying timing differences can be deducted. Timing differences are differences arising between the Company's taxable profits and its results as stated in the financial statements which are capable of reversal in one or more subsequent years.

(e) Foreign currencies

Income is recorded at the exchange rate on the date of invoices so foreign exchange differences arise between the rate on the date of invoice and the rate at which the amounts are translated into sterling on the date of receipt. Foreign currency balances have been translated at market rates of exchange ruling at the Balance Sheet date. Gains and losses on exchange are taken to the Profit and Loss Account.

FIRST STATE INVESTMENT MANAGEMENT (UK) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2013

13. Contingent liability

On 28 June 2007, the European Court of Justice ("ECJ") ratified the Advocate General's previous conclusion that the management fees of investment trusts, like those of authorised unit trusts and OEICs should be an exempt service for the purposes of VAT. Her Majesty's Revenue and Customs ("HMRC") has indicated that it will abide by this judgement. Investment trust companies are thus able to claim for a refund of VAT previously charged to them by the Company to the extent that they have not already recovered such VAT. This is applicable for the distinct time periods as determined by case law that the Company can itself reclaim VAT previously paid on to HMRC.

Repayments have been secured for investment trust clients for the years 1990 to 1996 and 2001 to 2007 and the amounts received passed on to those entities. Appropriate claims and appeals have also been lodged in respect of the intervening 1996 to 2001 period.

The question of VAT exemption being extended to pension fund clients is currently being considered in the Wheels Common Investment Fund test case. Appropriate protective claims have thus been made in respect of current and previous pension fund clients. In addition, protective claims and appeals have been lodged in case VAT exemption extends to certain other client types in the future. The Company's position is that it will only repay to any client amounts to the extent that they can be reclaimed by the Company itself from HMRC.

On the 7 March 2013 the ECJ handed down its decision in the Wheels Common Investment Fund case ruling against the taxpayer. The matter will now be referred back to the UK First-tier Tribunal. The Company will review the position following the publication of the final judgement by the UK court.

The total value of all outstanding protective claims as at 30 June 2013 amounted to £11,923,000. (30 June 2012: £6,335,000)

Whilst it is also possible that the Company may incur some professional advisor fees as a result of the reclaims, the Directors do not expect a material liability to arise.

14. Ultimate parent company

The immediate parent undertaking is SI Holdings Limited.

The ultimate parent undertaking and controlling party is CBA, which is the parent undertaking of the smallest and the largest group to consolidate these financial statements. Copies of CBA consolidated financial statements can be obtained from: Ground Floor, Tower 1, 201 Sussex Street, Sydney NSW 2000, Australia or from the following website: www.commbank.com.au.
