Compass Box Delicious Whisky Limited

Notes to the financial statements

For the year ended 31 March 2019

1 Accounting policies

Company information

Compass Box Delicious Whisky Limited is a private company limited by shares incorporated in England and Wales. The registered office is 4th Floor, 115 George Street, Edinburgh, EH2 4JN.

1.1 Accounting convention

These financial statements have been prepared in accordance with FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" ("FRS 102") and the requirements of the Companies Act 2006 as applicable to companies subject to the small companies regime. The disclosure requirements of section 1A of FRS 102 have been applied other than where additional disclosure is required to show a true and fair view.

The financial statements are prepared in sterling, which is the functional currency of the company. Monetary amounts in these financial statements are rounded to the nearest £.

The financial statements have been prepared under the historical cost convention. The principal accounting policies adopted are set out below.

The company has taken advantage of the exemption under section 399 of the Companies Act 2006 not to prepare consolidated accounts, on the basis that the group of which this is the parent qualifies as a small group. The financial statements present information about the company as an individual entity and not about its group.

1.2 Going concern

At the time of approving the financial statements, the directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future based on the forecasts that have been produced for a five year period and the lending facilities the company have in place to support its trading activities. Thus the directors continue to adopt the going concern basis of accounting in preparing the financial statements.

1.3 Turnover

Turnover is recognised at the fair value of the consideration received or receivable for goods and services provided in the normal course of business, and is shown net of VAT and other sales related taxes. The fair value of consideration takes into account trade discounts, settlement discounts and volume rebates.

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer (usually on dispatch of the goods), the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the entity and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

1.4 Tangible fixed assets

Tangible fixed assets are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

1 Accounting policies (continued)

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives on the following bases:

Design costs	A straight line provision based on the directors' assessment of the specific products' life
Fixtures, fittings & equipment	4 years straight line
Software & website costs	3 years straight line

The gain or loss arising on the disposal of an asset is determined as the difference between the sale proceeds and the carrying value of the asset, and is credited or charged to profit or loss.

1.5 Fixed asset investments

Interests in subsidiaries, associates and jointly controlled entities are initially measured at cost and subsequently measured at cost less any accumulated impairment losses. The investments are assessed for impairment at each reporting date and any impairment losses or reversals of impairment losses are recognised immediately in profit or loss.

A subsidiary is an entity controlled by the company. Control is the power to govern the financial and operating policies of the entity so as to obtain benefits from its activities.

1.6 Impairment of fixed assets

At each reporting period end date, the company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

1 Accounting policies (continued)

Recognised impairment losses are reversed if, and only if, the reasons for the impairment loss have ceased to apply. Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

1.7 Stocks

Stocks are stated at the lower of cost and estimated selling price less costs to complete and sell. Cost comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the stocks to their present location and condition.

At each reporting date, an assessment is made for impairment. Any excess of the carrying amount of stocks over its estimated selling price less costs to complete and sell is recognised as an impairment loss in profit or loss. Reversals of impairment losses are also recognised in profit or loss.

1.8 Cash at bank and in hand

Cash at bank and in hand are basic financial assets and include cash in hand, deposits held at call with banks, other short-term liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities.

1.9 Financial instruments

The company has elected to apply the provisions of Section 11 'Basic Financial Instruments' and Section 12 'Other Financial Instruments Issues' of FRS 102 to all of its financial instruments.

Financial instruments are recognised in the company's statement of financial position when the company becomes party to the contractual provisions of the instrument.

Financial assets and liabilities are offset, with the net amounts presented in the financial statements, when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise the asset and settle the liability simultaneously.

Basic financial assets

Basic financial assets, which include debtors, are initially measured at transaction price including transaction costs and are subsequently carried at amortised cost using the effective interest method unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest. Financial assets classified as receivable within one year are not amortised.

Classification of financial liabilities

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.

