NOTES TO THE ABBREVIATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 7 JUNE 2000

1. Accounting policies

Basis of accounting

The financial statements have been prepared under the historical cost convention and are in accordance with the applicable accounting standards and in accordance with the Financial Reporting Standards for Smaller Entities (Effective March 2000).

Cash flow

The financial statements do not include a cash flow statement because the company, as a small reporting entity, is exempt from the requirement to prepare such a statement under Financial Reporting Standard 1.

Turnover

Turnover represents net invoiced charges excluding VAT.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life:

Motor vehicles	— 25% on cost (straight line basis)
Freehold property	— 0%
Tools	— 0%

Stock

Stock is valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow-moving items. Cost includes only direct expenditure.

Deferred taxation

Provision is made at current rates for taxation deferred in respect of all material timing differences except to the extent that, in the opinion of the directors, there is reasonable probability that the liability will not arise in the forseeable future.

Hire Purchase Assets

Assets obtained under hire purchase contracts are capitalised in the balance sheet and are depreciated over their estimated useful lives. The corresponding hire purchase obligation is treated in the balance sheet as a liability. The interest element of hire obligations is charged to profit and loss account over the period of the lease at a constant proportion of the outstanding balance of capital repayments.
