The financial statements were approved by the director on 9 May 2019 and were signed by:

M C Marshall - Director

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 DECEMBER 2018**

1. STATUTORY INFORMATION

Ecosse Motorcycles Ltd is a private company, limited by shares, registered in Scotland. The company's registered number and registered office address can be found on the Company Information page.

The presentation currency of the financial statements is the Pound Sterling (£).

2. STATEMENT OF COMPLIANCE

These financial statements have been prepared in accordance with Financial Reporting Standard 102, The Financial Reporting Standard applicable in the UK and Republic of Ireland, including Section 1A, and the Companies Act 2006. There are no material departures from FRS 102.

3. ACCOUNTING POLICIES

Basis of preparing the financial statements

The financial statements have been prepared under the historical cost convention as modified by the revaluation of certain assets.

Turnover

Turnover is recognised to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured. Turnover is measured as the fair value of the consideration received or receivable from the sale of goods or exchange of services, excluding discounts, rebates, value added tax and other sales taxes. Turnover is not recognised when goods or services are exchanged for goods or services that are of a similar nature and value or when the transaction lacks commercial substance.

Sale of goods

Turnover from the sale of goods is recognised when all of the following conditions are satisfied:

- the company has transferred the significant risks and rewards of ownership to the buyer;
- the company retains neither continuing managerial involvement to the degree usually associated with the ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the company will receive the consideration due under the transaction;
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

The percentage of completion method is used to calculate the revenue recognised at the period end.

Turnover from the rendering of services is recognised when all of the following conditions are satisfied:

- the amount of revenue can be measured reliably;
 - it is probable that the economic benefits associated with the transaction will flow to the entity;
 - the stage of completion of the transaction at the end of the reporting period can be measured reliably;
- and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Goodwill

Goodwill, being the amount paid in connection with the acquisition of a business in 2005, has been fully amortised over its estimated useful life of 10 years.

3. ACCOUNTING POLICIES - continued

Intangible assets

Intangible assets are initially measured at cost. After initial recognition, intangible assets are measured at cost less any accumulated amortisation and any accumulated impairment losses.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life or, if held under a finance lease, over the lease term, whichever is the shorter.

Leasehold improvements	- 25% on reducing balance
Plant and machinery	- 25% on reducing balance
Fixtures and fittings	- 25% on reducing balance
Motor vehicles	- 25% on reducing balance

Investment property

Investment property is shown at most recent valuation. Any aggregate surplus or deficit arising from changes in fair value is recognised in profit or loss.

Investment property is included at fair value. Valuations are carried out annually by the directors based on:

- how the market could be expected to price the asset
- measuring the risk return factors inherent in the asset

Gains are recognised in the income statement. Deferred taxation is provided on these gains at the rate expected to apply when the property is sold. No depreciation is provided in respect of investment properties.

Stocks

Stocks and work in progress are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

Cost is calculated using the first-in, first-out method and includes all purchase, transport, and handling costs in bringing stocks to their present location and condition.

Taxation

Taxation for the year comprises current and deferred tax. Tax is recognised in the Income Statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current or deferred taxation assets and liabilities are not discounted.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

3. ACCOUNTING POLICIES - continued
Hire purchase and leasing commitments

Assets held under finance lease and hire purchase contracts are capitalised in the balance sheet and depreciated over their expected useful lives. The interest element of the leasing payments represents a constant proportion of the capital balance outstanding and is charged to the profit and loss account over the period of the lease.

All other leases are regarded as operating leases and the payments made under them are charged to the profit and loss account on a straight line basis over the lease term.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to profit or loss in the period to which they relate.

Employee benefits

The company recognises a provision for annual leave accrued by employees as a result of services rendered in current period, and which employees are entitled to carry forward and use within the next 12 months. The provision is measured at the salary cost payable for the period of absence.

Financial instruments

Basic financial assets/liabilities including trade and other receivables/payables, cash and bank balances, are initially recognised at transaction price unless the arrangement constitutes a financing transaction (loan over period of time) where the transaction is measured at present value of the future receipts discounted at a market rate of interest. Such assets/liabilities are subsequently carried at amortised cost using the effective interest method.
