NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 28 FEBRUARY 2016

1. ACCOUNTING POLICIES

Going concern
The financial statements have been prepared on the going concern basis which assumes that the company will continue in operational existence for the foreseeable future. As at 28 February 2016 the liabilities exceeded its assets by £152,981 (2015: £194,905). The company is thus dependent on the continuing financial support of its creditors. The directors are confident of this continuing support and of the company's long term trading prospects and on this basis consider it appropriate to prepare the financial statements on the going concern basis. The financial statements do not include any adjustments that would result from withdrawal of financial

Accounting convention
The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2015).

Turnover
Turnover represents net invoiced sales of goods, excluding value added tax.

Stocks
Work in progress is valued at the lower of cost and net realisable value.

Cost includes all direct expenditure and an appropriate proportion of fixed and variable overheads.

Deferred tax
The tax expense represents the sum of the corporation tax and deferred tax charge for the year.

The tax currently payable is based on taxable profit for the year. The company's liability for current tax is calculated using the tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is measured on differences between the carrying amounts of assets and liabilities in the accounts and the corresponding tax bases, as used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all temporary timing differences that have originated but not reversed by the balance sheet date and are not recognised as permanent differences. Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available in the future. Deferred tax is calculated at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is charged or credited in the profit and loss account, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.
