NOTES TO THE ABBREVIATED ACCOUNTS

AS AT 30 JUNE 2011

1. ACCOUNTING POLICIES

1.1 Accounting Conventions

The financial statements are prepared under the historical cost convention modified to include the revaluation of certain fixed assets

1.2 Turnover

Turnover represents revenue recognised in the accounts. Revenue is recognised when the company fulfills its contractual obligations to customers by supplying goods and services and excludes value added tax. (Where services are performed gradually over time revenue is recognised as activity progresses by reference to the value of work performed).

1.3 Depreciation of Tangible Assets

Depreciation is provided on tangible assets at the following rates in order to write off the cost less residual value over the assets' expected useful life :

Plant and Machinery - 20% per annum

1.4 Investment Property

Investment properties are accounted for in accordance with Statement of Standard Accounting Practice 19, Accounting for investment properties. No depreciation is provided in respect of such properties. Although the Companies Act 2006 would normally require the systematic annual depreciation of fixed assets it is believed that this policy of not providing depreciation is necessary in order for the accounts to give a true and fair view, since the current value of investment properties, and changes in that current value, are of prime importance rather than a calculation of systematic annual depreciation. Depreciation is only one of the many factors reflected in the annual valuation, and the amount which might otherwise have been shown cannot be separately identified or quantified.

1.5 Leasing

Rentals payable under operating leases are charged against income on a straight line basis over the lease term.

1.6 Stock

Stock is valued at the lower of cost and net realisable value, after making allowance for obsolete and slow moving items.

1.7 Pensions

Contributions to the company's defined contribution pension scheme are charged to the profit and loss account in the year in which they become payable.

AS AT 30 JUNE 2011

1.8 Deferred Taxation

Deferred tax arises as a result of including items of income and expenditure in taxation computations in periods different from those in which they are included in the company's accounts. Deferred tax is provided in full on timing differences which result in an obligation to pay more (or a right to pay less) tax at a future date, at the tax rates that are expected to apply when the timing differences reverse based on current tax rates and laws.

Deferred tax is not provided on timing differences arising from the revaluation of fixed assets where there is no commitment to sell the asset.

Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.