1 Accounting policies (continued)

Basic financial liabilities

Basic financial liabilities, including creditors, bank loans, loans from fellow group companies and preference shares that are classified as debt, are initially recognised at transaction price unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future payments discounted at a market rate of interest. Financial liabilities classified as payable within one year are not amortised.

Debt instruments are subsequently carried at amortised cost, using the effective interest rate method.

Trade creditors are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Amounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade creditors are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.

1.10 Equity instruments

Equity instruments issued by the company are recorded at the proceeds received, net of transaction costs. Dividends payable on equity instruments are recognised as liabilities once they are no longer at the discretion of the company.

1.11 Taxation

The tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the reporting end date.

1 Accounting policies (continued)

Deferred tax

Deferred tax liabilities are generally recognised for all timing differences and deferred tax assets are recognised to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Such assets and liabilities are not recognised if the timing difference arises from goodwill or from the initial recognition of other assets and liabilities in a transaction that affects neither the tax profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting end date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Where items recognised in other comprehensive income or equity are chargeable to or deductible for tax purposes, the resulting current or deferred tax expense or income is presented in the same component of comprehensive income or equity as the transaction or other event that resulted in the tax expense or income. Deferred tax assets and liabilities are offset when the company has a legally enforceable right to offset current tax assets and liabilities and the deferred tax assets and liabilities relate to taxes levied by the same tax authority.

1.12 Employee benefits

The costs of short-term employee benefits are recognised as a liability and an expense, unless those costs are required to be recognised as part of the cost of stock or fixed assets.

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

Termination benefits are recognised immediately as an expense when the company is demonstrably committed to terminate the employment of an employee or to provide termination benefits.

1.13 Retirement benefits

Payments to defined contribution retirement benefit schemes are charged as an expense as they fall due.

1.14 Share-based payments

For cash-settled share-based payments, a liability is recognised for the goods and services acquired, measured initially at the fair value of the liability. At the balance sheet date until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the year.

1.15 Leases

Rentals payable under operating leases, including any lease incentives received, are charged to income on a straight line basis over the term of the relevant lease except where another more systematic basis is more representative of the time pattern in which economic benefits from the lease asset are consumed.

Notes to the financial statements (continued)

For the year ended 31 March 2019

1 Accounting policies (continued)

1.16 Foreign exchange

Transactions in currencies other than pounds sterling are recorded at the rates of exchange prevailing at the dates of the transactions. At each reporting end date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing on the reporting end date. Gains and losses arising on translation are included in the income statement for the period.

2 Critical accounting judgements and key sources of estimation uncertainty

In the application of the company's accounting policies, the directors are required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised where the revision affects only that period, or in the period of the revision and future periods where the revision affects both current and future periods.

Critical judgements

The following judgements (apart from those involving estimates) have had the most significant effect on amounts recognised in the financial statements.

Share based payment

The company has incurred a charge of £136,365 based on the fair value of the cash settled share based payment transaction. The assumptions used to determine the fair value are detailed in note 13.

3 Turnover and other revenue

An analysis of the company's turnover is as follows:

	2019	2018
	£	£
Turnover analysed by geographical market		
USA	2,975,657	2,192,960

Other creditors	1,273,582	597,053
	<u>2,972,618</u>	<u>1,268,479</u>

Included in other creditors is an invoice financing facility secured by a floating charge over the assets and undertakings of the company and a charge over the debtor book.

Included in bank loans and overdrafts is an amount of £700,000 drawn under a Revolving Credit Facility. The facility is due for renewal in June 2020.

Included in other creditors is an unsecured loan that is due to be repaid by 31 August 2019. The directors consider that the carrying amount of this loan approximates to the amortised cost value. The movement on the loan from the prior year is due to FX retranslation at the year end. The loan bears interest at a rate of 7% per annum.

