NOTES TO THE FINANCIAL STATEMENTS Year ended 30 June 2011

1 ACCOUNTING POLICIES

The principal accounting policies are summarised below. They have all been applied consistently throughout the year and the preceding year.

Basis of accounting

These financial statements have been prepared in accordance with the provisions applicable to companies subject to the small companies regime and with the Financial Reporting Standard for Smaller Entities (effective April 2008) under the historical cost convention.

Going concern

The directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. As a result, they continue to adopt the going concern basis in preparing the financial statements.

Investments

Current asset investments are stated at the lower of cost and net realisable value.

Tangible fixed assets

Tangible fixed assets are stated at cost net of depreciation and any provision for impairment. Depreciation is provided on all tangible fixed assets, at rates calculated to write off the cost or valuation, less estimated residual value, of each asset on a straight line basis over its expected useful life. The rates of depreciation are as follows:

Land & buildings	50 years
Plant & machinery	7 years

Taxation

Current tax is provided at amounts expected to be paid using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

Deferred tax is measured at the average rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is measured on a non-discounted basis.

UK PRIVATE HEALTHCARE LIMITED

NOTES TO THE FINANCIAL STATEMENTS Year ended 30 June 2011

2 TURNOVER

Turnover represents amounts derived from the provision of goods and services which fall within the company's ordinary activities after deduction of trade discounts and value added tax.

The turnover, which arises in the United Kingdom, is attributable to the company's principal activity.
