Turnover
Turnover represents net invoiced sales of goods, excluding value added tax.

Tangible fixed assets
Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life or, if held under a finance lease, over the lease term, whichever is the shorter.

Plant and machinery	- 20-33% on cost
Fixtures and fittings	- 33-50% on cost
Motor vehicles	- 25% on reducing balance

Stocks
Stock and work in progress are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

Cost includes all direct expenditure and an appropriate proportion of fixed and variable overheads.

Deferred taxation
Provision is made at current rates for taxation deferred in respect of all material timing differences except to the extent that, in the opinion of the directors, there is reasonable probability that the liability will not arise in the foreseeable future.

Hire purchase and leasing commitments
Assets obtained under hire purchase contracts are capitalised in the balance sheet and are depreciated over their estimated useful lives.

The interest element of these obligations is charged to the profit and loss account over the relevant period. The capital element of future payments is treated as a liability.

Rentals paid under operating leases are charged to the profit and loss account as incurred.

Pensions
The company operates a defined contribution pension scheme. Contributions payable for the period are charged in the profit and loss account.