Notes to the financial statements (continued)

For the year ended 31 March 2019

10 Share-based payment transactions

The company has entered into a phantom share scheme for four employees that are employed by its subsidiary Compass Box USA LLC. The phantom share scheme is in relation to 52 AA phantom shares and vest on the date of a change of control of the company as determined in the sole discretion of the board. The scheme will lapse on the date that the employee ceases to work for the company except when the cessation is terminated with good reason. The award payment will be made after the vesting date.

The company has used a Black Scholes model to determine the fair value of the cash settled share based payment transaction resulting in a change in the investment held in Compass Box USA LLC of £20,452. The model used relevant assumptions that were appropriate for the company as at the year-end 31 March 2019, these included;

- Exit event occurring within the next 3 years;
- 42% of employees eligible for phantom shares remaining in employment until the exit event occurs; and
- Low volatility of share price taking into account similar competitors and forecasts of the company

There is no impact to the income statement with an increase in other creditors and investment in its subsidiary, Compass Box USA LLC, of £20,452.

Compass Box Delicious Whisky Limited

Notes to the financial statements (continued)

For the year ended 31 March 2019

11 Called up share capital

	2019 £	2018 £
Ordinary share capital		
Issued and fully paid		
1,239 "A" Ordinary shares of £1 each	1,239	1,239
1,199 "B" Ordinary shares of £1 each	1,199	1,199
1 "C" Ordinary shares of £1 each	1	1
53 "AA" Ordinary shares of £1 each	53	53
	<u>2,492</u>	<u>2,492</u>

It was resolved on 9 May 2019 that 1 Ordinary AA share be issued at par value.

A shares have attached to them full voting, dividend and capital distribution (including on winding up) rights. They do not confer rights of redemption.

B shares have attached to them full voting, dividend and capital distribution (including on winding up) rights. They do not confer rights of redemption.

C shares shall have no right to vote and shall entitle the holder of such C share to receive a dividend of £1 per C share in any year in which the aggregate of all dividends declared and paid in respect of all A shares and B shares then in issue is not less than £1,000,000 for each such share. On a return of assets on liquidation, the holders of the C share shall be entitled only to the return of the nominal value of the C share held. the C share is not redeemable.

AA shares shall have no right to vote and shall entitle the holder of such AA shares to receive a dividend pro rata according to their holding of AA shares. On a return of assets on liquidation, the holders of the AA shares shall be entitled to receive any amount over £2,000,000 in equal proportions with the holders of the A shares and the B shares. The AA shares are not redeemable.

12 Audit report information

As the income statement has been omitted from the filing copy of the financial statements the following information in relation to the audit report on the statutory financial statements is provided in accordance with s444(5B) of the Companies Act 2006:

The auditor's report was unqualified.

The senior statutory auditor was Jamie Cassell.

The auditor was Saffery Champness LLP.

Compass Box Delicious Whisky Limited

Notes to the financial statements (continued)

For the year ended 31 March 2019

13 Contingent assets

At the year end, there was an estimated refund due from the US Government of \$190,845 in relation to reimbursement of backdated duties. The receipt of this refund is probable, not virtually certain, and therefore not recognised as a contingent asset.

14 Operating lease commitments

Lessee

At the reporting end date the company had outstanding commitments for future minimum lease payments under non-cancellable operating leases, as follows:

2019	2018
£	£
39,677	61,718
<u> </u>	<u> </u>

15 Related party transactions

During the year the company received goods and services to a value of £1,440,027 (2018: £1,364,991) from Compass Box USA LLC. At the end of the year the company was owed £2 by Compass Box USA LLC (2018: £7,199 owed to Compass Box USA LLC). Compass Box USA LLC is a wholly owned subsidiary of the company.

16 Directors' transactions

Dividends totalling £nil (2018: £nil) were paid in the year in respect of shares held by the company's directors.

Remuneration paid to directors during the year was £72,165 (2018: £71,576). Directors were considered to be key management personnel during the year.

Remuneration paid to non-executive directors during the year was £5,292. The non-executive directors are related parties by virtue of their shareholding in the company.

17 Parent company

The directors consider there to be no ultimate controlling party.
