Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date, where transactions or events that result in an obligation to pay more or a right to pay less tax in the future have occurred by the balance sheet date with certain limited exceptions. Deferred tax is calculated on an undiscounted basis at the tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.
