**Notes to the abbreviated financial statements
for the year ended 30 June 2013**

1. Accounting policies

1.1. Accounting convention

The accounts are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

1.2. Turnover

Turnover represents amounts chargeable to clients for services provided during the year, including recoverable expenses on client assignments, excluding value added tax. Services provided to clients, which at the balance sheet date have not been billed to clients, have been recognised as turnover. Turnover recognised in this manner is based on an assessment of the fair value of services provided at the balance sheet date as a proportion of the total value of the engagement. Provision is made against unbilled amounts on these engagements where the right to receive payment is contingent on factors outside the control of the company. Unbilled revenue that is recognised is included in trade debtors.

1.3. Tangible fixed assets and depreciation

Depreciation is provided at rates calculated to write off the cost less residual value of each asset over its expected useful life, as follows:

Tenants improvements	-	4% Straight Line
Fixtures, fittings and equipment	-	25% Reducing Balance
Motor vehicles	-	25% Reducing Balance

1.4. Pensions

The company makes payments to two defined contribution pensions schemes, one for the benefit of the directors, the other for the benefit of the staff. These contributions are charged to the profit and loss account as incurred.

1.5. Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more, tax, with the following exceptions:

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.
