NOTES TO THE ABBREVIATED ACCOUNTS

FOR THE YEAR ENDED 7 JUNE 2012

1. Accounting policies

Basis of Accounting

The accounts have been prepared under the historical cost convention as modified by the revaluation of certain fixed assets and in accordance with the Financial Reporting Standards for Smaller Entities (effective April 2008).

Cash flow

The accounts do not include a cash flow statement because the company, as a small reporting entity, is exempt from the requirement to prepare such a statement under the Financial Reporting Standards for Smaller Entities (effective April 2008).

Turnover

Turnover represents net invoiced sales excluding VAT.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life:

Motor vehicles	— 25% on cost (straight line basis)
Freehold property	— 0%
Tools	— 0%

Stock

Stock is valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow-moving items. Cost includes only direct expenditure.

Deferred taxation

Deferred tax arises as a result of including items of income and expenditure in taxation computations in periods different from those in which they are included in the company's accounts. Deferred tax is provided in full on timing differences which result in an obligation to pay more tax at a future date, at the average tax rates that are expected to apply when the timing differences reverse, based on current tax rates and laws. Deferred tax is not provided on timing differences arising from the revaluation of fixed assets.

Going concern basis of accounting

The accounts have been prepared on the basis that the company ceased trading in the company year 2007 and that it will be able to meet all its liabilities.
