NOTES TO THE ABBREVIATED ACCOUNTS
FOR THE YEAR ENDED 30 NOVEMBER 2016

1. ACCOUNTING POLICIES

Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2015).

Turnover

Turnover, which is stated net of value added tax, represents amounts invoiced to third parties, except in respect of contracts in progress where turnover represents the sales value of work done during the year, including estimates of amounts not invoiced.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life or, if held under a finance lease, over the lease term, whichever is the shorter.

Plant and machinery etc - 33% on cost and 25% on reducing balance

Stocks

Stocks and work in progress are valued at the lower of cost and net realisable value. For property developments, work in progress comprises property costs and all direct costs associated with each property including an appropriate proportion of production overheads. No interest costs are included in stock.

The company has a number of completed properties available for resale which were rented out during the year pending sale. Such properties are included in stock on the above basis and short term rental income is recognised on a straight line basis over the period of the relevant lease.

Profit on contracts is taken as the work is carried out if the final outcome can be assessed with reasonable certainty. The profit included is calculated on a prudent basis to reflect the proportion of work carried out at the year end, by recording turnover and related costs as contract activity progresses. Turnover is calculated as the proportion of the total contract value which costs to date bear to total expected costs for that contract. Full provision is made for foreseeable losses. Where the final outcome of the contract cannot be assessed with reasonable certainty, the contract is recorded as work-in-progress and is valued at cost less any payments to account and foreseeable losses.

Deferred tax

Full provision has been made for deferred taxation in respect of timing differences that have originated but not reversed at the balance sheet date, at rates expected to apply when they crystallise, based on current tax rates and law. Deferred tax assets are recognised to the extent that their recoverability is more likely than not. Deferred tax assets and liabilities are not discounted.

Hire purchase and leasing commitments

Assets obtained under hire purchase contracts or finance leases are capitalised in the balance sheet. Those held under hire purchase contracts are depreciated over their estimated useful lives. Those held under finance leases are depreciated over their estimated useful lives or the lease term, whichever is the shorter.

The interest element of these obligations is charged to the profit and loss account over the relevant period. The capital element of the future payments is treated as a liability.

Rentals paid under operating leases are charged to the profit and loss account on a straight line basis over the period of the lease.
