**Notes to the Abbreviated Accounts
for the Year Ended 31 May 2015**

1. ACCOUNTING POLICIES

Basis of preparing the financial statements

In order to show a true and fair view, the company's accounting policy in respect of investment properties departs from the requirements of the Companies Act 2006. Details of these departures are given below.

Accounting convention

The financial statements have been prepared under the historical cost convention, subject to the revaluation of investment properties referred to below.

Turnover/revenue recognition

Sales comprise the fair value of the consideration received or receivable for the sale of goods and rendering of services in the ordinary course of the Company's activities. Sales are presented, net of value-added tax, rebates and discounts.

The Company recognises revenue when the amount of revenue and related cost can be reliably measured, it is probable that the collectability of the related receivables is reasonably assured and when the specific criteria for each of the Company's activities are met.

Depreciation

Depreciation is provided to write off the cost or revaluation, less estimated residual values, of all tangible fixed asset, except for investment properties and freehold land, evenly over their expected useful lives. It is calculated at the following rates:-

Agricultural buildings	5% straight line
Freehold heritable property	2% straight line
Freehold land	No depreciation is provided
Plant, machinery and tractors	25% reducing balance
Motor vehicles	25% reducing balance
Office equipment	33% straight line

Investment property

In accordance with SSAP 19 'Accounting for investment properties', investment properties are revalued annually to open market value and no depreciation is provided. The director considers that this accounting policy results in the financial statements giving a true and fair view. The effect of this departure from the Companies Act 2006 has not been quantified because it is impracticable and, in the opinion of the director, would be misleading.

The aggregate surplus or deficit arising on revaluation is transferred to the revaluation reserve except where a deficit is deemed to represent a permanent diminution in value, in which case it is charged to the profit and loss account.

Stocks

Stocks are valued at the lower of cost and net realisable value. Cost is based on the cost of purchase on a first in, first out basis. Net realisable value is based on estimated selling price less additional costs to completion and disposal.

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date, except that deferred tax is not recognised on timing differences arising on revalued properties unless the company has entered into a binding sale agreement and is not proposing to take advantage of rollover relief.

Deferred tax balances are not discounted.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to the profit and loss account in the period to which they relate.
