Notes to the Abbreviated Accounts
for the Year Ended 31 March 2012

1. ACCOUNTING POLICIES

Accounting convention
The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover
Turnover represents sale of goods and services provided net of Value Added Tax and trade discounts. Turnover is recognised when the goods and services are physically provided to the customer.

Tangible fixed assets
Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Boat - 15% on reducing balance

Deferred tax
The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the Balance Sheet date. However, deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted. Deferred taxation is measured on a non-discounted basis at the average tax rates that are expected to apply in the periods in which the timing differences reverse, based on tax rates and laws enacted or substantially enacted at the Balance Sheet date.

Deferred tax is not provided on timing differences arising from the revaluation of fixed assets where there is no commitment to sell the assets.
