NOTES TO THE UNAUDITED ABBREVIATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 MARCH 2015

1 Accounting policies

Basis of accounting

The financial statements are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

The company had another profitable year. Trading has continued at similar levels since the year end, with no reason to expect this not to continue. The directors therefore continue to prepare the financial statements on a going concern basis.

Turnover

Turnover represents revenue recognised in the accounts. Revenue is recognised when the company fulfils its contractual obligations to customers by supplying services and excludes value added tax. Where services are performed gradually over time, revenue is recognised as activity progresses by reference to the value of work performed.

Goodwill

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost less estimated residual value of each asset over its expected useful life, as follows:

Plant and machinery	25% straight line
---------------------	-------------------

Pensions

The company operates a defined contribution scheme for the benefit of its employees. Contributions payable are charged to the profit and loss account in the year they are payable.

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

Deferred tax is recognised in the Statement of Total Recognised Gains and Losses on revaluations where at the balance sheet date there is an agreement to sell the asset.

Deferred tax is recognised in respect of the retained earnings of overseas subsidiaries and associates only to the extent that, at the balance sheet date, dividends have been accrued as receivable or a binding agreement to distribute past earnings in future has been entered into by the subsidiary or associate.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.

Financial instruments

Financial instruments are classified and accounted for according to the substance of the contractual arrangement as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
